"Where Once We Feared Enemies; Whether we are conscious of it or not we fear difference. That often unwarranted fear leads us to create enemies in our hearts and minds and fear was no stranger to Oakhurst Presbyterian Church as confessed by Pastor Nibs Stroupe: ""We have listened to one another's stories here and we have discovered that the people we feared those monsters we thought would destroy us -- because of different skin colors different genders different sexual orientations different economic categories -- they are really our sisters and brothers the folks for whom our hearts long."" In the 1960s the Oakhurst congregation was 900 members strong but by the time Nibs Stroupe arrived in 1983 ""white flight"" had left less than 100 on the church's dwindling membership rolls. Since then Oakhurst has undergone an extraordinary transformation re-inventing itself as a growing community that welcomes everyone. The congregation has attracted national attention for its radically inclusive and egalitarian diversity which extends beyond racial integration to class gender sexual orientation and theological perspective. How have people from such dissimilar backgrounds come together to create a harmonious and thriving whole? In what biblical vision is it rooted and shaped? By what theological resources is it fed and sustained? The heart of the answer to these questions lies in the exceptional sermons of Nibs Stroupe. Growing out of the experience of a multicultural congregation in which diversity is both valued and feared these messages offer an uncompromising prophetic vision of the American church's identity and mission. Stroupe firmly grounds a liberal social viewpoint within the biblical and theological traditions of the church and he calls us to hear God's claim on us in our place and in our time. Underlying his powerful sermons is the fundamental conviction that the barriers that separate us from our neighbors have been brought down in Jesus Christ. ""Where Once We Feared Enemies"" will be an indispensable addition to any pastor's library. It is also inspiring and enlightening reading for anyone interested in the future of the American church as well as its role in the continuing stories of race relations civil rights and peace and justice issues.

""These sermons are not your typical ""social action"" homilies. Rather Nibs Stroupe cuts to the quick of the biblical message of Jesus as it impacts the minds and hearts of thinking people of every race class and political stripe. This is theologically rich fare that will satisfy and energize Christians and non-Christians alike. These are the kind of no-nonsense sermons that have made Oakhurst one of the most faithful and consistent witnesses to the love and justice-making of the gospel that I have seen in more than half a century of ministry." Gayraud S. Wilmore

Stroupe is also the author of"" While We Run This Race"" which won the 1996 Gustavus Myers Award for outstanding book on human rights. "Uncertainty; Praise for the First Edition ""...a reference for everyone who is interested in knowing and handling uncertainty."" -Journal of Applied Statistics The critically acclaimed First Edition of Understanding Uncertainty provided a study of uncertainty addressed to scholars in all fields showing that uncertainty could be measured by probability and that probability obeyed three basic rules that enabled uncertainty to be handled sensibly in everyday life. These ideas were extended to embrace the scientific method and to show how decisions containing an uncertain element could be rationally made. Featuring new material the Revised Edition remains the go-to guide for uncertainty and decision making providing further applications at an accessible level including: A critical study of transitivity a basic concept in probability A discussion of how the failure of the financial sector to use the proper approach to uncertainty may have contributed to the recent recession A consideration of betting showing that a bookmaker's odds are not expressions of probability Applications of the book's thesis to statistics A demonstration that some techniques currently popular in statistics like significance tests may be unsound even seriously misleading because they violate the rules of probability Understanding Uncertainty Revised Edition is ideal for students studying probability or statistics and for anyone interested in one of the most fascinating and vibrant fields of study in contemporary science and mathematics.; ['Mathematics'], "

"Solomon Time; Who hasn't fantasized about dismantling his or her hassled wired-up life for a simpler existence? Yet who among us has the will and opportunity to do it? The answer of course is very few. Will Randall a young English schoolmaster had such a chance -- and took it. He uprooted his conventional First World life and let himself be blown to one of the farthest and most beautiful corners of the earth the Solomon Islands of the South Pacific. In the entertaining tradition of Bill Bryson's In a Sunburned Country this is the story of Solomon Time. From the first it's an improbable journey. In a chance encounter on a rugby field Randall meets a doddering old man known as ""the Commander"" who has retired to England after running a cocoa plantation in the South Pacific for thirty years. Six months later the Commander dies and his will is read: he wants someone to travel to his beloved long-missed island -- where his plantation has fallen into ruin -- and devise a way for the natives to support themselves. If successful they might avoid poverty build a new school and even fend off the greedy developers circling their peaceful waters. It's a mission of noblesse oblige yet possibly a fool's errand too. Randall agrees to go. Spread across the Tropic of Capricorn the Solomon Islands are not so much the Pacific archipelago that time forgot as the one that forgets time. Randall's new home is Mendali a fishing village so remote it can be reached only by motorized canoe. But the people of the village some with cheeks engraved with a rising sun are welcoming for they remember the Commander kindly and still practice a

pagan Anglicanism in a church he built for them in 1956. They sleep in houses made of leaves and live on fish of every sort mud crabs yams ngali nuts even the honeycomb of termites. Randall decides that the villagers could raise chickens and they greet the idea with enthusiasm. But finding live chicken eggs in their watery world proves wildly difficult and Randall must chase after the eggs over shark-infested seas and through jungles where strange characters reside including a one-eyed dwarf and a tattooed lady. One couldn't imagine a better man than Will Randall to help the people of Mendali meet the twenty-first century on their own terms. But will he succeed? Solomon Time is a moving and witty account of one man's accidental adventure in paradise and is certain to enchant explorers and armchair travelers alike.; ['Travel'], "

"Foreign Language Teacher's Internet Yearbook; Educators professionalism and politics offers ways of understanding how and with what consequences national systems of education and the work of education professionals are being reregulated in the context of contemporary global transitions. Globalization does not just create transnational organizations relations and practices; it also transforms nation-states by creating more complex education spaces that impinge on the work of educators and the learning that they enable globally nationally and locally. This volume of the World Yearbook of Education focuses firmly on the educators themselves. It documents the way educators encounter and renegotiate ideas and practices that travel globally as they seek to enact their established professional projects. This framing recognises that educators' spaces

work and identities are historically anchored in national institutional trajectories but are both disturbed and renewed as globally mobile ideas and practices ""touch down"" within national systems of education. The chapters examine the effect of global transitions on educators and education and offers new perspectives on educational work in different parts of the world today. "Fatal Eggs and Other Soviet Satire; A classic anthology of wildly inventive and comic tales that brilliantly satirize post-revolutionary Russia. Among the seventeen bold and inventive writers represented here are the brilliant Mikhail Bulgakov Ilf and Petrov Mikhail Zoshchenko Yevgeny Zamyatin Valentin Katayev and Yuri Kazakov. Whether the stories and novellas collected here take the form of allegory fantasy or science fiction the results are ingenious critical and hilariously timeless. "The Worth of a Child; Thomas Murray's graceful and humane book illuminates one of the most morally complex areas of everyday life: the relationship between parents and children. What do children mean to their parents and how far do parental obligations go? What from the beginning of life to its end is the worth of a child? Ethicist Murray leaves the rarefied air of abstract moral philosophy in order to reflect on the moral perplexities of ordinary life and ordinary people. Observing that abstract moral terms such as altruism and selfishness can be buried in the everyday doings of families he maintains that ethical theory needs a richer description than it now has of the moral life of parents and children. How far should adults go in their quest for children? What options are available to women who do not want to bear a child now?

Should couples be allowed to reject a child because of genetic disability or ""wrong"" gender? How can we weigh the competing claims of the genetic and the rearing parents to a particular child? The Worth of a Child couples impressive learning with a conversational style. Only by getting down to cases Murray insists can we reach moral conclusions that are unsentimental farsighted and just. In an era of intense public and private acrimony about the place and meaning of ""family values"" his practical wisdom about extraordinary difficult moral issues offers compelling reading for both experienced and prospective parents as well as for ethicists social and behavioral scientists and legal theorists.; ['Philosophy'], "

In 1980 Ronald Reagan won a landslide victory on a platform of tax cuts smaller government and a stronger defense. And in 1994 Newt Gingrich took up the revolutionary mantle tossing out the

Democratic Congress and proclaiming the end of ""business as usual"" in Washington. As the 2000 presidential election draws near the optimism of those heady days seems like ancient history. The Reagan years are a dim memory and the Republican leadership on Capitol Hill after five years in power has failed to enact the Contract with America. In 2000 the GOP faces not only the possibility of a third consecutive presidential defeat but the prospect of losing its House majority as well. The time for dithering is over and the time for action is now. Completing the Revolution is Robert Novak's manifesto for a Republican victory in November and for implementing a conservative vision for government in the years to come. He brings to his analysis the combativeness familiar to those who watch him on CNN's Crossfire and the insight and perspective that have helped to make him one of America's leading political columnists. He is not afraid to criticize the various presidential candidates or the Republican leaders in Congress especially those who fail to stand up for the party's principles -- whom he calls ""Clintonized Republicans." At the center of Completing the Revolution is Novak's bold proposal for a new Republican agenda one that remains true to the party's core values and can command a majority in the country. He offers surprising and original perspectives on taxes Social Security abortion campaign finance race and gender politics and term limits among other issues. He also lays bare the fault lines that have emerged in the 2000 presidential race and shows how they offer the party a stark choice: division and defeat or principled victory. The road to the White House Novak admonishes requires one thing above all from candidates and supporters alike: the courage to stick to real Republican principles. For any conservative who cares about the direction of public life in America Robert Novak has provided the essential guide to our nation's millennial election.; ['Political Science'], "

"King Of Sunlight; William Hesketh Lever - soap-boiler social reformer MP tribal chieftain multi-millionaire and Lord of the Western Isles - was one of the most extraordinary men ever to leave his mark on Britain. Beliefs far ahead of their times - the welfare state votes for women workers' rights - jostled in his mind with ideas that were fantastically bonkers - the world's problems could be solved by moving populations from country to country ballroom dancing could save the soul and the only healthy way to sleep was outdoors in the wind and the rain. Adam Macqueen traces Lever's footsteps from his humble Bolton boyhood to a business empire that straddled the world visiting the homes and model towns from the Mersey to the Congo that still bear the mark - and often the name - of William Lever. It is a hilarious and touching journey that shines a spotlight on a world and a set of beliefs long gone and asks several vital questions: where does philanthropy stop and social engineering begin? Is it right for an employer to dictate how his workers spend their weekends and hire private detectives to make sure they are doing it properly? Today it is considered one of the Great American Novels and a leading work of American Romanticism. "Evolution and Christian Faith; Click here to visit evolutionandchristianfaith.org ""I'm an evolutionary biologist and a Christian"" states Stanford professor Joan Roughgarden at the outset of her groundbreaking new book Evolution and Christian Faith: Reflections of an Evolutionary Biologist. From that perspective she offers an elegant deeply satisfying reconciliation of the theory of evolution and the wisdom of the Bible. Perhaps only someone with Roughgarden's unique academic standing could examine so well controversial issues such as the teaching of intelligent design in public schools or the potential flaws in Darwin's theory of evolution. Certainly Roughgarden is uniquely suited to reference both the minutiae of scientific processes and the implication of Biblical verses. Whether the topic is mutation rates and lizards or the hidden meanings behind St. Paul's letters Evolution and Christian Faith distils complex arguments into everyday understanding.

Roughgarden has scoured the Bible and scanned the natural world finding examples time and again not of conflict but of harmony. The result is an accessible and intelligent context for a Christian vision of the world that embraces science. In the ongoing debates over creationism and evolution Evolution and Christian Faith will be seen as a work of major significance written for contemporary readers who wonder how-or if-they can embrace scientific advances while maintaining their traditional values.; ['Science'], "

"The Complete Poems of Emily Jane Brontë; In 1846 a small book entitled Poems by Currer Ellis and Acton Bell appeared on the British Literary scene. The three pseudonymous poets the Brontë sisters went on to unprecedented success with such novels as Wuthering Heights Agnes Grey and Jane Eyre all published in the following year. As children these English sisters had begun writing poems and stories about an imaginary country named Gondal yet they never sought to publish any of their work until Charlotte's discovery of Emily's more mature poems in the autumn of 1845. Charlotte later recalled: ""I accidentally lighted on a MS. volume of verse in my sister Emily's handwriting....I looked it over and something more than surprise seized me -- a deep conviction that these were not common effusions nor at all like the poetry women generally write. I thought them condensed and terse vigorous and genuine. To my ear they had also a peculiar music -- wild melancholy and elevating." The renowned Hatfield edition of The Complete Poems of Emily Jane Brontë includes the poetry that captivated Charlotte Brontë a century and a half ago a body of work that continues to resonate today. This incomparable volume includes Emily's verse from Poems by Currer Ellis and Acton Bell as well as 200 works collected from various manuscript sources after her death in 1848. Some were deleted and preserved by Charlotte and Arthur Bell Nichols; still others were discovered years later by Brontë scholars. Originally released in 1923 Hatfield's collection was the result of a remarkable attempt over twenty years to isolate Emily's poems from her sisters' and to achieve chronological order. Accompanied by an interpretive preface on ""The Gondal Story"" by Miss Fannie E. "Thieves Deceivers and Killers: Tales of Chemistry in Nature; The tobacco plant synthesizes nicotine to protect itself from herbivores. The female moth broadcasts sex pheromones to attract a mate while a soldier ant deploys an alarm pheromone to call for help. The carbon dioxide on a mammal's breath beckons hungry ticks and mosquitoes while a flower's fragrance speaks to the honey bee. Indeed much of the communication that occurs within and between various species of organisms is done not by sight sound or touch but with chemicals. From mating to parenting foraging to self-defense plant and animal activities are accomplished largely by the secretion or exchange of organic chemicals. The fascinating and fast-developing science that encompasses these diverse phenomena is introduced here by William Agosta in a series of remarkable stories absolutely accessible to the general reader yet revelatory to chemists and biologists. Among Agosta's characters are the organisms that steal counterfeit or interpret the chemical signals of other species for their own ends. We learn of seeds that mimic ant odors to facilitate their own dispersion and flies that follow the scent of truffles to lay their eggs. We read about pit vipers that react in terror when their flicking tongues detect a king snake and slave-making ants incapable of finding their own food. And we meet ice-age people who ate birch fungus to relieve whipworms and early human hunters who used the urine of wolves to maneuver deer to favorable sites. Agosta also chronicles the rapid development of the applied science that makes use of chemical ecology. As researchers deepen our understanding of the biological world they are making economically significant discoveries (such as enzymes that remain stable in extreme heat) finding ways to reduce our reliance on manufactured pesticides identifying new uses for traditional medicines and developing sophisticated new pharmaceuticals effective in treating malaria and several cancers. On the horizon are antiviral agents derived from the chemical defenses of marine species. From the exploits of flies to the high-stakes effort to cure human disease Agosta's tour of chemical ecology grants any reader entrance to the invisible realm where chemistry determines life and death.; ['Science'], "

"Salammbo; Using contemporary theories of semiology Professor Mullen Hohl offers a detailed analysis of exoticism in Flaubert's masterpiece. A pervasive schema of multiplicity and mutilation gives the novel its fundamental structure rather than the previously accepted dichotomy based upon the dialectical opposition of moon and sun. In this manner Flaubert created metonymic correspondences shared identities and equivalences between certain characters and mythological gods of the ancient Mediterranean world--most importantly Adonis. Language and religion are seen as instruments of obfuscation and ambiguity. ""Hohl thus offers a powerful challenge to the conventional reading of Salammbo as a series of dialectical oppositions between male and female sun and moon civilized and barbarian." --Stirling Haig French Review.; ['Literary Criticism'], "

"On Planet Earth: Travels in an Unfamiliar Land; On Planet Earth: Travels in an Unfamiliar Land collects Jan Staller's strangely seductive photographs from locations across the United States and around the world.-from abandoned factories to military test sites from high-tech water-purification plants to heavy machinery that looks like it fell from outer space. Staller's square-format and panoramic photographs reveal bizarre and forgotten constructions of industrial society set against a symphony of color and light. A sense of mystery pervades Staller's images: ordinary building devices and machine parts take on the aura of Surrealist sculptures while common construction sites echo the sacred grounds of ancient civilizations. Using long exposures and a combination of light sources-often photographing at dawn or dusk-Staller produces photographs that are breathtakingly rich in color and intensity.

Complementing the images in On Planet Earth is a narrative by Luc Sante who shares Staller's fascination with urban and industrial wastelands the history they contain and the mysteries they conceal. Together Staller's photographs and Sante's text offer a stimulating Technicolor tour of the unknown at the edge of the contemporary landscape.; ['Photography'], "

"Renewable Energy Third Edition; This third edition of Renewable Energy is undoubtedly one of the most complete accounts of the subject from source through to extraction and use. The book is academically rigorous but accessible. The author first describes the effect of the sun on the atmosphere and the creation of wind and waves including the effects of global warming. For each type of renewable energy from direct solar radiation to wind and biomass there follows a technical description of the devices that can be used to transform the energy into useful forms. The author explores new solar cell types including polymer and organic cells new biofuel processes and new wave energy devices. The final part of the book looks at social and economic aspects of renewable energy - the costs of our current fuel bills versus new energy sources and the difference it could make to developing as well as developed countries. The concept of whole new energy systems based around wind solar and other energies is put into a real-life context. Key features include: · Reference paths: the reader may follow the general process from source through to distribution or concentrate on a specific type of energy. · The material is divided into undergraduate text and advanced options. · Details the significant expansion of the field since the publication of the previous edition. · Updated material includes offshore wind technologies polymer and organic solar cells new developments in hydrogen storage pipeline transmission biofuel processes and wave energy devices evaluation of biomass options and an outlook on the renewable energy market. \* The only rigorous theory and applications book available \* Provides the principles of renewable energy flows/sources and energy conversion processes \* Details the significant expansion of the field since the publication of the previous editions; ['Technology & Engineering'], "

"Positive Transfer Operators and Decay of Correlations (Advanced Series in Nonlinear Dynamics Volume 16); Although individual orbits of chaotic dynamical systems are by definition unpredictable the average behavior of typical trajectories can often be given a precise statistical description. Indeed there often exist ergodic invariant measures with special additional features. For a given invariant measure and a class of observables the correlation functions tell whether (and how fast) the system ?mixes? i.e. ?forgets? its initial conditions. This book addressed to mathematicians and mathematical (or mathematically inclined) physicists shows how the powerful technology of transfer operators imported from statistical physics has been used recently to construct relevant invariant measures and to study the speed of decay of their correlation functions for many chaotic systems. Links with dynamical zeta functions are explained. The book is intended for graduate students or researchers entering the field and the technical prerequisites have been kept to a minimum.; ['Science'], "

"God Tells the Man Who Cares; ""God has nothing to say to the frivolous man." - A. W. Tozer Tozer states this bluntly in the book's beginning and he carries the sentiment through the last chapter. In God Tells the Man Who Cares Tozer urges the believer to be vigilant in his pursuit of God's voice in his life. He reminds us that stillness and meditation on the Spirit of God may be more spiritually profitable than the front of religion that is so prevalent in modern society. Stillness is the quality that is so often lost in the business of today's world. To be still and know that He is God is an old truth that is much quoted but rarely lived. Tozer's convicting voice will bring you to a new and humbling place in your relationship with the Lord. He invites you to lay your emotions at God's feet provides insight into the true nature of a servant's heart and decries many aspects of institutionalized Christianity warning against artificial religion with these words: "[It] is a disease of the soul and can only be healed by the Physician of souls.""; ['Religion'], "

"Primal Health: Understanding the Critical Period Between Conception and the First Birthday; Michel Odent the leading pioneer for natural childbirth indicates that the period between conception and a child's first birthday is critical to life-long health. In this prophetic book - first published in 1986 and reproduced here in its original form - he argues that different parts of the 'primal adaptive system' develop regulate and adjust themselves during foetal life and the time around birth and infancy. 'Everything which happens during this period of dependence on the mother has an influence on this basic state of health this primal health.' He suggests that the later well-being of adults their ability to withstand the 'diseases of civilization' such as hypertension cancer alcoholism and failures of the immune system resulting in AIDS allergies and viral diseases can all be traced back to society's ignorance of the vital importance of the primal period. Since the first edition of this groundbreaking work research has continued apace offering further evidence to substantiate Odent's ideas. "World Agriculture & the Environment; Only once we understand the long history of human efforts to draw sustenance from the land can we grasp the nature of the crisis that faces humankind today as hundreds of millions of people are faced with famine or flight from the land. From Neolithic times through the earliest civilizations of the ancient Near East in savannahs river valleys and the terraces created by the Incas in the Andean mountains an increasing range of agricultural techniques have developed in response to very different conditions. These developments are recounted in this book with detailed attention to the ways in which plants animals soil climate and society have interacted. Mazoyer and Roudart's *A History of World Agriculture* is a path-breaking and panoramic work beginning with the emergence of agriculture after thousands of years in which human societies had depended on hunting and gathering showing how agricultural techniques developed in the different regions of the world and how this extraordinary wealth of knowledge tradition and natural variety is endangered today by global capitalism as it forces the unequal agrarian heritages of the world to conform to the norms of profit. During the twentieth century mechanization motorization and specialization have brought to a halt the pattern of cultural and environmental responses that characterized the global history of agriculture until then. Today a small number of corporations have the capacity to impose the farming methods on the planet that they find most profitable. "Principles of social reconstruction; This book originally entitled *Why Men Fight* is generally seen as the fullest expression of Russell's political philosophy. Russell argues that after the experience of the Great War the individualistic approach of traditional liberalism has reached its limits. Political theory must be based on the motivated forces of creativity and impulse rather than on competition. Both are best fostered in the family in education and in religion - each of which Russell proceeds to discuss. The ideas expressed in *Principles of Social Reconstruction* have greatly contributed to Russell's fame as a social critic and anti-war activist. The new introduction by Richard Rempel locates them in the context of Russell's other writings and show that neither his ideas nor his language have lost their force and topicality over the years.; ['Philosophy'], "

"City of Women: Sex and Class in New York 1789-1860; In this brilliant and vivid study of life in New York City during the years between the creation of the republic and the Civil War a distinguished historian explores the position of men and women in both the poor and middle classes the conflict between women of the laboring poor and those of the genteel classes who tried to help them and the ways in which laboring women traced out unforeseen possibilities for themselves in work and in politics. Christine Stansell shows how a new concept of womanhood took shape in America as middle-class women constituted themselves the moral guardians of their families and of the nation while poor workingwomen cut adrift from the family ties that both sustained and oppressed them were subverting—through their sudden entry into the working and political worlds outside the home—the strict notions of female domesticity and propriety of "woman's place" and "woman's nature" that were central to the flowering and the image of bourgeois life in America. Here we have a passionate and enlightening portrait of New York during the years in which it was becoming a center of world capitalist development years in which it was evolving in dramatic ways becoming the city it fundamentally is. And we have as well a radically illuminating depiction of a class conflict in which the dialectic of female vice and virtue was a central issue. "Life in a Tidal Pool; Adam Nicolson explores the marine life inhabiting seashore rockpools with a scientist's curiosity and a poet's wonder in this beautifully illustrated book. The sea is not made of water.

Creatures are its genes. Look down as you crouch over the shallows and you will find a periwinkle or a prawn a claw-displaying crab or a cluster of anemones ready to meet you. No need for binoculars or special stalking skills: go to the rocks and the living will say hello. Inside each rock pool tucked into one of the infinite crevices of the tidal coastline lies a rippling silent unknowable universe. Below the stillness of the surface course different currents of endless motion—the ebb and flow of the tide the steady forward propulsion of the passage of time and the tiny lifetimes of the rock pool's creatures all of which coalesce into the grand narrative of evolution. In Life Between the Tides Adam Nicolson investigates one of the most revelatory habitats on earth. Under his microscope we see a prawn's head become a medieval helmet and a group of "winkles" transform into a Dickensian social scene with mollusks munching on Stilton and glancing at their pocket watches. Or rather is a winkle more like Achilles an ancient hero throwing himself toward death for the sake of glory? For Nicolson who writes "with scientific rigor and a poet's sense of wonder" (The American Scholar) the world of the rock pools is infinite and as intricate as our own. As Nicolson journeys between the tides both in the pools he builds along the coast of Scotland and through the timeline of scientific discovery he is accompanied by great thinkers—no one can escape the pull of the sea. We meet Virginia Woolf and her Waves; a young T. S. Eliot peering into his own rock pool in Massachusetts; even Nicolson's father-in-law a classical scholar who would hunt for amethysts along the shoreline his mind on Heraclitus and the other philosophers of ancient Greece. And of course scientists populate the pages; not only their discoveries but also their doubts and errors their moments of quiet observation and their thrilling realizations. Everything is within the rock pools where you can look beyond your own reflection and find the miraculous an inch beneath your nose. "The soul wants to be wet" Heraclitus said in Ephesus twenty-five hundred years ago. This marvelous book demonstrates why it is so.

"Word of Mouth: Body Language in Katherine Mansfield and Virginia Woolf (Feminist Issues: Practice Politics Theory); Word of Mouth focuses on the two most prominent women in British modernism Virginia Woolf and Katherine Mansfield. Both wrote with an extraordinary and sometimes celebratory self-consciousness about their status as ""women writers." At odds with their explicit privileging of female difference however are patterns of imagery that demonstrate self-revulsion and self-hatred the woman writer's rejection of herself. Patricia Moran points out that strategies of resistance and challenge are also strategies of repudiation and revulsion directed at female embodiment. Word of Mouth reevaluates Mansfield and Woolf focusing on the figures of the anorexic and the hysterical and on the extensive imagery of eating feeding starvation suffocation flesh and longing that permeates both fictional and nonfictional texts; it locates this writing within the overlapping frames of psychoanalytic theory studies of women and eating disorders and feminist work on women's anxiety of authorship.; ['Social Science'], "

"The Shere Hite Reader: New and Selected Writings on Sex Globalism and Private Life; The Shere Hite Reader presents wide-ranging analysis on the individual and society from a renowned thinker on psychosexual development. The book includes new science in addition to previously published material reflecting Hite's three decades of work probing the roots of human identity through questionnaires and theory. For the first time Hite formalizes her thinking on male adolescence that boys feel tortured by the new social role they are forced to assume at puberty requiring a show of superiority toward females. In new detail Hite advances her understanding that sex is political linking the expectation on women to achieve orgasm through coitus with broader patterns of oppression. Hite discusses new research on female adolescence challenging the ""virgin"" hymen concept and documenting that sexual awakening often precedes puberty. Hite also argues that pornography misrepresents male sexuality (not to mention female sexuality) depicting it as singular and silly instead of ""full of intriguing nuanced behavior involving the entire body not just the penis."" The authoritative collection of her work The Shere Hite Reader challenges the reader to a new way of seeing.; ['Health & Fitness'],"

"People and Cultures of Hawaii; A Psychocultural Profile; This is a significant update to the highly influential text People and Cultures of Hawaii: A Psychocultural Profile. Since its publication in 1980 the immigrant groups it discusses in depth have matured and new ones have been added to the mix. The present work tracks the course of these changes over the past twenty years constructing a historical understanding of each group as it evolved from race to ethnicity to culture. Individual chapters begin with an overview of one of fifteen groups. Following the development of its unique ethnocultural identity distinctive character traits such as temperament and emotional expression are explored—as well as ethnic stereotypes. Also discussed are modifications to the group's ethnocultural identity over time and generational change—which traits may have changed over generations and which are more hardwired or enduring. An important feature of each chapter is the focus on the group's family social structure generational and gender roles power distribution and central values and life goals. Readers will also find a description of the group's own internal social class structure social and political strategies and occupational and educational patterns. Finally contributors consider how a particular ethnic group has blended into Hawai'i's culturally sensitive society. People and Cultures of Hawai'i: The Evolution of Culture and Ethnicity will like its predecessor fill an important niche in understanding the history of different ethnic groups in Hawai'i.; ['Social Science'],"

"North to Aztlan : A History of Mexican Americans in the United States; Contemporary observers often quip that the American Southwest has become "Mexicanized" but this view ignores the history of the region as well as the social reality. Mexican people and their culture have been continuously present in the territory for the past four hundred years and Mexican Americans were actors in United States history long before the national media began to focus on them—even long before an international border existed between the United States and Mexico. North to Aztlan an inclusive readable and affordable survey history explores the Indian roots culture society lifestyles politics and art of Mexican Americans

and the contributions of the people to and their influence on American history and the mainstream culture. Though cognizant of changing interpretations that divide scholars Drs. De León and Griswold del Castillo provide a holistic vision of the development of Mexican American society one that attributes great importance to immigration (before and after 1900) and the ongoing influence of new arrivals on the evolving identity of Mexican Americans. Also showcased is the role of gender in shaping the cultural and political history of La Raza as exemplified by the stories of outstanding Mexicana and Chicana leaders as well as those of largely unsung female heros among them ranch and business owners and managers labor leaders community activists and artists and writers. In short readers will come away from this extensively revised and completely up-to-date second edition with a new understanding of the lives of a people who currently compose the largest minority in the nation.

"Vector Calculus; Vector calculus is the fundamental language of mathematical physics. It provides a way to describe physical quantities in three-dimensional space and the way in which these quantities vary. Many topics in the physical sciences can be analysed mathematically using the techniques of vector calculus. These topics include fluid dynamics solid mechanics and electromagnetism all of which involve a description of vector and scalar quantities in three dimensions. This book assumes no previous knowledge of vectors. However it is assumed that the reader has a knowledge of basic calculus including differentiation integration and partial differentiation. Some knowledge of linear algebra is also required particularly the concepts of matrices and determinants. The book is designed to be self-contained so that it is suitable for a programme of individual study. Each of the eight chapters introduces a new topic and to facilitate understanding of the material frequent reference is made to physical applications. The physical nature of the subject is clarified with over sixty diagrams which provide an important aid to the comprehension of the new concepts. Following the introduction of each new topic worked examples are provided. It is essential that these are studied carefully so that a full understanding is developed before moving ahead. Like much of mathematics each section of the book is built on the foundations laid in the earlier sections and chapters.;

"Students Resolving Conflicts; The untold story of the root cause of America's education crisis--and the seemingly endless cycle of multigenerational poverty. It was only after years within the education reform movement that Natalie Wexler stumbled across a hidden explanation for our country's frustrating lack of progress when it comes to providing

every child with a quality education. The problem wasn't one of the usual scapegoats: lazy teachers shoddy facilities lack of accountability. It was something no one was talking about: the elementary school curriculum's intense focus on decontextualized reading comprehension ""skills"" at the expense of actual knowledge. In the tradition of Dale Russakoff's *The Prize* and Dana Goldstein's *The Teacher Wars* Wexler brings together history research and compelling characters to pull back the curtain on this fundamental flaw in our education system--one that fellow reformers journalists and policymakers have long overlooked and of which the general public including many parents remains unaware. But *The Knowledge Gap* isn't just a story of what schools have gotten so wrong--it also follows innovative educators who are in the process of shedding their deeply ingrained habits and describes the rewards that have come along: students who are not only excited to learn but are also acquiring the knowledge and vocabulary that will enable them to succeed. If we truly want to fix our education system and unlock the potential of our neediest children we have no choice but to pay attention.;

"Right Hand of Command; With thorough scholarship Jones presents an enlightening view of the use of personal staffs by four general officers during the Civil War. The author attempts to correct the paucity of information on the functioning of Civil War staffs with this well-presented historical study. Focusing on the personal staffs of Generals McClellan Lee Sherman and Grant Jones reveals that no one appreciated the amount of staff work required to run a large complex army efficiently in the field. Armies were just too big for one commander to handle all the administrative logistical and operational details himself. Civil War armies required a 'corporate nature of leadership ' says Jones with a personal staff complementing the efforts of the commander. He finds that McClellan dithered with his staff as he did with his army Lee's staff was used for little more than record - and housekeeping Sherman's approach was traditional and Grant was the most innovative and demanding of his staff. Jones discusses staff selection training use and relationship to the commander. This book is an informative addition to Civil War history and is recommended for public libraries; ['History'], "

"TWO ESSAYS ON ANALYTICAL PSYCHOLOGY; 2014 Reprint of 1928 Edition. Full facsimile of the original edition. Not reproduced with Optical Recognition Software. This volume has become known as perhaps the best introduction to Jung's work. Historically they mark the end of Jung's intimate association with Freud and sum up his attempt to integrate the psychological schools of Freud and Adler into a comprehensive framework. "Sentimental Journey; 'Love is nothing without feeling. And feeling is still less without love.' Celebrated in its own day as the progenitor of 'a school of sentimental writers' A Sentimental Journey (1768) has outlasted its many imitators because of the humour and mischievous eroticism that inform Mr Yorick's travels. Setting out to journey to France and Italy he gets little further than Lyons but finds much to appreciate in contrast to contemporary travel writers whom Sterne satirizes in the figures of Smelfungus and Mundungus. A master of ambiguity and double entendre Sterne is nevertheless as concerned as his peers with exploring the nature of virtue; unlike other writers of sentimental fiction Sterne insists on the inseparability of desire and feeling. This new edition includes a selection from The Sermons of Mr Yorick which shed light on the concerns of the Journey The Journal to Eliza which records Sterne's feelings as he languishes for the company of Eliza Draper and A Political Romance the satire on a local ecclesiastical squabble that was the catalyst for Sterne's literary career. Bloomberg • Mother Jones At the dawn of World War I a young academic named John Maynard Keynes hastily folded his long legs into the sidecar of his brother-in-law's motorcycle for an odd frantic journey that would change the course of history. Swept away from his placid home at Cambridge University by the currents of the conflict Keynes found himself thrust into the halls of European treasuries to arrange emergency loans and packed off to America to negotiate the terms of economic combat. The terror and anxiety unleashed by the war would transform him from a comfortable obscurity into the most influential and controversial intellectual of his day—a man whose ideas still retain the power to shock in our own time. Keynes was not only an economist but the preeminent anti-authoritarian thinker of the twentieth century one who devoted his life to the belief that art and ideas could conquer war and deprivation. As a moral philosopher political theorist and statesman Keynes led an extraordinary life that took him from intimate turn-of-the-century parties in London's riotous Bloomsbury art scene to the fevered negotiations in Paris that shaped the Treaty of Versailles from stock market crashes on two continents to diplomatic breakthroughs in the

mountains of New Hampshire to wartime ballet openings at London's extravagant Covent Garden. Along the way Keynes reinvented Enlightenment liberalism to meet the harrowing crises of the twentieth century. In the United States his ideas became the foundation of a burgeoning economics profession but they also became a flash point in the broader political struggle of the Cold War as Keynesian acolytes faced off against conservatives in an intellectual battle for the future of the country—and the world. Though many Keynesian ideas survived the struggle much of the project to which he devoted his life was lost. In this riveting biography veteran journalist Zachary D. Carter unearths the lost legacy of one of history's most fascinating minds. The Price of Peace revives a forgotten set of ideas about democracy money and the good life with transformative implications for today's debates over inequality and the power politics that shape the global order. But was Troy an actual place or just a legend of Homer's epic? It took the most unlikely of people Heinrich Schliemann--a grocer's-apprentice turned self-made archaeologist courageous and driven--to solve one of the greatest puzzles in history. His extraordinary discovery of the ruins of fabled Troy and the magnificent treasure of King Priam anointed Schliemann as the 'father of pre-history' but was also beset by controversy that persists to this day. The fate of the treasure itself is no less troubled. In 1945 it was spirited out of Berlin by the Red Army to be hidden for 50 years in the vaults of the Pushkin Museum until the breakup of the Soviet Union. "The Fabric of the Cosmos: Space Time and the Texture of Reality; From Brian Greene one of the world's leading physicists and author of the Pulitzer Prize finalist The Elegant Universe comes a grand tour of the universe that makes us look at reality in a completely different way. Could the universe exist without space and time? Can we travel to the past? Greene has set himself a daunting task: to explain non-intuitive mathematical concepts like String Theory the Heisenberg Uncertainty Principle and Inflationary Cosmology with analogies drawn from common experience. From Newton's unchanging realm in which space and time are absolute to Einstein's fluid conception of spacetime to quantum mechanics' entangled arena where vastly distant objects can instantaneously coordinate their behavior Greene takes us all regardless of our scientific backgrounds on an irresistible and revelatory journey to the new layers of reality that modern physics has discovered lying just beneath the surface of our everyday world.; ['Science'], "

"Big Gifts For Small Groups: A 1-hour Board Member's Guide To Securing Gifts Of \$500 To \$5000; If yours is among the tens of thousands of organizations for whom six- and seven-figure gifts are unattainable then Andy Robinson's' new book Big Gifts for Small Groups is just the ticket for you and your board.The subtitle A Board Member's 1-Hour Guide to Securing Gifts of \$500 to \$5000 says it all. Robinson is the straightest of shooters ? a sort of John McCain of fundraising. There literally isn't one piece of advice in this book that's glib or inauthentic. It has all been earned. But then again what would you expect from a fellow who first won his stripes as door to door canvasser making 10000 pitches on 10000 doorsteps.As a result of Robinson's 'no bull' style board members will take immediately to Big Gifts for Small Groups confident the author isn't slinging unrealistic bromides.They'll learn everything they need to know from this one-hour read: how to get ready for the campaign who to approach where to find them; where to conduct the meeting what to bring with you how to ask how to make it easy for the donor to give what to do once you have the commitment ? even how to convey your thanks in a memorable way.Believing that other books already focus on higher sum gifts the author smartly targets a range that has been neglected: \$500 to \$5000. Why? Here's what Robinson says:o They're large enough to justify the time it takes to develop a prospect list prepare a letter follow up with a phone call and visit the prospective donor.o They're small enough to include a wide range of prospects. o They're both modest enough to seem feasible to the novice but also ambitious enough to make it worth their while.o Taken in the context of a major gifts campaign with a team of solicitors working together gifts of \$500 to \$5000 can add up to a lot of money.Robinson has a penchant for good writing and for using exactly the right example or anecdote to illustrate his point. But more importantly he lets his no-nonsense personality shine through. The result being that by the end of the book your board members just may turn to one another and say ""Hey we can do this"" ? and mean it.; ['Business & Economics'], "

"The Dance of the Rose and the Nightingale (Gender Culture and Politics in the Middle East); This is an extraordinary autobiography of a young

girl growing up in Iran. The daughter of an English Christian mother and an Iranian Zoroastrian father Nesta Ramazani sketches her personal life story against the backdrop of a society marked by the fusion of Iranian Islamic and Western cultures and by the efforts of an authoritarian state to force modernization on a traditional society. Within this multicultural tapestry of personal cultural and national life the author portrays how she came to love Persian and Western music poetry and dance. But translating this love into practice seemed an insurmountable task until an American woman pioneered the establishment of the first indigenous Iranian ballet company. As a member of this troupe the author violated convention performing first in her native land and then traveling abroad to exhibit this beautiful synthesis of Persian/Western forms to foreign audiences. The significance of this work transcends an autobiography penned by an Iranian woman—still a taboo in traditional Iranian society—it is a unique microcosm of today's universal quest for a dialogue among civilizations. Ramazani's story will appeal not only to students of Iran the Middle East and women's studies but also to general readers.; ['Biography & Autobiography'], "

"Constructivism and the Technology of Instruction: A Conversation; This book is about the implications of constructivism for instructional design practices and more importantly it is about a dialogue between instructional developers and learning theorists. Working with colleagues in each discipline the editors were amazed to find a general lack of familiarity with each others' work. From an instructional design perspective it seems that the practice of instructional design must be based on some conception of how people learn and what it means to learn. From a learning theory perspective it seems obvious that the value of learning theory rests in the ability to predict the impact of alternative learning environments or instructional practices on what is learned. Thus the interchange of ideas between these disciplines is essential. As a consequence of both the information rich environment and the technological capability business is seen moving away from a fixed curriculum and toward providing information and instruction when it is needed. These changes bring about a window of opportunity establishing a dialogue that will provide for a richer understanding of learning and the instructional environment required to achieve that learning. The editors hope that this book is the beginning of the conversation and that it will serve to spur continued conversation between those involved in learning theory and those involved in the design of instruction.; ['Education'], "

Games of Venus the first comprehensive anthology in English of ancient Greek and Roman erotic verse revives this tradition for the modern reader. It presents the whole spectrum of erotic poetry from Sappho to Ovid in translations which evoke the full range of styles and tones present in the original Greek and Latin. "Variational Problems in Geometry (Translations of Mathematical Monographs); A minimal length curve joining two points in a surface is called a geodesic. One may trace the origin of the problem of finding geodesics back to the birth of calculus. Many contemporary mathematical problems as in the case of geodesics may be formulated as variational problems in surfaces or in a more generalized form on manifolds. One may characterize geometric variational problems as a field of mathematics that studies global aspects of variational problems relevant in the geometry and topology of manifolds. For example the problem of finding a surface of minimal area spanning a given frame of wire originally appeared as a mathematical model for soap films. It has also been actively investigated as a geometric variational problem. With recent developments in computer graphics totally new aspects of the study on the subject have begun to emerge. This book is intended to be an introduction to some of the fundamental questions and results in geometric variational

problems studying variational problems on the length of curves and the energy of maps. The first two chapters treat variational problems of the length and energy of curves in Riemannian manifolds with an in-depth discussion of the existence and properties of geodesics viewed as solutions to variational problems. In addition a special emphasis is placed on the facts that concepts of connection and covariant differentiation are naturally induced from the formula for the first variation in this problem and that the notion of curvature is obtained from the formula for the second variation. The last two chapters treat the variational problem on the energy of maps between two Riemannian manifolds and its solution harmonic maps. The concept of a harmonic map includes geodesics and minimal submanifolds as examples. Its existence and properties have successfully been applied to various problems in geometry and topology. The author discusses in detail the existence theorem of Eells-Sampson which is considered to be the most fundamental among existence theorems for harmonic maps. The proof uses the inverse function theorem for Banach spaces. It is presented to be as self-contained as possible for easy reading. Each chapter may be read independently with minimal preparation for covariant differentiation and curvature on manifolds. The first two chapters provide readers with basic knowledge of Riemannian manifolds. Prerequisites for reading this book include elementary facts in the theory of manifolds and functional analysis which are included in the form of appendices. Exercises are given at the end of each chapter. This is the English translation of a book originally published in Japanese. It is an outgrowth of lectures delivered at Tohoku University and at the Summer Graduate Program held at the Institute for Mathematics and its Applications at the University of Minnesota. It would make a suitable textbook for advanced undergraduates and graduate students. This item will also be of interest to those working in analysis.; ['Mathematics'], "

"Some Questions About Language: A Theory of Human Discourse and Its Objects; How do meaningless marks and sounds become the meaningful words of a natural language? To what do words having referential significance refer? What is the meaning of the words that do not have referential significance? Can ordinary language really do what it appears to do or is this an illusion? Dr. Adler maintains that these fundamental questions are not satisfactorily treated in the two main philosophies of language that have dominated twentieth-century thinking on the subject - the syntactical and 'ordinary language' approaches. Drawing upon the tradition of Aristotle Aquinas Poinsot and Husserl Dr. Adler's own discussion exemplifies the third approach which he describes as

""semantic and lexical." In this now -classic work the fruit of more than 50 years' concern with the philosophy of language Dr. Adler advances a powerful theory of meaning and applies it to some outstanding philosophical problems. In unpretentious and uncluttered prose he provides a limpid introduction to a number of knotty philosophical issues and at the same time issues a challenge to some of the most tenacious doctrines of the modern world.; ['Language Arts & Disciplines'], "

"The John Deere Story: A Biography of Plowmakers John and Charles Deere; Today John Deere is remembered—some say mistakenly—as the inventor of the steel plow. Who was this legendary man and how did he create the internationally renowned company that still bears his name? He began as a debt-stricken blacksmith who fleeing debt in New England in the 1830s set up shop in a little town on the Illinois frontier. There in response to farmers' struggles he designed a new plow that cut through the impervious prairie sod and lay open the rich heavy soil for planting. The demand for his polished steel plow convinced him to specialize in farm implements. In the decades before the Civil War John Deere envisioned a company supplying midwestern farmers with reliable affordable equipment. He used only high quality imported steel and resisted pressure to raise prices. At the same time he won respectful affection from his employees by working alongside them on the shop floor. Upon taking the helm in the 1860s John's only surviving son Charles expanded the Moline factories to increase production started branch houses in major midwestern cities to speed distribution and began to transform the company into a modern corporation. The transformation didn't come without difficulties however: Charles found himself battling the Grange facing threats of labor unions and strikes led by his own employees and enduring patent suits and blatant thefts of product designs and advertising.; ['Biography & Autobiography'], "

"Conversations with Isaiah Berlin: Recollections of an Historian of Ideas; As the essays in this collection make plain Isaiah Berlin invented neither the term ""Counter-Enlightenment"" nor the concept. However more than any other figure since the eighteenth century Berlin appropriated the term made it the heart of his own political thought and imbued his interpretations of particular thinkers with its meanings and significance. His diverse treatment of writers at the margins of the Enlightenment who themselves reflected upon what they took to be its central currents were at once historical and philosophical. Berlin sought to show that our patterns of culture manufactured by ourselves must be explained differently from the ways in which we seek to fathom laws of nature. Many of the essays in this volume were prepared for the International Seminar in memory of Sir Isaiah Berlin held at the School of History in Tel Aviv University during the academic year 1999-2000.; ['Philosophy'], "

From the bullied child to the new parent from the pensioner who has outlived friends and family members to teenagers who manage their social lives through the glow of a mobile phone it can - and does - affect anyone and everyone irrespective of age race or class. Many suffer in silence convinced it's a confession too far a sign of too much vulnerability a shameful failing. But the human condition is not a failing. What's it like when loneliness descends? How does it announce itself and how do you recognise it? Do you discuss it or conceal it? From where can you seek help? A Life Less Lonely shares stories of loneliness and social isolation and looks for ways in which we can help one another to future-proof ourselves against this most insidious affliction. By talking to those who suffer from it and by highlighting the work of those who fight to combat it the book offers guidance on how to spot the symptoms in yourself and in others how to connect with those around you and how by understanding it all better we might just set ourselves free from it. "Solidarity and Difference: A Contemporary Reading of Paul's Ethics; David G. Horrell presents a study of Pauline ethics examining how Paul's moral discourse envisages and constructs communities in which there is a strong sense of solidarity but also legitimate difference in various aspects of ethical practice. "Laughter. An essay on the meaning of the comic.; 2014 Reprint of Original 1912 Edition. Exact facsimile of the original edition not reproduced with Optical Recognition Software. ""Laughter"" is a collection of three essays by French philosopher Henri Bergson first published in 1900. In a short introduction Bergson announces that he will try to define the comic but he does not want to give a rigid definition of the word; he wants to deal with the comic as part of human life. His ambition is also to have a better knowledge of society of the functioning of human imagination and of collective imagination but also of art and life. Bergson begins to note three facts on the comic: 1] the comic is strictly a human phenomenon. A landscape cannot be a source of laughter and when humans make fun of animals it is often because they recognize some human behavior in them. Man is not only a being that can laugh but also a being that is a source of laughter. 2] laughter requires an indifference a detachment from sensibility and emotion: 3] it is more difficult to laugh when one is fully aware of the seriousness of a situation. It is difficult to laugh alone it is easier to laugh collectively. One who is excluded from a group of people does not laugh with them there is often a complicity in laughter. Thus the comic is not a mere pleasure of the intellect it is a human and social activity it has a social meaning.; ['Humor'], "

"The People's State: East German Society from Hitler to Honecker; What was life really like for East Germans effectively imprisoned behind the Iron Curtain? The headline stories of Cold War spies and surveillance by the secret police of political repression and corruption do not tell the

whole story. After the unification of Germany in 1990 many East Germans remembered their lives as interesting varied and full of educational career and leisure opportunities: in many ways "perfectly ordinary lives." Using the rich resources of the newly-opened GDR archives Mary Fulbrook investigates these conflicting narratives. She explores the transformation of East German society from the ruins of Hitler's Third Reich to a modernizing industrial state. She examines changing conceptions of normality within an authoritarian political system and provides extraordinary insights into the ways in which individuals perceived their rights and actively sought to shape their own lives.

Replacing the simplistic black-and-white concept of "totalitarianism" by the notion of a "participatory dictatorship" this book seeks to reinstate the East German people as actors in their own history.; ['History'],

"Swordfish: The Story of the Taranto Raid; More than a year before the attack on Pearl Harbor aircraft of the Royal Navy's Fleet Air Arm executed a surprise attack on ships of the Italian Fleet anchored in the harbor of Taranto. The raid on Taranto anticipated the attack on Pearl Harbor and historians have seen it as a precursor to the larger and more devastating strike by the Imperial Japanese Navy. The Taranto raid takes on added significance with the little-known fact that an officer in the US Navy was aboard the British aircraft carrier and reported extensively on the attack to the Office of Naval Intelligence in Washington. For the first time this book tells the entire story of Taranto and its relevance to Pearl Harbor. The book describes the attack in detail and clears up mistakes and misconceptions that appeared in previous publications. The damage was done by 21 planes flown off the deck of HMS Illustrious

without any participation of the Royal Air Force. Illustrious took to sea the radar and aircraft control procedures that helped win the Battle of Britain. From British sources the book describes the techniques used to allow successful use of aerial torpedoes in the shallow waters of Taranto harbor. "Wit & Wisdom of Jane Austen; Winner of the 1999 Pulitzer Prize for Drama the New York Drama Critics Circle Award the Drama Desk Award the Outer Critics Circle Award the Lucille Lortel Award and the Oppenheimer Award Margaret Edson's powerfully imagined Pulitzer Prize-winning play examines what makes life worth living through her exploration of one of existence's unifying experiences—mortality—while she also probes the vital importance of human relationships. What we as her audience take away from this remarkable drama is a keener sense that while death is real and unavoidable our lives are ours to cherish or throw away—a lesson that can be both uplifting and redemptive. As the playwright herself puts it ""The play is not about doctors or even about cancer. It's about kindness but it shows arrogance. It's about compassion but it shows insensitivity." In Wit Edson delves into timeless questions with no final answers: How should we live our lives knowing that we will die? Is the way we live our lives and interact with others more important than what we achieve materially professionally or intellectually? How does language figure into our lives? Can science and art help us conquer death or our fear of it? What will seem most important to each of us about life as that life comes to an end? The immediacy of the presentation and the clarity and elegance of Edson's writing make this sophisticated multilayered play accessible to almost any interested reader. As the play begins Vivian Bearing a renowned professor of English who has spent years studying and teaching the intricate difficult Holy Sonnets of the seventeenth-century poet John Donne is diagnosed with advanced ovarian cancer. Confident of her ability to stay in control of events she brings to her illness the same intensely rational and painstakingly methodical approach that has guided her stellar academic career. But as her disease and its excruciatingly painful treatment inexorably progress she begins to question the single-minded values and standards that have always directed her finally coming to understand the aspects of life that make it truly worth living.; ['Drama'], "

"The Essence of Chaos; The study of chaotic systems has become a major scientific pursuit in recent years shedding light on the apparently random behaviour observed in fields as diverse as climatology and mechanics. In The Essence of Chaos Edward Lorenz one of the founding fathers of Chaos and the originator of its seminal concept of the Butterfly Effect presents his own landscape of our current understanding of the field. Lorenz presents everyday examples of chaotic behaviour such as the toss of a coin the pinball's path the fall of a leaf and explains in elementary mathematical terms how their essentially chaotic nature can be understood. His principal example involved the construction of a model of a board sliding down a ski slope. Through this model Lorenz illustrates chaotic phenomena and the related concepts of bifurcation and strange attractors. He also provides the context in which chaos can be related to the similarly emergent fields of nonlinearity complexity and fractals. As an early pioneer of chaos Lorenz also provides his own story of the human endeavour in developing this new field. He describes his initial encounters with chaos through his study of climate and introduces many of the personalities who contributed early breakthroughs. His seminal paper ""Does the Flap of a Butterfly's Wing in Brazil Set Off a Tornado in Texas?"" is published for the first time.; ['Science'], "

""Untamed will liberate women--emotionally spiritually and physically. It is phenomenal.""-Elizabeth Gilbert author of City of Girls and Eat Pray Love This is how you find yourself. There is a voice of longing inside each woman. We strive so mightily to be good: good partners daughters mothers employees and friends. We hope all this striving will make us feel alive. Instead it leaves us feeling weary

stuck overwhelmed and underwhelmed. We look at our lives and wonder: Wasn't it all supposed to be more beautiful than this? We quickly silence that question telling ourselves to be grateful hiding our discontent-- even from ourselves. For many years Glennon Doyle denied her own discontent. Then while speaking at a conference she looked at a woman across the room and fell instantly in love. Three words flooded her mind: There She Is. At first Glennon assumed these words came to her from on high. But she soon realized they had come to her from within. This was her own voice--the one she had buried beneath decades of numbing addictions cultural conditioning and institutional allegiances. This was the voice of the girl she had been before the world told her who to be. Glennon decided to quit abandoning herself and to instead abandon the world's expectations of her. She quit being good so she could be free. She quit pleasing and started living. Soulful and uproarious forceful and tender Untamed is both an intimate memoir and a galvanizing wake-up call. It is the story of how one woman learned that a responsible mother is not one who slowly dies for her children but one who shows them how to fully live. It is the story of navigating divorce forming a new blended family and discovering that the brokenness or wholeness of a family depends not on its structure but on each member's ability to bring her full self to the table. And it is the story of how each of us can begin to trust ourselves enough to set boundaries make peace with our bodies honor our anger and heartbreak and unleash our truest wildest instincts so that we become women who can finally look at ourselves and say: There She Is. Untamed shows us how to be brave. As Glennon insists: The braver we are the luckier we get.; ['Biography & Autobiography'], "

"The Oresteian Trilogy; In the Oresteia Aeschylus addressed the bloody chain of murder and revenge within the royal family of Argos. As they move from darkness to light from rage to self-governance from primitive ritual to civilized institution their spirit of struggle and regeneration becomes an everlasting song of celebration. In Agamemnon a king's decision to sacrifice his daughter and turn the tide of war inflicts lasting damage on his family culminating in a terrible act of retribution; The Libation Bearers deals with the aftermath of Clytemnestra's regicide as her son Orestes sets out to avenge his father's death; and in The Eumenides Orestes is tormented by supernatural powers that can never be appeased. Forming an elegant and subtle discourse on the emergence of Athenian democracy out of a period of chaos and destruction The Oresteia is a compelling tragedy of the tensions between our obligations to our families and the laws that bind us together as a society. "The Rawhide Knot And Other Stories; The powerful story-telling voice that has carried so many readers back into the world of the American frontier is heard again in these eight tales of pioneers and pioneer days by the author of The Sea of Grass The Light in the Forest The Waters of Kronos and The Town. Each story captures the force and sweep of our past in all its fierce reality bringing us the strong vigorous unforgettable men and women of a simpler harsher more heroic time. The title story gives the collection its unifying theme that of the frontier marriage the "rawhide knot"—the couple bound together by the rough exigencies of pioneer life. A young girl Sayward Hewett has walked with her family from

Pennsylvania to a settlement in the Ohio wilderness and she is afraid of nothing. One night the men of the settlement—drunk bent on real devilment hardly less wild after a day's carousing than the panthers lurking just beyond the handful of log cabins—decide to "hatch up a marryin'" between an old maid and a shy outcast book-learned young lawyer from back East. But the girl Sayward facing the whole lot of them determined that she will marry their scapegoat bridegroom wins her own victory. In "Smoke Over the Prairie" a marriage seems to presage—indeed to precipitate—the downfall of a great baron of the Old West. In "Early Americana" and eighteen-year-old boy trapped in a Comanche uprising finds himself ambushed by love. In all of these stories love and violence are yoked together by the challenge of life on the frontier. Here is the physical and emotional landscape of that world with its vast spaces its elemental struggles its quality both of legend and of history brought to us with the power and breadth that have given Conrad Richter's work its enduring place in American fiction.; ['Fiction'], "

"How to catch shellfish! (A Saltire how/2 book); Scots like to smoke or salt them. The Dutch love them raw. Swedes look on with relish as they open bulging foul-smelling cans to find them curdling within. Jamaicans prefer them with a dash of chilli pepper. Germans and the English enjoy their taste best when accompanied by pickle's bite and brine. Throughout the long centuries men have fished around their coastlines and beyond the herring has done much to shape both human taste and history. Men have co-operated and come into conflict over its shoals setting out in boats to catch them straying too from their home ports to bring full nets to shore. Women have also often been at the centre of the industry gutting and salting the catch when the annual harvest had taken place knitting too the garments fishermen wore to protect them from the ocean's chill. Following a journey from the western edge of Norway to the east of England from Shetland and the Outer Hebrides to the fishing ports of the Baltic coast of Germany and the Netherlands culminating in a visit to Iceland's Herring Era Museum Donald S. Murray has stitched together tales of the fish that was of central importance to the lives of our ancestors noting how both it - and those involved in their capture - were celebrated in the art literature craft music and folklore of life in northern Europe. "A Stranger's Desire; In this wholly original work of film criticism David Thomson celebrated author of The Biographical Dictionary of Film probes the many ways in which sexuality has shaped the movies--and the ways in which the movies have shaped sexuality. "Who Set You Flowin'? The African-American Migration Narrative (Race and American Culture); Twentieth-century America has witnessed the most widespread and sustained movement of African-Americans from the South to urban centers in the North. Who Set You Flowin'? examines the impact of this dislocation and urbanization identifying the resulting Migration Narratives as a major genre in African-American cultural production.

Griffin takes an interdisciplinary approach with readings of several literary texts migrant correspondence painting photography rap music blues and rhythm and blues. From these various sources Griffin isolates the tropes of Ancestor Stranger and Safe Space which though common to all Migration Narratives vary in their portrayal. She argues that the emergence of a dominant portrayal of these tropes is the product of the historical and political moment often challenged by alternative portrayals in other texts or artistic forms as well as intra-textually.

Richard Wright's bleak yet cosmopolitan portraits were countered by Dorothy West's longing for Black Southern communities. Ralph Ellison while continuing Wright's vision reexamined the significance of Black Southern culture. Griffin concludes with Toni Morrison embracing the South ""as a site of African-American history and culture"" ""a place to be redeemed.""; ['Literary Criticism'], "

Despite this many practitioners have avoided quaternions because of the mathematics used to understand them hoping that some day a more intuitive description will be available. The wait is over. Andrew Hanson's new book is a fresh perspective on quaternions. The first part of the book focuses on visualizing quaternions to provide the intuition necessary to use them and includes many illustrative examples to motivate why they are important—a beautiful introduction to those wanting to explore quaternions unencumbered by their mathematical aspects. The second part covers the all-important advanced applications including quaternion curves surfaces and volumes. Finally for those wanting the full story of the mathematics behind quaternions there is a gentle introduction to their four-dimensional nature and to Clifford Algebras the all-encompassing framework for vectors and quaternions. Richly illustrated introduction for the developer scientist engineer or student in computer graphics visualization or entertainment computing. Covers both non-mathematical and mathematical approaches to quaternions.;

"No Toquen El Gato/Touch Not the Cat (Spanish Edition); The poet Langston Hughes was a tireless world traveler and a prolific translator editor and marketer. Translations of his own writings traveled even more widely than he did earning him adulation throughout Europe Asia and especially the Americas. In The Worlds of Langston Hughes Vera Kutzinski contends that for writers who are part of the African diaspora translation is more than just a literary practice: it is a fact of life and a way of thinking. Focusing on Hughes's autobiographies translations of his poetry his own translations and the political lyrics that brought him to the attention of the infamous McCarthy Committee she shows that translating and being translated—and often mistranslated—are as vital to Hughes's own poetics as they are to understanding the historical network of cultural relations known as literary modernism. As Kutzinski maps the trajectory of Hughes's writings across Europe and the Americas we see the remarkable extent to which the translations of his poetry were in conversation with the work of other modernist writers. Kutzinski spotlights cities whose role as meeting places for modernists from all over the world has yet to be fully

explored: Madrid Havana Buenos Aires Mexico City and of course Harlem. The result is a fresh look at Hughes not as a solitary author who wrote in a single language but as an international figure at the heart of a global intellectual and artistic formation.; ['Literary Criticism'], "

"Jonah: A New Translation with Introduction Commentary and Interpretation (Anchor Bible); Were Jonah's experiences true to the history of ancient Israel? Were they meant to be read comically philosophically allegorically symbolically or realistically? And is God godly when acting beyond the comprehension of prophets let alone ordinary human beings? These issues and many more are thoughtfully considered in this meticulously detailed and insightful translation of the original Hebrew text of Jonah as created by Jewish authorities during the second half of the first millennium B.C.E. In these profound and enduring tales realistic events and miraculous incidents merge and we never have to wait long to witness the power of God's love or wrath. One of the twelve prophets Jonah faced more challenges in a short span of time than any other biblical hero. He went to sea and nearly drowned in the belly of a great fish. On land Jonah journeyed east to Nineveh where his mission was to spread the word of God in a city plagued by evil. He was tested by God at every turn. But even during his darkest hours his faith never wavered and through all the tumult he always listened for the comforting voice of the Lord. Author Jack M. Sasson employs the very latest information in biblical scholarship to interpret the many nuances in Jonah's seemingly simple story. Providing Greek Hebrew Latin Aramaic and occasionally Syriac and Arabic translations this work is an exciting addition to the world-acclaimed Anchor Bible commentaries.; ['Religion'], "

"Why Americans Still Don't Vote: And Why Politicians Want It That Way (New Democracy Forum); Americans take for granted that ours is the very model of a democracy. At the core of this belief is the assumption that the right to vote is firmly established. But in fact the United States is the only major democratic nation in which the less well-off the young and minorities are substantially underrepresented in the electorate. Frances Fox Piven and Richard A. Cloward were key players in the long battle to reform voter registration laws that finally resulted in the National Voter Registration Act of 1993 (also known as the Motor Voter law). When Why Americans Don't Vote was first published in 1988 this battle was still raging and their book was a fiery salvo. It demonstrated that the twentieth century had witnessed a concerted effort to restrict voting by immigrants and blacks through a combination of poll taxes literacy tests and unwieldy voter registration requirements. Why Americans Still Don't Vote brings the story up to the present. Analyzing the results of voter registration reform and drawing compelling historical parallels Piven and Cloward reveal why neither of the major parties has tried to appeal to the interests of the newly registered-and thus why Americans still don't vote.; ['Political Science'], "

"The Book of Revelation: A Study of Christ in You the Hope of Glory; Volume 2 is a continuation of our study on the Book of Revelation as pertained to who we are today in Christ Jesus. It was never meant to be a book full of tormenting fear that would cause us to want to leave this world but through the mind of Christ we have access to our heavenly inheritance to live in our Christ identity today. The Bible is a book written by God and the formation of His family. When we believe and understand the revelation of Christ already in us we are shaped into His image so that when others see us they see their Heavenly Father. When Jesus said "It is finished" was he just making a way for personal salvation with God or was there a bigger picture? Have death and the judgment seat been appeased or is there something more that we are

required to do? John 14:12 says "Verily verily I say unto you he that believeth on me the works that I do shall he do also; and greater works than these shall he do; because I go unto my Father." For over two thousand years the body of Christ has been like kings and lords hiding in a cave waiting for a someday when they get to heaven to receive their inheritance as a son of God. When Jesus died he gave us the ram's horn to declare that our jubilee is here now for us to receive. This book continues with the Holy Spirit's instructions for our spiritual process that must take place individually and then corporately in each child of God to walk in the authority and power as His son. What He created in spirit must come forth in the flesh with His image and likeness. We must know in our heart that we are an offspring; a portion of the original.; ['Religion'], "

"Dogen Kigen Mystical Realist; Eihei Dogen the founder of the Japanese branch of the Soto Zen Buddhist school is considered one of the world's most remarkable religious philosophers. Eihei Dogen: Mystical Realist is a comprehensive introduction to the genius of this brilliant thinker. This thirteenth-century figure has much to teach us all and the questions that drove him have always been at the heart of Buddhist practice. At the age of seven in 1207 Dogen lost his mother who at her death earnestly asked him to become a monastic to seek the truth of Buddhism. We are told that in the midst of profound grief Dogen experienced the impermanence of all things as he watched the incense smoke ascending at his mother's funeral service. This left an indelible impression upon the young Dogen; later he would emphasize time and again the intimate relationship between the desire for enlightenment and the awareness of impermanence. His way of life would not be a sentimental flight from but a compassionate understanding of the intolerable reality of existence. At age 13 Dogen received ordination at Mt. Hiei. And yet a question arose: ""As I study both the exoteric and the esoteric schools of Buddhism they maintain that human beings are endowed with Dharma-nature by birth. If this is the case why did the buddhas of all ages - undoubtedly in possession of enlightenment - find it necessary to seek enlightenment and engage in spiritual practice?"" When it became clear that no one on Mt. Hiei could give a satisfactory answer to this spiritual problem he sought elsewhere eventually making the treacherous journey to China. This was the true beginning of a life of relentless questioning practice and teaching - an immensely inspiring contribution to the Buddhadharma. As you might imagine a book as ambitious as Eihei Dogen: Mystical Realist has to be both academically rigorous and eminently readable to succeed. "Leonardo to the Internet: Technology and Culture from the Renaissance to the Present (Johns Hopkins Studies in the History of Technology); Historian Thomas J. "Lily's In London?! (Young Women of Faith Lily 13); In Religious Experience and the New Woman Joanna Dean traces the development of liberal spirituality in the early 20th century through the life and work of Lily Dougall (1858--1923) a New Woman novelist who became known as a religious essayist and Anglican modernist. Dean examines the connections between Dougall's marginal position as a woman intellectual and her experiential combatively iconoclastic theology and demonstrates that through her writing and mentoring Dougall contributed to the shaping of modern spirituality. Lily Dougall described religious experience -- the sense of the presence of God -- as the ""rock"" of her theology. Dean observes the protean nature of this rock as Dougall moved from a submissive holiness faith to a mystical Mauricean sense of the Kingdom of God to the relational theology of personal idealism and reveals how psychology which appeared to provide scientific support for her religious beliefs eventually threatened to undermine her experiential faith.;

"A Unified Theory of God Mind & Matter; In the prequel to his best-seller The DaVinci Code Dan Brown narrates the story of a great scientist who tries to unify science with religion by replicating the first moment in natural history known as the ""Big Bang."" That prequel called Angels and Demons is about humanity and its search for suitable answers to the source of our existence and the quandary of our destiny. This book is a non-fiction version of Angels and Demons - only without the angels or the demons. It is a serious and strictly scientific attempt to make sense of all the knowledge acquired by our species during the course of history. In particular this book seeks to reconcile the exciting discoveries of the first part of the Twentieth Century (including relativity and the Big Bang) with the perplexing discoveries of the second half of that troubled century when strange and paradoxical solutions were offered by science (most notably quantum physics and Heisenberg's principle of uncertainty). The conclusions of the book can be summarized by saying that it is an admittedly immodest effort to compile a ""theory of everything.""" Weaving together the theories of humanity's quest for harmonious understanding of nature its origins and its destiny entailed many mysteries; solving those mysteries often required advancing novel ideas. Perhaps the most creative of all is the proposition that the Big Bang produced not just space and time but order as well. This proposition is buttressed by the latest findings in astronomy which suggest that order came quickly to our world as if delivered in a package complete with ribbons and wrapping intended for our appreciation and use. Does that mean that the package was created by omniscient being - the god of theology? The answer to that question is not tackled until the last two chapters. The first eight tackle a more elementary question: whether our species differs from the animals merely in the sense of being a more sophisticated aggregation of organic life as Darwin argued. That view is contrasted to one characterized as Integral Humanism a philosophical framework which offers the opposing argument under which humans are understood to be an unpredictable and wonderful mixture of three distinct dimensions: mind matter and spirit.; ['Body Mind & Spirit'], "

"Peace of Mind; We can't heal with our minds alone. Thinking can be something productive and creative but without integrating body and mind much of our thinking is useless and unproductive. Bringing together ancient wisdom and contemporary thinking Thich Nhat Hanh says it's like hardware and software-if you don't have both you can't do anything. "Variational Object-Oriented Programming Beyond Classes and Inheritance (The Springer International Series in Engineering and Computer Science); Purpose of the Book This book presents an approach to improve the standard object-oriented programming model. The proposal is aimed at supporting a larger range of incremental behavior variations and thus promises to be more effective in mastering the complexity of today's software. The ability of dealing with the evolutionary nature of software is one of main merits of object-oriented data abstraction and inheritance. Object-orientation allows to organize software in a structured way by separating the description of different kinds of an abstract data type into different classes and loosely connecting them by the inheritance hierarchy. Due to this separation the software becomes free of conditional logics previously needed for distinguishing between different kinds of abstractions and can thus more easily be incrementally extended to support new kinds of abstractions. In other words classes and inheritance are means to properly model variations of behavior related to the existence of different kinds of an abstract data type. The support for extensibility and reuse with respect to such kind-specific behavior variations is among the main reasons for the increasing popularity of object-oriented programming in the last two decades. However this popularity does not prevent us from questioning the real effectiveness of current object-oriented techniques in supporting incremental variations. In fact this popularity makes a critical investigation of the variations that can actually be performed incrementally even more important.; ['Computers'],"

"Sexual Subversions: Three French Feminists (Current Books in Women's Studies); Sexual Subversions introduces the works of three well known if not well-read French feminists: Julia Kristeva Luce Irigaray and Mireille Le Doeuff. It provides a map of an area where there are few detailed discussion of the achievements of these difficult yet immensely rewarding writers. In doing so this overview raises issues of general relevance to feminist research: it participates in debates around the nature of feminist theory the relations feminist intellectuals have to male dominated knowledges and the strategies appropriate for developing non patriarchal autonomous or woman-centred knowledges. No book in French feminists would be complete without including the contributions of Kristeva and Irigaray. The inclusion of Le Doeuff's work which brings a different perspective to bear on the question of sexual difference provides a counterbalance to literary appropriations of French feminism by Anglo-American readerships. Kristeva Irigaray and Le Doeuff are the focal points of this study precisely because each highlights the differences of the others revealing the frameworks to which the others are committed. Nevertheless while these writers do not present a common political or theoretical position or form a school each addresses the question of women's autonomy from male definition affirms the sexual specificity of women seeks out a femininity women can use to question the patriarchal norms and ideals of femininity and rejects the preordained positions patriarchy allots to women.; ['Social Science'],"

"A Woman of No Importance Second Edition (New Mermaids); Staged in 1893 when Wilde had already achieved fame wealth and notoriety A Woman of No Importance was another attempt to fuse comedy of manners with high melodrama. Gerald Arbuthnot is a young man on the make with an American heiress and the post of secretary to the brilliant but dissolute Lord Illingworth within his reach. When he asks his mother to celebrate with them it turns out that Illingworth is Gerald's father who seduced and abandoned his mother twenty years earlier. Loyalty weighs heavier than ambition and Gerald declines the association with Illingworth. This edition which also analyses Wilde's various drafts and revisions of the play argues that the playwright here continued to explore the rivalry between an older man and woman for the affection of a beautiful young man.; ['Drama'], "

"Jove Laughs They Say; Jove Laughs They Say: Lewinsky as Text offers an extremely unorthodox approach to the very public and very lengthy

Clinton-Lewinsky scandal. The author argues that analysis of the affair was done by experts in specific and at times completely unrelated fields. As a result of this ineffectual approach the national conversation was reduced to an unintelligible mess. Jove Laughs recommends viewing the scandal through the lens of literary criticism and literary theory rather than the traditional political or legal perspective. The work compares the 'Talking Points' the three page single-spaced set documents that opponents of the Clinton administration held out to be evidence of an organized conspiracy to obstruct justice to the historical 'Casket Letters' which were used in a similar manner to incriminate Mary Queen of Scots; ['History'], "

"Aspects of Wagner; Many music lovers find Wagner's operas inexpressibly beautiful and richly satisfying while others find them revolting dangerous self-indulgent and immoral. The man who W.H. Auden once called perhaps the greatest genius that ever lived has inspired both greater adulation and greater loathing than any other composer. Bryan Magee presents a penetrating analysis of Wagner's work concentrating on how his sensational and deeply erotic music uniquely expresses the repressed and highly charged contents of the psyche. He examines not only Wagner's music and detailed stage directions but also the prose works in which he formulated his ideas as well as shedding new light on his anti-semitism and the way in which the Nazis twisted his theories to suit their own purposes. Outlining the astonishing range and depth of Wagner's influence on our culture Magee reveals how profoundly he continues to shock and inspire musicians poets novelists painters philosophers and politicians today.; ['Biography & Autobiography'],"

"Government by Emergency; ""In the middle decades of the twentieth century in the wake of economic depression war and in the midst of the Cold War an array of technical experts and government officials developed a substantial body of expertise to contain and manage the disruptions to American society caused by unprecedented threats. Today the tools invented by these mid-twentieth century administrative reformers are largely taken for granted assimilated into the everyday workings of government. As Stephen Collier and Andrew Lakoff argue in this book the American government's current practices of disaster management can be traced back to this era. Collier and Lakoff argue that an understanding of the history of this initial formation of the ""emergency state"" is essential to an appreciation of the distinctive ways that the U.S. government deals with crises and emergencies-or fails to deal with them-

today. This book focuses on historical episodes in emergency or disaster planning and management. Some of these episodes are well-known and have often been studied while others are little-remembered today. The significance of these planners and managers is not that they were responsible for momentous technical innovations or that all their schemes were realized successfully. Their true significance lies in the fact that they formulated a way of understanding and governing emergencies that has come to be taken for granted"--; ['Political Science'], "

"Alexandria; Hypatia--brilliant mathematician eloquent Neoplatonist and a woman renowned for her beauty--was brutally murdered by a mob of Christians in Alexandria in 415. She has been a legend ever since. In this engrossing book Maria Dzielska searches behind the legend to bring us the real story of Hypatia's life and death and new insight into her colorful world. Historians and poets Victorian novelists and contemporary feminists have seen Hypatia as a symbol--of the waning of classical culture and freedom of inquiry of the rise of fanatical Christianity or of sexual freedom. Dzielska shows us why versions of Hypatia's legend have served her champions' purposes and how they have distorted the true story. She takes us back to the Alexandria of Hypatia's day with its Library and Museion pagan cults and the pontificate of Saint Cyril thriving Jewish community and vibrant Greek culture and circles of philosophers mathematicians astronomers and militant Christians. Drawing on the letters of Hypatia's most prominent pupil Synesius of Cyrene Dzielska constructs a compelling picture of the young philosopher's disciples and her teaching. "Figures of Speech: 60 Ways To Turn A Phrase; Writing is not like chemical engineering. The figures of speech should not be learned the same way as the periodic table of elements. This is because figures of speech are not about hypothetical structures in things but about real potentialities within language and within ourselves. The ""figurings"" of speech reveal the apparently limitless plasticity of language itself. We are inescapably confronted with the intoxicating possibility that we can make language do for us almost anything we want. Or at least a Shakespeare can. The figures of speech help to see how he does it and how we might. Therefore in the chapters presented in this volume the quotations from Shakespeare the Bible and other sources are not presented to exemplify the definitions. Rather the definitions are presented to lead to the quotations. And the quotations are there to show us how to do with language what we have not done before. They are there for imitation.; ['Language Arts & Disciplines'], "

"Freedom's Port: The African American Community of Baltimore 1790-1860 (Blacks in the New World); Baltimore's African-American population--nearly 27000 strong and more than 90 percent free in 1860--was the largest in the nation at that time. Christopher Phillips's Freedom's Port the first book-length study of an urban black population in the antebellum Upper South chronicles the growth and development of that community. He shows how it grew from a transient aggregate of individuals many fresh from slavery to a strong overwhelmingly free community less wracked by class and intraracial divisions than were other cities. Almost

from the start Phillips states Baltimore's African Americans forged their own freedom and actively defended it--in a state that maintained slavery and whose white leadership came to resent the liberties the city's black people had achieved.; ['Social Science'], "

"Vietnam 1945: The Quest for Power; 1945: the most significant year in the modern history of Vietnam. One thousand years of dynastic politics and monarchist ideology came to an end. Eight decades of French rule lay shattered. Five years of Japanese military occupation ceased. Allied leaders determined that Chinese troops in the north of Indochina and British troops in the South would receive the Japanese surrender. Ho Chi Minh proclaimed the Democratic Republic of Vietnam with himself as president. Drawing on extensive archival research interviews and an examination of published memoirs and documents David G. Marr has written a richly detailed and descriptive analysis of this crucial moment in Vietnamese history. He shows how Vietnam became a vortex of intense international and domestic competition for power and how actions in Washington and Paris as well as Saigon Hanoi and Ho Chi Minh's mountain headquarters interacted and clashed often with surprising results. Marr's book probes the ways in which war and revolution sustain each other tracing a process that will interest political scientists and sociologists as well as historians and Southeast Asia specialists.; ['History'], "

"Child of Venus; The Nebula Award-winning author's "masterful SF trilogy" of human colonists terraforming the second planet from the sun comes to a stunning conclusion (Publishers Weekly). Often compared to Kim Stanley Robinson's acclaimed Mars trilogy the three novels in the Venus saga—

"Sweet Cakes Long Journey: The Chinatowns of Portland Oregon (Scott and Laurie Oki Series in Asian American Studies); Around the turn of the twentieth century and for decades thereafter Oregon had the second largest Chinese population in the United States. In terms of geographical coverage Portland's two Chinatowns (one an urban area of brick commercial structures one a vegetable-gardening community of shanty dwellings) were the largest in all of North America. Marie Rose Wong chronicles the history of Portland's Chinatowns from their early beginnings in the 1850s until the repeal of the Chinese Exclusion Act in the 1940s drawing on exhaustive primary material from the National Archives including more than six thousand individual immigration files census manuscripts letters and newspaper accounts. She examines both the enforcement of Exclusion Laws in the United States and the means by which Chinese immigrants gained illegal entry into the country. The spatial and ethnic makeup of the combined ""Old Chinatown"" afforded much more contact and accommodation between Chinese and non-Chinese people than is usually assumed to have occurred in Portland and than actually may have occurred elsewhere. Sweet Cakes Long Journey explores the contributions that Oregon's leaders and laws had on the development of Chinese American community life and the role that the early Chinese immigrants played in determining their own community destiny and the development of their Chinatown in its urban form and vernacular architectural expression. Sweet Cakes Long Journey is an original and notable addition to the history of Portland and to the field of Asian American studies.; ['Social Science'],"

"Unwanted Company; In the last quarter century the U.S. economy has been transformed by a large inflow of direct investment from abroad. Foreign companies mainly from Europe and Japan have built factories and acquired U.S. firms at an ever-increasing rate. Jonathan Crystal finds inconsistencies in how American businesses have responded to this globalization of production. U.S. firms especially multinationals have

conflicting interests regarding investment protection Crystal shows. Many American firms under siege from overseas competitors have already expended considerable energy in obtaining trade protection but they are competing not only with foreign imports but also with locally established foreign-owned firms. American businesses may favor stricter regulation of foreign companies that threaten their bottom line but they also consider their own interests as global investors subject to retaliatory protection in other countries. Restrictions on ""foreign"" investment it seems are not so attractive when they are imposed by other countries. Unwanted Company examines the different ways in which important U.S. industries (including semiconductors automobiles steel consumer electronics telecommunications and airlines) reacted to this new challenge. It focuses on the political responses of U.S.-owned firms to how Washington ought to regulate foreign direct investment and how it ought to treat foreign-owned firms in the United States. Some industries welcomed (or at least didn't oppose) foreign investment whereas others sought restrictive and discriminatory policies. Crystal demonstrates how the nature of the domestic political environment shapes the translation of economic interests into policy preferences.; ['Political Science'], "

"Why Movements Succeed or Fail; Wyoming became the first American state to adopt female suffrage in 1869--a time when no country permitted women to vote. When the last Swiss canton enfranchised women in 1990 few countries barred women from the polls. Why did pro-suffrage activists in the United States and Switzerland have such varying success? Comparing suffrage campaigns in forty-eight American states and twenty-five Swiss

cantons Lee Ann Banaszak argues that movement tactics beliefs and values are critical in understanding why political movements succeed or fail. The Swiss suffrage movement's beliefs in consensus politics and local autonomy and their reliance on government parties for information limited their tactical choices--often in surprising ways. In comparison the American suffrage movement with its alliances to the abolition temperance and progressive movements overcame beliefs in local autonomy and engaged in a wider array of confrontational tactics in the struggle for the vote. Drawing on interviews with sixty Swiss suffrage activists detailed legislative histories census materials and original archival materials from both countries Banaszak blends qualitative historical inquiry with informative statistical analyses of state and cantonal level data. The book expands our understanding of the role of political opportunities and how they interact with the beliefs and values of movements and the societies they seek to change.; ['Political Science'], "

"Theory & harmony for the contemporary musician; Can Gandhi be considered a systematic thinker? While the significance of Gandhi's thought and life to our times is undeniable it is widely assumed that he did not serve any discipline and cannot be considered a systematic thinker. Despite an overwhelming body of scholarship and literature on his life and thought the presuppositions of Gandhi's experiments the systematic nature of his intervention in modern political theory and his method have not previously received sustained attention. Addressing this lacuna the book contends that Gandhi's critique of modern civilization the presuppositions of post-Enlightenment political theory and their epistemological and metaphysical foundations is both comprehensive and systematic. Gandhi's experiments with truth in the political arena during the Indian Independence movement are studied from the point of view of his conscious engagement with method and theory rather than merely as a personal creed spiritual position or moral commitment. The author shows how Gandhi's experiments are illustrative of his theoretical position and how they form the basis of his opposition to the foundations of modern western political theory and the presuppositions of the modern nation state besides envisioning the foundations of an alternative modernity for India and by its example for the world.; ['Philosophy'], "

"Horrible Prettiness: Burlesque and American Culture (Cultural Studies of the United States); Robert Allen's compelling book examines burlesque not only as popular entertainment but also as a complex and transforming cultural phenomenon. When Lydia Thompson and her controversial female troupe of ""British Blondes"" brought modern burlesque to the United States in 1868 the result was electric. Their impertinent humor streetwise manner and provocative parodies of masculinity brought them enormous popular success--and the condemnation of critics cultural commentators and even women's rights campaigners. Burlesque was a cultural threat Allen argues because it inverted the ""normal"" world of

middle-class social relations and transgressed norms of ""proper"" feminine behavior and appearance. Initially playing to respectable middle-class audiences burlesque was quickly relegated to the shadow-world of working-class male leisure. In this process the burlesque performer ""lost"" her voice as burlesque increasingly revolved around the display of her body. Locating burlesque within the context of both the social transformation of American theater and its patterns of gender representation Allen concludes that burlesque represents a fascinating example of the potential transgressiveness of popular entertainment forms as well as the strategies by which they have been contained and their threats defused.; ['Social Science'], "

"Wiles of War 36 Military Strategems; Stratagems – that is what we call war ruses but also ruses in general. They can decide victory or defeat. We are all familiar with well-known war ruses. Just think of the Greek story of the Trojan horse. These days we think of a ""Trojan horse"" mostly in connection with criminal computer hacking. We then have to ask: ""How does one think up stratagems?"" To do so one must have competency in creative and systemic thinking. This book explains the value and meaning of these ways of thinking for the creation of stratagems. Readers will learn – How to think of the term ""stratagem"" – What kinds of stratagems one might find (e.g. from antiquity the ""Stratagemata"" of Frontin) – What creative and systems thinking is and how it expresses itself in the development of ruses – How one might go about thinking up stratagems This book is meant for everyone who handles social conflict as well as those with an interest in creative and systems thinking.; ['Conflict management'], "

"The Price of Whiteness: Jews Race and American Identity; What has it meant to be Jewish in a nation preoccupied with the categories of black and white? The Price of Whiteness documents the uneasy place Jews have held in America's racial culture since the late nineteenth century. The book traces Jews' often tumultuous encounter with race from the 1870s through World War II when they became vested as part of America's white mainstream and abandoned the practice of describing themselves in racial terms. American Jewish history is often told as a story of quick and successful adaptation but Goldstein demonstrates how the process of identifying as white Americans was an ambivalent one filled with hard choices and conflicting emotions for Jewish immigrants and their children. Jews enjoyed a much greater level of social inclusion than African Americans but their membership in white America was frequently made contingent on their conformity to prevailing racial mores and on the eradication of their perceived racial distinctiveness. While Jews consistently sought acceptance as whites their tendency to express their own group bonds through the language of ""race"" led to deep misgivings about what was required of them. Today despite the great success Jews enjoy in the United States they still struggle with the constraints of America's black-white dichotomy. The Price of Whiteness concludes that while Jews' status as white has opened many doors for them it has also placed limits on their ability to assert themselves as a group apart.; ['History'], "

"Strongman; What modern authoritarian leaders have in common (and how they can be stopped). Ruth Ben-Ghiat is the expert on the ""strongman"" playbook employed by authoritarian demagogues from Mussolini to Putin—enabling her to predict with uncanny accuracy the recent experience in America and Europe. In Strongmen she lays bare the blueprint these leaders have followed over the past 100 years and empowers us to recognize resist and prevent their disastrous rule in the future. For ours is the age of authoritarian rulers: self-proclaimed saviors of the nation who evade accountability while robbing their people of truth treasure and the protections of democracy. They promise law and order then legitimize lawbreaking by financial sexual and other predators. They use masculinity as a symbol of strength and a political weapon. Taking what you want and getting away with it becomes proof of male authority. They use propaganda corruption and violence to stay in power. Vladimir Putin and Mobutu Sese Seko's kleptocracies Augusto Pinochet's torture sites Benito Mussolini and Muammar Gaddafi's systems of sexual exploitation and Silvio Berlusconi and Donald Trump's relentless misinformation: all show how authoritarian rule far from ensuring stability is marked by destructive chaos. No other type of leader is so transparent about prioritizing self-interest over the public good. As one country after another has discovered the strongman is at his worst when true guidance is most needed by his country. Recounting the acts of solidarity and dignity that have undone strongmen over the past 100 years

Ben-Ghiat makes vividly clear that only by seeing the strongman for what he is—and by valuing one another as he is unable to do—can we stop him now and in the future.; ['History'], "

"Story of a Soul: The Autobiography of St. Therese of Lisieux Third Edition; Translated from the critical edition by John Clarke OCD 3rd ed. (1997). Includes Bibliography general Index and 11 photos. Two and a half years before her death in 1897 at the age of 24 as Thérèse Martin began writing down her childhood memories at the request of her blood sisters in the Lisieux Carmel few could have guessed the eventual outcome. Yet this ""story of my soul"" first published in 1898 in a highly edited version quickly became a modern spiritual classic read by millions and translated into dozens of languages around the world. Decades later in response to growing requests from scholars and devotees of the Saint a facsimile edition of the manuscripts appeared along with more popular French editions of what the Saint had actually written. Here expressed with all of Thérèse's original spontaneity and fervor we rediscover the great themes of her spirituality: confidence and love the ""little way"" abandonment to God's merciful love and her ""mission"" in the church and world today. Father John Clarke's acclaimed translation first published in 1975 and now accepted as the standard throughout the English-speaking world is a faithful and unaffected rendering of Thérèse's own words from the original manuscripts. This new edition prepared for the centenary of the Saint's death includes a select bibliography of recent works in English on Thérèse along with a new referencing system now widely used in studies of her doctrine.; ['Religion'], "

"Contrary Investing; David Dreman's name is synonymous with the term ""contrarian investing"" and his contrarian strategies have been proven winners year after year. His techniques have spawned countless imitators most of whom pay lip service to the buzzword ""contrarian"" but few can match his performance. His Kemper-Dreman High Return Fund has been the leader since its inception in 1988 -- the number one equity-income fund among all 208 ranked by Lipper Analytical Services Inc. Dreman is also one of a handful of money managers whose clients have beaten the runaway market over the past five ten and fifteen years. Now as the longest bull market in the history of the stock market winds down there is increasing volatility and a great deal of uncertainty. This is the climate that tests the mettle of the pros the worries of the average investor and the success of David Dreman's brilliant new strategies for the next millennium. Contrarian Investment Strategies: The Next Generation shows investors how to outperform professional money managers and profit from potential Wall Street panics -- all in Dreman's trademark style which The New York Times calls ""witty and clear as a silver bell.""" Dreman reveals a proven systematic and safe way to beat the market by buying stocks of good companies when they are currently out of favor. At the heart of his book is a fundamental psychological insight: investors overreact. Dreman demonstrates how investors consistently overvalue the so-called ""best"" stocks and undervalue the so-called ""worst"" stocks and how earnings and other surprises affect the best and worst stocks in opposite ways. Since surprises are a way of life in the market Dreman shows you how to profit from these surprises with his ingenious new techniques most of which have been developed in the nineties. You'll learn: Why contrarian stocks offer extra protection in bear markets as well as delivering superior returns when the bull roars. Why a high dividend yield is just as important for

the aggressive investor as it is for ""widows and orphans."" Why owning Treasury bills and government bonds -- the ""safest investments"" for centuries -- is like being fully margined at the top of the 1929 market. Why Initial Public Offerings are a guaranteed loser's game. Why you should avoid Nasdaq (""the market of the next hundred years"") like the plague. Why crisis panic and even market downturns are the contrarian investor's best friend. "The women of the Mayflower and women of Plymouth Colony; Ethel J.R.C. Noyes??The Women of the Mayflower and Women of Plymouth Colony?discusses the importance and significance of women in the early settlement and provides a history of their works and accomplishments.?While many books do not mention the role of women in the early Plymouth Colony this volume informs readers of the journey women took to gain freedoms they felt they deserved. Often given the tasks of cooking cleaning and taking care of children women of the Plymouth Colony were usually married and/or with child by the age of 20.?Unlike in Europe these young women at Plymouth had extensive property and legal rights and oftentimes owned and took care of their land homes and families with an absent husband or without one at all. For one of the first times in a civilized society women were able to take part in contracts like prenuptial agreements and even sat on juries.?Today women continue to enjoy these rights and freedoms in the United States and according to Ethel Noyes should thank the mothers of their nation for working hard for them.; ['History'],"

"The Elizabethan stage; Volume IV of a reissue of the E. K. Chambers's seminal four-volume account of the private public and court stages together with other forms of drama and spectacle surviving from earlier times from the beginning of the reign of Elizabeth until the death of Shakespeare. Hailed in its day as a comprehensive compendium of 'practically all the discoverable evidence upon the various parts of the subject collected weighed sorted classified and built up with immense care into a logical and beautiful structure' (New Statesman) the work is still much consulted by today's scholars and historians. From the author's Preface: 'My First Book is devoted to a description perhaps disproportionate of the Elizabethan Court and of the ramifications in pageant and progress tilt and mask of that instinct for spectacular mimesis which the Renaissance inherited from the Middle Ages and of which the drama is itself the most important manifestation. The Second Book gives an account of the settlement of the players in London of their conflict backed by the Court with the tendencies of Puritanism and of the place which they ultimately found in the monarchical polity. To the Third and Fourth belong the more pedestrian task of following in detail the fortunes of the individual playing companies and the individual theatres with such fullness and the available records permit. The Fifth deals with the surviving plays not in their literary aspect which lies outside my plan but as documents helping to throw light upon the history of the institution which produced them.'; ['Performing Arts'],"

"Sea Power; From one of the most admired admirals of his generation -- and the only admiral to serve as Supreme Allied Commander at NATO -- comes a remarkable voyage through all of the world's most important bodies of water providing the story of naval power as a driver of human history and a crucial element in our current geopolitical path. From the time of the Greeks and the Persians clashing in the Mediterranean sea power has determined world power. To an extent that is often underappreciated it still does. No one understands this better than Admiral Jim Stavridis. In Sea Power Admiral Stavridis takes us with him on a tour of the world's oceans from the admiral's chair showing us how the geography of the oceans has shaped the destiny of nations and how naval power has in a real sense made the world we live in today and will shape the world we live in tomorrow. Not least Sea Power is marvelous naval history giving us fresh insight into great naval engagements from the battles of Salamis and Lepanto through to Trafalgar the Battle of the Atlantic and submarine conflicts of the Cold War. It is also a keen-eyed reckoning with the likely sites of our next major naval conflicts particularly the Arctic Ocean Eastern Mediterranean and the South China Sea. Finally Sea Power steps back to take a holistic view of the plagues to our oceans that are best seen that way from piracy to pollution. When most of us look at a globe we focus on the shape of the seven continents. Admiral Stavridis sees the shapes of the seven seas. After reading Sea Power you will too. Not since Alfred Thayer Mahan's legendary The Influence of Sea Power upon History have we had such a powerful reckoning with this vital subject.; ['Political Science'], "

"Hercules My Shipmate; The author of I Claudius puts his own twist on the myth of the Argonauts' quest for the Golden Fleece: "A tour de force . . .

. A richly tapestried epic" (Kirkus Reviews). An inventive reimagining of the story of Jason and the Argonauts this novel by renowned poet and classicist Robert Graves brings heroic figures of Hellenistic myth to life. Graves's Jason is belligerent energetic and full of life and the society Graves builds for him is outlandish and deeply invested in ancient cults. Against this primitive religious backdrop the charismatic Jason assembles a crew and sets out to retrieve the sacred gold-trimmed fleece that is sacred to Zeus and that has been stolen by worshippers of the Triple Goddess. Accompanying him is Hercules a brave warrior known more for his brawn and his astonishingly good luck than his brains. Robert Graves builds a compelling world that sets Hellenistic magic and mystery in a surprisingly gritty realistic setting a fascinating read for fans of Greek mythology. "Summer of the Gun; 2020 J. ANTHONY LUKAS PRIZE WINNER From the bestselling author of *There Are No Children Here* a richly textured heartrending portrait of love and death in Chicago's most turbulent neighborhoods. The numbers are staggering: over the past twenty years in Chicago 14033 people have been killed and another roughly 60000 wounded by gunfire. What does that do to the spirit of individuals and community? Drawing on his decades of experience Alex Kotlowitz set out to chronicle one summer in the city writing about individuals who have emerged from the violence and whose stories capture the capacity--and the breaking point--of the human heart and soul. The result is a spellbinding collection of deeply intimate profiles that upend what we think we know about gun violence in America. Among others we meet a man who as a teenager killed a rival gang member and twenty years later is still trying to come to terms with what he's done; a devoted school social worker struggling with her favorite student who refuses to give evidence in the shooting death of his best friend; the witness to a wrongful police shooting who can't shake what he has seen; and an aging former gang leader who builds a place of refuge for himself and his friends. Applying the close-up empathic reporting that made *There Are No Children Here* a modern classic Kotlowitz offers a piercingly honest portrait of a city in turmoil. These sketches of those left standing will get into your bones. This one summer will stay with you.; ['Social Science'], "

"Baptism in the New Testament (Studies in Biblical Theology First Series); Originally published in 1950 as the first title in the series Studies in Biblical Theology Baptism in the New Testament was welcomed as and has continued ever since to be an invaluable contribution to the debate set afoot by Barth in his booklet The Teaching of the Church Concerning Baptism. 'Here the reader can study the fresh stimulating and constructive researches of one of the great Biblical scholars of Europe into the burning question of the origins of baptism. Dr Cullmann is an ardent protagonist of infant baptism which is the subject of intense debate at the moment. He rightly deplores Barth's attempts to discredit the practice. On the basis of the kinship between circumcision and baptism on the one hand and between the proselyte bath of the Jews and baptism on the other he makes a forceful plea for the spiritual reality and legitimacy of baptizing infants. This is an essay which is packed with profound scriptural analysis; its relevance to current discussion in the Church of England is obvious' (Church Times). 'Of the merits of this

essay there is little need to speak. The author is a well-known expert in matters relating to the origins of Christianity and he has also a fine apprehension of the theological issues involved. He treats his subject under the four heads : the foundation of baptism in the work of Christ; baptism as acceptance into the body of Christ; baptism and faith; and baptism and circumcision ... Not everyone will agree entirely with the author's account of what takes place in baptism but there can be no doubt that he is right in his general stress upon the objective character of this sacrament. We are indebted to him also for useful discussions of various texts and passages of the New Testament. It will be a surprise to some that there is even less New Testament evidence for the adult baptism of the children of believing Christians than there is for their baptism as infants. The linking of baptism with circumcision is very ably done and in an appendix on an early baptismal formula the genuineness of Acts 8.37 is defended and the relevance of Christ's blessing of the children displayed' (The Life of Faith).; ['Religion'], "

"Banking on Reform: Political Parties and Central Bank Independence in the Industrial Democracies (Michigan Studies in International Political Economy); Banking on Reform examines the political determinants of recent reforms to monetary policy institutions in the industrial democracies. With these reforms political parties have sought to draw on the political credibility of an independent central bank to cope with electoral consequences of economic internalization and deindustrialization. New Zealand and Italy made the initial efforts to grant their central banks independence. More recently France Spain Britain and Sweden have reformed their central banks' independence. Additionally members of the European Union have implemented a single currency with an independent European central bank to administer monetary policy. Banking on Reform stresses

the politics surrounding the choice of these institutions specifically the motivations of political parties. Where intraparty conflicts have threatened the party's ability to hold office politicians have adopted an independent central bank. Where political parties have been secluded from the political consequences of economic change reform has been thwarted or delayed. The drive toward a single currency also reflects these political concerns. By delegating monetary policy to the European level politicians in the member states removed a potentially divisive issue from the domestic political agenda allowing parties to rebuild their support constructed on the basis of other issues. William T. Bernhard provides a variety of evidence to support his argument such as in-depth case accounts of recent central bank reforms in Italy and Britain the role of the German Bundesbank in the policy process and the adoption of the single currency in Europe. Additionally he utilizes quantitative and statistical tests to enhance his argument. This book will appeal to political scientists economists and other social scientists interested in the political and institutional consequences of economic globalization.

"The Power of Beauty: Men Women and Sex Appeal Since Feminism; In 2010 pioneering sociologist Catherine Hakim shocked the world with a provocative new theory: In addition to the three recognized personal assets (economic cultural and social capital) each individual has a fourth asset—erotic capital—that he or she can and should use to advance within society. In this bold and controversial book Hakim explores the applications and significance of erotic capital challenging the disapproval meted out to women and men who use sex appeal to get ahead in life. Social scientists have paid little serious attention to these modes of personal empowerment despite overwhelming evidence of their importance. "Shades of Gray (Steeple Hill Women's Fiction #32); This book focuses on the projection of the hero's masculinity in a selection of post-millennial popular romance narratives and attempts to discover if and to what extent this projection reinforces or challenges patriarchal ideas about gender. In the majority of these narratives the hero is often presented as a hegemonic alpha male. However hegemonic masculinity is not a fixed concept. Rather it is subject to continuous change which allows for the emergence of various dominant masculinities. Under a poststructuralist lens and through a close textual analysis approach and a gender reading of romance narratives the book suggests that to a certain extent the romance hero could be described as a platform onto which different forms of dominant masculinity are displayed and highlights that these masculinities do not necessarily clash depend on or function as a prerequisite for each other.; ['Literary Criticism'], "

"Cautious Crusade: Franklin D. Roosevelt American Public Opinion and the War against Nazi Germany; America's struggle against Nazism is one of the few aspects of World War II that has escaped controversy. Historians agree that it was a widely popular war different from the subsequent conflicts in Korea and Vietnam because of the absence of partisan sniping ebbing morale or calls for a negotiated peace. In this provocative book Steven Casey challenges conventional wisdom about America's participation in World War II. Drawing on the numerous opinion polls and surveys conducted by the U.S. government he traces the development of elite and mass attitudes toward Germany from the early days of the war up to its conclusion. Casey persuasively argues that the president and the public rarely saw eye to eye on the nature of the enemy the threat it posed or the best methods for countering it. He describes the extensive propaganda campaign that Roosevelt designed to build support for the war effort and shows that Roosevelt had to take public opinion into account when formulating a host of policies from the Allied bombing campaign to the

Morgenthau plan to pastoralize the Third Reich. By examining the previously unrecognized relationship between public opinion and policy making during World War II Casey's groundbreaking book sheds new light on a crucial era in American history.; ['History'], "

"Aqualog: African Cichlids II Tanganyika I Tropheus; Ancient lakes are exceptional freshwater environments that have continued to exist for hundreds of thousands of years. They have long been recognized as centres of biodiversity and hotspots of evolution. During recent decades speciation in ancient lakes has emerged as an important and exciting topic in evolutionary biology. The contributions in this volume deal with patterns and processes of biological diversification in three prominent ancient lake systems. Of these the famous East African Great Lakes already have a strong tradition of evolutionary studies but the two other systems have so far received much less attention. The exceptional biodiversity of the European sister lakes Ohrid and Prespa of the Balkans has long been known but has largely been neglected in the international literature until recently. The rich biota and problems of its evolution in the two central lake systems on the Indonesian island of Sulawesi in turn have only lately started to draw scientific attention. This volume aims at deepening the awareness of the unusual biological diversity in ancient lakes in general and of the role of these lakes as natural laboratories for the study of speciation and diversification in particular. It should stimulate further research that will lead to a better understanding of key evolutionary processes in these lakes and to knowledge that might help in mitigating the deterioration of their diversity in the future.; ['Science'], "

"The Levellers and the English revolution (Spokesman University paperback); The period from the fifteenth century to the late eighteenth century was one of critical importance to British constitutionalism. Although the seeds were sown in earlier eras it was at this point that the constitution was transformed to a system of representative parliamentary government. Changes at the practical level of the constitution were accompanied by a wealth of ideas on constitutions written from different – and often competing – perspectives. Hobbes and Locke Harrington Hume and Bentham Coke the Levellers and Blackstone were all engaged in the constitutional affairs of the day and their writings influenced the direction and outcome of constitutional thought and development. They treated themes of a universal and timeless character and as such have established themselves of lasting interest and importance in the history of constitutional thought. Examining their works we can follow the shaping of contemporary ideas of constitutions and the design of constitutional texts. At the same time major constitutional change and upheaval were taking place in America and France. This was an era of intense discussion examination and constitution-making. The new nation of the United States looked to authors such as Locke Hume Harrington and Sydney for guidance in their search for a new republicanism adding to the development of constitutional thought and practice. This collection includes chapters examining the influences of Madison Hamilton Jefferson and Adams. In France the influence of Rousseau was apparent in the revolutionary constitution and Sieyes was an active participant in its discussion and design. Montesquieu and de Maistre reflected on the nature of constitutions and constitutional government and these French writers drew on engaged with and challenged the British and American writers. The essays in this volume reveal a previously unexplored dynamic relationship between the authors of the three nations explaining the intimate connection between ruler and ruled.; ['Law'], "

"Citizen and Subject; In analyzing the obstacles to democratization in post- independence Africa Mahmood Mamdani offers a bold insightful account of colonialism's legacy--a bifurcated power that mediated racial domination through tribally organized local authorities reproducing racial identity in citizens and ethnic identity in subjects. Many writers have understood colonial rule as either ""direct"" (French) or ""indirect"" (British) with a third variant--apartheid--as exceptional. This benign terminology Mamdani shows masks the fact that these were actually variants of a despotism. While direct rule denied rights to subjects on racial grounds indirect rule incorporated them into a ""customary"" mode of rule with state-appointed Native Authorities defining custom. By tapping authoritarian possibilities in culture and by giving culture an authoritarian bent indirect rule (decentralized despotism) set the pace for Africa; the French followed suit by changing from direct to indirect administration while apartheid emerged relatively later. Apartheid Mamdani shows was actually the generic form of the colonial state in Africa. Through case studies of rural (Uganda) and urban (South Africa) resistance movements we learn how these institutional features fragment resistance and how states tend to play off reform in one sector against repression in the other. The result is a groundbreaking reassessment of colonial rule in Africa and its enduring aftereffects. Reforming a power that institutionally enforces tension between town and country and between ethnicities is the key challenge for anyone interested in democratic reform in Africa.; ['Social Science'],"

"Faith at War: A Journey on the Frontlines of Islam from Baghdad to Timbuktu; An eye-opening political travelogue that reveals the Muslim world as never before Drawing on reporting from more than a dozen Islamic countries Faith at War offers an unforgettable portrait of the Muslim world after September 11. Choosing to invert the question of what ""they"" have done to ""us"" Wall Street Journal reporter Yaroslav Trofimov examines the unprecedented American intrusion in the Muslim heartland and the ripples it has caused far beyond the battlefields of Afghanistan and Iraq. What emerges is a penetrating portrait of people faith and countries better known in caricature than reported detail. The ordinary Muslims influential clerics warlords jihadis intellectuals and heads of state we meet are engaged in conversations that reveal the Muslim world to us from a new unexpected perspective. In Mali one of the most successful democracies in Africa we encounter Ousmane Madani Haidara an influential cleric who sees Wahhabi extremists rather than his country's secular government as the real enemy of the true faith. In Saudi Arabia we explore the bizarre world of exporting dead bodies from a kingdom that bars the burial of non-Muslims. On a US Navy aircraft carrier floating just off the coast of Pakistan in October 2001 we witness the mechanics of war: the onboard assembly of bombs that hours later are seen on T.V. exploding in Kabul. And in Iraq we accompany Trofimov as he negotiates his escape from an insurgent mob rides in a Humvee with trigger-happy GIs and gets lectured by a Shiite holy man on why America is the foe of mankind. "Across the River and Into the Trees; In the fall of 1948 Ernest Hemingway made his first extended visit to Italy in thirty years. A poignant bittersweet homage to love that overpowers reason to the resilience of the human spirit and to the worldwary beauty and majesty of Venice Across the River and into the Trees stands as Hemingway's statement of defiance in response to the great dehumanizing atrocities of the Second World War. Hemingway's last full-length novel published in his lifetime it moved John O'Hara in The New York Times Book Review to call him "the most important author since Shakespeare."; ['Fiction'], "

"Singing to the Dead: A Missioner's Life among Refugees from Burma; It is 1992 and the Burmese government's current war on its indigenous people runs into its fourth year. In neighboring Thailand a small band of Buddhist monks harbors refugees from Burma inside their modest temple in

the slums of Bangkok. The monks and refugees are all natives of the Burmese Mon State. All have the same residential status in Thailand: illegal. Under surveillance and overwhelmed by the needs of their charges the monks reach out to international aid agencies in Bangkok for help in ministering to the tortured the wounded the diseased and the orphaned. Singing to the Dead recalls a Catholic lay missioner's work alongside the Mon Buddhist monks of Bangkok. For more than two years Victoria Armour-Hileman was a go-between for the monks interceding with the world outside their temple walls for everything from a cornea transplant for a land mine victim to money to buy shoes for barefoot orphans. At the same time Singing to the Dead details an aid worker's ongoing education: how to weave through an embassy bureaucracy how to stave off burnout how to pull money out of thin air at the eleventh hour when to trust and when to be cautious when to kowtow when to pray. As the centuries-old conflict between Burma and its Mon people worsens police raids on the temple in Bangkok increase. Refugees have never been safe but now even the monks' unofficial immunity seems tenuous. When one of the monks is threatened with repatriation to Burma and possible imprisonment and torture Armour-Hileman begins the desperate race to secure a new home country for him. Philip Wickeri takes an unprecedented look at one of the most turbulent periods in Chinese history--the years from 1949 to the present. Wickeri explicates what Chinese Protestants have been saying about themselves in historical and theological perspective. His interpretation is based on one particular dynamic: how Chinese Protestants have sought to situate themselves in a socialist society within the unifying framework of the united front. After an overview of church Marxism and Christianity in China Wickeri discusses the united front. He focuses on ideology organization and religious policy. Wickeri then explores the Three-Self Movement as both a Chinese and a Christian movement. His conclusion: the Three-Self Movement despite problems has made Christianity more accessible to the average Chinese and the church more acceptable to Chinese society.; ['Religion'], "

"Listen & Learn Japanese (Dover's Listen and Learn Series); "A memorable experience."—Kirkus Reviews (starred review) In the tradition of Tomie dePaola's *Quiet* and Scott Magoon's *Breathe* comes this lyrical meditative picture book about listening and mindfulness. BEEP! WOOF! VROOM! Isn't the world a noisy place? But what if you stop close your eyes and LISTEN? Can you hear each sound? Can you listen past the noise and hear the quiet too? Beautifully illustrated and poignant this lovely picture book follows a girl through her school day as she listens to sounds across the city: caws of crows shouts across the playground and finally the quiet beating of her heart and whispered goodnights.; ['Juvenile Fiction'], "

"Meaning Of Language (Bradford Books); The Gricean account of language is at the center of much current work in the philosophy of language and the philosophy of mind. Anita Avramides maintains that Grice's paradigm can be used to defend very different conceptions of mind and of meaning. In this clearly argued book she describes Grice's analysis of meaning and proposes two interpretations of it one reductive and one nonreductive. Much current work in cognitive science assumes that the content of words and thoughts can be explained in naturalistic terms. A leading idea (advanced mainly by Stephen Schiffer and Brian Loar) is that the naturalistic account of content will proceed in two stages: a reduction of the semantic features of word; to the contents of propositional attitudes and then a reduction of the latter to physical or functional notions. The appeal of Grice's work on meaning to this two stage reductionist strategy is that Gricean definitions seem to provide the only way of reducing the semantic to the psychological a reduction that is required for a naturalistic account of intentionality. While Avramides defends the method of analysis as one suited to the concept of meaning she rejects a reductive interpretation of the analysis. She argues that any attempt to reduce the semantic to the psychological leads to a mistaken conception of mind. She exposes the assumptions behind the reductive interpretation and offers fresh and original arguments for the antireductionist position. Against the reductive Gricean she defends the idea that there is a deep epistemological symmetry between semantic and propositional attitude notions a result of which is that semantically characterized linguistic behavior is central to our concept of belief. "Unequally Yoked: How You Can Live Victoriously with a Weaker Vessel: True Testimonials; This book is written to the thousands of Christians who may be living in a marriage that after having become a Christian find themselves living with a spouse that has not yet dedicated their lives to Christ. "Inside American Philanthropy: The Dramas of Donorship; This penetrating analysis of the inner workings of American philanthropic foundations focuses on the crucial role played by the men and women who create them. Philanthropy's preeminent expert and critic Waldemar Nielsen probes deeply into the intensely personal factors that are involved in donors' decisions. Giving practical advice for would-be founders and directors Nielsen drives home his argument with an unusual series of case studies. Triumphs and tragedies are equally instructive in his well-chosen philanthropic parables. This book comes at a pivotal point in American philanthropy when there are 35000 active American foundations with combined assets of \$175 billion. Pointing to the massive individual

wealth accumulation that occurred during the 1980s (there are now 64 American billionaires and 210000 deca-millionaires) Nielsen predicts ""the number assets and grant making of American foundations will double by the first decade of the new century"". Always providing specific examples Nielsen details the pitfalls of traditional family foundations the attractions of community foundations the successes of women in philanthropy and the achievements of both special- and general-interest foundations. As our troubled society faces cutbacks in government programs Inside American Philanthropy will be a revelation for every citizen interested in our powerful and little-understood nonprofit institutions. "Las carpetas: persecucion politica y derechos civiles en Puerto Rico (Spanish Edition); Essays on human rights in Puerto Rico during the twentieth century. Puerto Rico one of the last and most populated colonial territories in the world occupies a relatively unique position. In Puerto Rico under Colonial Rule academics and intellectuals from the fields of political science history sociology and law examine three themes: evidence of state-sponsored political persecution in the twentieth century contemporary issues and the case of Vieques. "Paul Bowles: Collected Stories and Later Writings (Library of America); "The Library of America has made it easier for readers to enjoy Bowles's exotic literary harvest." — The Columbus Dispatch Paul Bowles was a composer writer and an American expatriate who spent most of the last five decades of his life in Tangier. According The Boston Globe he was "one of the literary class acts of the twentieth century." This Library of America volume containing his stories and travel writings is one of two volumes in the first annotated edition of Paul Bowles's work and is a "treasure trove for readers who haven't explored beyond The Sheltering Sky" (The Seattle Times). "All the tales are a variety of detective story" wrote Bowles of his first collection The Delicate Prey and Other Stories (1950) "in which the reader is the detective; the mystery is the motivation for the characters' behavior." In such stories as "A Distant Episode" and "How Many Midnights" Bowles pushes human character beyond socially defined limits and maps a transformed (often horribly transformed) reality. A master of gothic terror and an acute and at times diabolically funny observer of manners and motives both American and Moroccan Bowles confirmed his mastery of the short story in such volumes as A Hundred Camels in the Courtyard (1962) The Time of Friendship (1967) Things Gone and Things Still Here (1977) and Midnight Mass (1981) all included here along with a selection of his final stories. This volume also contains Up Above the World (1966) a frightening novella set in Latin America in which a trusting American couple are lured into an annihilating trap and the informed and fascinating travel book Their Heads Are Green and Their Hands Are Blue (1963). LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing and keeping permanently in print America's best and most significant writing. "Existentialism and modern literature: An essay in existential criticism; These three essays--originally written in the 1960s as lectures--show how novels poems and plays confront the philosophical complexities of humanity's existence. Our self-awareness--the very thing that makes us human--also makes us realize our powerlessness and the limitations of our existence. This concept is explored in this thought-provoking guide and provides a jumping off point for this treatise on existentialism and literature. Davis D. McElroy examines how modern art--the unharmonious corrupt dismal and shattering effect of much of humanity's painting music and literature--can be traced to the existentialist view of existence. McElroy uses the works of such American authors as John Steinbeck Arthur Miller Tennessee Williams and William Faulkner--as well of those of Kafka and Ibsen--to show that literature is the work of desperate men whose anguish and despair have driven them to see further and more clearly than is possible for most and their warnings must be heeded. To be able to live in the chaos of the modern world many authors have turned to existentialism as a guide according to McElroy. Using T. S. Eliot's The Wasteland and his plays The Confidential Clerk and The Cocktail Party as examples McElroy posits that these authors are ultimately teaching us that we must learn to live authentically or we will not live at all; we must choose the good that is in us or be engulfed in the evils that surround us. This is the simple message which modern writers--as well as the philosophers of existentialism--are trying so desperately to bring to our attention.; ['Philosophy'], "

"Handel At The Court Of Kings; With clarity and with admirable simplicity keyed to the understanding of children Opal Wheeler has traced the many-sided career of George Frederic Handel whose restless nature vied always with his tremendous ability as a composer and director. Handel's strange boyhood clouded by the fact that his father did not want him to become a musician and the later years when thanks to the patronage of the Duke of Saxe-Weissenfels his music was played before the greatest music lovers of Europe ? all this makes absorbing reading. The selections of Handel's music included here are those best understood and most apt to be mastered by young musicians. One evening back in 1691 conservative Doctor Handel was shocked and dismayed to find his small son carrying the torch at the head of a band of singers wandering through the little town of Halle. The good doctor never quite understood the all-consuming love of music which drove his son from childhood on and on to the great heights he eventually attained as the beloved Father of the Oratorio the composer of the magnificent MESSIAH. Opal Wheeler has given us here the most finished most completely satisfying book on her list of fine music biographies. "Invisible Darkness: The Strange Case Of Paul Bernardo and Karla Homolka; Perfect for fans of Making a Murderer and The People v. O. J. Simpson Invisible Darkness is the story of one of the more bizarre cases in recent memory—killings so sensational that they prompted the Canadian government in the interests of justice to silence its national press and to lock foreign journalists out of the courts. To all appearances Paul

and Karla Bernardo had a fairytale marriage: beautiful working-class girl weds bright upper-middle-class guy and they buy a fashionable dream house in the suburbs. But bored with his straight prestigious accounting job Paul soon went freelance as an international smuggler. He also revealed his boredom with conventional sex—enough so that one Christmas Eve he persuaded his wife to drug her own sister and engage in a menage a trois during which the sister died (a bungling coroner ruled her death accidental). The couple then upped the ante kidnapping and imprisoning several high school girls for sexual marathons which they videotaped before savagely murdering their captives. When the girls' bodies were found the police were stymied (although Paul had been accused of rape and given a DNA test that vanished for two years and only recently was linked to some fifty sexual-assault cases) until Karla tried to have her husband arrested for wife beating. During questioning she confessed to the crimes and is now serving two concurrent twelve-year sentences for manslaughter in exchange for testifying against her husband who was jailed for life.; ['True Crime'], "

"Exiles in a Land of Liberty: Mormons in America 1830–1846 (Studies in Religion); Using the concept of ""classical republicanism"" in his analysis Kenneth Winn argues against the common view that the Mormon religion was an exceptional phenomenon representing a countercultural ideology fundamentally subversive to American society. Rather he maintains both the Saints and their enemies affirmed republican principles but in radically different ways. Winn identifies the 1830 founding of the Mormon church as a religious protest against the pervasive disorder plaguing antebellum America attracting people who saw the libertarianism religious pluralism and market capitalism of Jacksonian America as threats to the Republic. While non-Mormons shared the perception that the Union was in danger many saw the Mormons as one of the chief threats. "Ruff's War: A Navy Nurse on the Frontline in Iraq; Twenty-five years in the Navy had made Cheryl Ruff an independent resilient strong woman - and a master at providing patient care while serving at various Navy hospitals around the world. But nothing prepared her mind body soul and spirit for what she experienced on the frontlines of the Iraq war as a member of the Bravo Surgical Company. Known as the ""devil docs"" they followed directly behind the 1st Marine Expeditionary Force as they entered Iraq at the onset of Operation Iraqi Freedom in March 2003. Right along with the Marines Commander Ruff the only female nurse anesthetist at the front and the rest of her surgical team learned to endure the brutal conditions of the desert while regularly confronting questions of life and death. Working in temperatures well over 100 degrees in full MOP gear Ruff and her team set up mobile hospital tents in the sand wherever needed. As Black Hawk helicopters brought in steady streams of the wounded they found it impossible to maintain standard sterilization procedures and clean up often amounted to just shovelling the blood-soaked sand out of the tent. During surgery they often wore lighted helmets so they could continue operating if the generator failed and donned gas masks when warnings were issued. These horrific conditions coupled with the gruesome images of shredded bodies and the cries of wounded children became Ruff's world. This is her story of the war up close and personal. It is a story of sacrifice survival and courage movingly written by a woman unconditionally dedicated to the life-saving mission of the United States Navy Nurse Corps.; ['History'], "

"Fanny Herself; Fanny Herself (1917) is a novel by Edna Ferber. Inspired by her experience as a young Jewish woman from the Midwest Fanny Herself is the story of a young woman who recognizes the unhappiness in her life and decides to risk it all for something better. Lighthearted in nature yet serious in its ideals Ferber's novel recalls the best of Fitzgerald in its unwavering commitment to humanity in all its beauty and heartbreak. As the owner of Brandeis' Bazaar—a successful store raised from the ashes of her deceased husband's chronic mismanagement—Molly Brandeis is a deeply serious woman who wants nothing but the best for her daughter. Where they differ of course is in the definition of that deceptive superlative.

"THE HANDBOOK OF NONSEXIST WRITING FOR WRITERS EDITORS AND SPEAKERS; Man he brotherhood founding fathers. It is argued that such words are and always have been used by educated people to encompass all humanity—men and women. Psychological and historical research in the past few years has produced evidence to the contrary: for most people "false generics" seldom if ever convey a female image nor are they ancient unchangeable rules of the English grammar that have always been used by the educated. Using hundreds of examples mostly from published sources the authors illustrate what certain words are saying to us on a subliminal level. Solutions are supplied that range from word substitutions to suggestions for rewriting. Without a trace of self-conscious righteousness and with refreshing humor Miller and Swift provide surprising insights into the English language and the ways in which people use it and are used by it. They demonstrate that to be in command of the language we must find clear convincing and graceful ways to convey our ideas accurately. We must recognize and replace exclusive distorting ambiguous and injurious words.; [ 'Language Arts & Disciplines' ], "

"A world without Jews; A groundbreaking reexamination of the Holocaust and of how Germans understood their genocidal project Why exactly did the Nazis burn the Hebrew Bible everywhere in Germany on November 9 1938? The perplexing event has not been adequately accounted for by historians in their large-scale assessments of how and why the Holocaust occurred. In this gripping new analysis Alon Confino draws on an array of archives across three continents to propose a penetrating new assessment of one of the central moral problems of the twentieth century. To a surprising extent Confino demonstrates the mass murder of Jews during the war years was powerfully anticipated in the culture of the prewar years. The author shifts his focus away from the debates over what the Germans did or did not know about the Holocaust and explores instead how Germans came to conceive of the idea of a Germany without Jews. He traces the stories the Nazis told themselves—where they came from and where they were heading—and how those stories led to the conclusion that Jews must be eradicated in order for the new Nazi civilization to arise. The creation of this new empire required that Jews and Judaism be erased from Christian history and this was the inspiration—and justification—for Kristallnacht. As Germans imagined a future world without Jews persecution and extermination became imaginable and even justifiable.; ['History'], "

"100 Simple Secrets of Healthy People; The Simple Science of a Healthy Life From fitness to diets to emotional health and longevity what do people who feel and look healthy do differently than those who are overtired depressed or out of shape? Every day we face an avalanche of studies and statistics that tell us what we should or shouldn't eat how long we need to exercise or how to protect ourselves from secondhand smoke and the harmful rays from the sun. Not only are these studies often contradictory but the actual scientific information is usually inaccessible. Moving beyond the myths and misinformation the advice in these pages is not based on one person's opinions or one expert's study. Though studies exist that seek to explain how people become trapped within violent relationships and what factors facilitate survival escape and safety this book provides fresh insights into this complex and multifaceted issue. Critics suggest that this question carries implicit notions of victim blame and fails to hold to account the perpetrators of abuse. The studies described in this book however explore the question from the perspectives of survivors and represent a shift away from individual pathology to an approach based on the recognition of structural oppression agency and resilience. Comprising eight chapters new theoretical frameworks for the analysis of IPV are provided to guide practitioners and policy makers in improving services for vulnerable people in abusive relationships and a range of studies into the experiences of a diverse range of survivors including mothers in Portugal women who experienced child marriage in Uganda and refugees in the United States of America generate findings which elucidate perspectives from marginalised and under-researched groups.; ['Social Science'], "

"The Reagan Imprint: Ideas in American Foreign Policy from the Collapse of Communism to the War on Terror; Contrary to widely held views of Ronald Reagan as a reflexive man of action John Arquilla's sharply revisionist study argues that he was drawn to and driven by ideas. In Mr. Arquilla's view Reagan during his presidency articulated important new concepts that fundamentally reshaped American foreign policy. He saw the effort simply to contain Soviet expansion as too defensive in nature so he replaced it with a doctrine designed to help others free themselves from totalitarian rule. He objected to the notion of mutual nuclear deterrence on practical and ethical grounds a stand that led him to negotiate arms reductions as well as explore the possibility of missile defense. On these issues as Mr. Arquilla shows Reagan overturned a long-standing consensus of public and expert opinion helping achieve a favorable end to the cold war and the arms race that came with it. Yet there were also areas in which Reagan's policies played out less successfully his inattention to the consequences of nuclear proliferation by smaller powers like Pakistan; his indecision in launching a preventive war against terrorism in the mid-1980s with consequences that continue to haunt us today.; ['Political Science'],"

Into Frank's life comes Lisa Ivanovna a quiet calming beauty from the country untroubled to the point of seeming simple. But is she? And why has Frank's bookkeeper Selwyn Crane gone to such lengths to bring these two together? From a winner of the National Book Critics Circle Award this novel with a new introduction by Andrew Miller author of *Pure* is filled with "writing so precise and lilting it can make you shiver" (Los Angeles Times). "Our Own Worst Enemy; A highly engaging yet contrarian account of the spread of illiberal and anti-democratic sentiment throughout our culture that places responsibility on the citizens themselves. Over the past two decades citizens of democracies across the world have become angrier and angrier with each other -- and with their governments. People who claim to value freedom tolerance and the rule of law have increasingly embraced illiberal politicians and platforms. These citizens justify their rejection of democratic norms and traditions as a protest against a cast of ""elite"" villains including globalists militarists journalists bureaucrats intellectuals and of course politicians. The only people these voters do not blame for the parlous state of their own democracies are themselves. Is this just a passing moment in history or a tide that threatens to wash away the democratic experiments of the past three centuries? In Our Own Worst Enemy Tom Nichols challenges the current depictions of the rise of illiberal and anti-democratic movements in the United States and elsewhere as the result of the deprivations of globalization or the malign decisions of an undifferentiated ""elite.""" Rather he places the blame for the rise of illiberalism on a different source: the people themselves. Nichols traces the illiberalism of the 21st century to the growth of unchecked narcissism rising standards of living global peace and a resistance to change -- all of which have been enabled by a hyper-connected internetculture of resentment. The grievances of ordinary citizens legitimate or otherwise are then exploited by political entrepreneurs who thrive on the creation of rage

rather than on the encouragement of civic virtue and democratic cooperation. Is there any way out of this predicament? While it will be difficult Nichols argues that first and foremost we need to revitalize civic culture which we can only do by resurrecting the virtues of stoicism compromise and cooperation. We also need to recognize how good we actually had it in the immediate pre-COVID era - the period when the trend toward illiberalism took off and accelerated. Trenchant contrarian and highly engaging Our Own Worst Enemy reframes the debate about how democracies have ended up in this dire state of affairs.; ['Political Science'],"

"Shiraz in the Age of Hafez (Publications on the Near East); In the fourteenth-century Persian city of Shiraz poets composed scholars studied mystics sought hidden truths ascetics prayed and fasted drunkards brawled and princes and their courtiers played deadly games of power. This was the world of Shams al-Din Mohammad Hafez Shirazi a classical poet who remains broadly popular today in his native Shiraz and in modern Iran as a whole and among all lovers of great verse traditions. As John Limbert notes Hafez's poetry is inseparable from the Iranian spirit--a reflection of Iranians' intellectual and emotional responses to events. But if Hafez's endurance derives from the considerable charm of his work it also arises from his sure grounding in the life of his day from a setting so deftly explored by his verse that his depictions of it retain a timeless relevance. To fully comprehend and enjoy Hafez and thus to understand a root force in modern Iranian consciousness we must know something of the city in which he lived and wrote. In this book Limbert provides not only a rich context for Hafez's poetry but also a comprehensive perspective on a fascinating place in a dynamic time. His portrait of this elegant witty poet and his marvelous city will be as valuable to medievalists students of the Middle East and specialists in urban studies as it will be to connoisseurs of world literature.; ['History'], "

"Vectors of Desire: Terry Rodgers' Vision of the American Millennial Moment; Desire in all of its complexity and excess defined the American millennial moment. On the surface to listen to the present political cacophony things have changed but not in the way people actually think and behave in private life. Though terror and trauma are said to have gained the upper hand desire continues to provide the propulsive force of the culture. But how do you paint desire? How do you capture its richness power and meaning? This monograph addresses those questions in the process of considering more than fifty major oil paintings made by the American realist Terry Rodgers between 1990 and 2005. Because most of these spectacular paintings are in the hands of private collectors the best way to get to know them is [www.terryrodgers.com](http://www.terryrodgers.com) where all of the images reproduced here in black and white are available in color. "Mutiny on the Amistad; This volume presents the first full-scale treatment of the only instance in history where African blacks seized by slave dealers won their freedom and returned home. Jones describes how in 1839 Joseph Cinqué led a revolt on the Spanish slave ship the Amistad in the Caribbean. The seizure of the ship by an American naval vessel near Montauk Long Island the arrest of the Africans in Connecticut and the Spanish protest against the violation of their property rights created an international controversy. The Amistad affair united Lewis Tappan and other abolitionists who put the ""law of nature"" on trial in the United States by their refusal to accept a legal system that claimed to dispense justice while permitting artificial distinctions based on race or color. The mutiny resulted in a trial before the U.S. Supreme Court that pitted former President John Quincy Adams against the federal government. Jones vividly recaptures this compelling drama--the most famous slavery case before Dred Scott--that climaxed in the court's ruling to free the captives and allow them to return to Africa.; ['History'], "

"Recent Theories of Human Development; Intended as supplemental reading in courses on theories of development this book augments traditional core texts by providing students with more depth on about two dozen recent and emerging theories that have appeared over the past 20 years. This period has seen a decline of the traditional ""grand"" theories that attempt to apply to all people all the time in favor of ""micro theories"" that focus more on individual differences so a book like this actually points the way toward the future rather than dryly reviewing the past. In addition the author inspects the changing ways in which the concept of ""theory"" itself has been interpreted during this period and he concludes with a chapter suggesting future directions.; ['Psychology'],"

"Christian Love; Bernard Brady has given us a rare delightful and thought-provoking book—a volume that belongs on the desk or the bed-stand of anyone in search of the rich and varied dimensions of Christian love. Christians are taught that God is love and are commanded to love their neighbors and their enemies. These truths are not controversial. What is controversial and indeed has been controversial throughout the history of Christianity is the meaning of this love. This book explores the tradition of Christian reflection on the meaning and experience of love loving and being loved. Many books have been written about Christian love but no book has gathered together this kind of primary source material and covered such a wide range of perspectives allowing the reader to engage directly with the thought and experience of some of the greatest Christian minds on the topic of love. Bernard Brady covers with remarkable clarity the breadth and depth of discussions on Christian love from the Bible to contemporary experience to create this—a survey of how Christians through the ages have understood love. Beginning of course with the Bible Brady examines the key writings and thinkers on the nature of Christian love: St. Augustine; mystics such as Bernard of Clairvaux Hadewich and Julian of Norwich; the great tradition and literature of courtly love Thomas Aquinas Martin Luther Søren Kierkegaard and others. In addition Brady devotes chapters to several 20th century figures whose lives seemingly embodied Christian love: Mother Theresa Martin Luther King Jr. and Pope John Paul II. Finally Christian Love addresses contemporary deliberations over the meaning of love with an analysis of the modern writings of Martin D'Arcy Reinhold Niebuhr Jules Toner Gustavo Gutiérrez Gene Outka Margaret Farley Edward Vacek and Don Browning. In a synthesizing concluding chapter Brady offers his own insightful and introspective understanding of the substance of Christian love suggesting that it is an affective affirmation of another that it is both responsive and unitive and that it is steadfast and enduring. As a beautiful contemplative companion to one's own spiritual understanding or as a thoughtful and meaningful gift Christian Love is in every sense a treasure to behold read and share with those you love.; ['Religion'], "

"Hello My Name Is Mommy : The Dysfunctional Girl's Guide to Having Loving (and Hopefully Not Screwing Up) a Baby; Hilarious and true and inspirational Hello My Name is Mommy is for every pregnant woman and new mother who ever felt helpless and out of control instead of confident and aglow. Sure women know pregnancy is no bed of roses but Lynch taps into her own dysfunctional childhood and fears about becoming a mom to label a much profounder worry many moms-to-be have: that their own pasts were so screwed up that they're doomed to repeat the cycle. Dr. Spock may tell moms to trust their instincts but Lynch's Misfit Mommies want to do every last thing but that. They feel like frauds and imposters and Lynch's real-girl's voice will be instantly recognizable to them. Lynch will walk and talk new moms through it all: from lamenting the hot dogs and second-hand smoke they were raised on (and of course ""you turned out just fine"") to the realization that kids are kind of germy and gross (but feeling that way doesn't make one a bad mother) to keeping it together at work with Cheerios in the old nursing bra.; ['Humor'],"

"Scandinavian Defence; The Scandinavian Defence previously thought to be a rather primitive and sub-standard response to 1 e4 has now emerged from the doldrums and been employed with success by some of the world's strongest Grandmasters including Bent Larsen Curt Hansen Ian Rogers Alexei Shirov and Vishy Anand. The traditional form of the opening is 1 e4 d5 2 exd5 Qxd5 3 Nc3 Qa5 with a subsequent deployment of Black's Queen's bishop at f5 or g4 and indeed the current theoretical status of this line remains good. However in recent years many alternative schemes have been tried. There has for example been a marked increase in the popularity of 3...Qd6!? in conjunction with a swift ...a6 and ...b5 or ...Bg4 ...Nc6 and ...O-O-O and sometimes even an early foray by the Black queen into the White kingside - all of which offers a radically different middlegame from the stonewalling so frequently associated with the older type of Scandinavian middlegames. Recent play also suggests that 3...Qe5

cheekily dubbed 'The Patzer Variation' might also not be so naive. Equally important are the latest lines arising from 1 e4 d5 2 exd5 Nf6 including the dangerous Icelandic Gambit and the aggressive Portuguese Variation which is currently at the cutting edge of chess theory.; ['Games & Activities'], "

"Weber's Electrodynamics (Fundamental Theories of Physics); ""Great progress has been made in electrical science chiefly in Germany by cultivators of the theory of action at a distance. The valuable electrical measurements of W. Weber are interpreted by him according to this theory and the electromagnetic speculation which was originated by Gauss and carried on by Weber Riemann F. and C. Neumann Lorenz etc. is founded on the theory of action at a distance but depending either directly on the relative velocity of the particles or on the gradual propagation of something whether potential or force from the one particle to the other. The great success which these eminent men have attained in the application of mathematics to electrical phenomena gives as is natural additional weight to their theoretical speculations so that those who as students of electricity turn to them as the greatest authorities in mathematical electricity would probably imbibe along with their mathematical methods their physical hypothesis. These physical hypotheses however are entirely alien from the way of looking at things which I adopt and one object which I have in view is that some of those who wish to study electricity may by reading this treatise come to see that there is another way of treating the subject which is no less fitted to explain the phenomena and which though in some parts it may appear less definite corresponds as I think more faithfully with our actual knowledge both in what it affirms and in what it leaves undecided.; ['Science'],"

"American Jezebel : The Uncommon Life of Anne Hutchinson the Woman Who Defied the Puritans; In 1637 Anne Hutchinson a forty-six-year-old midwife

who was pregnant with her sixteenth child stood before forty male judges of the Massachusetts General Court charged with heresy and sedition. In a time when women could not vote hold public office or teach outside the home the charismatic Hutchinson wielded remarkable political power. Her unconventional ideas had attracted a following of prominent citizens eager for social reform. Hutchinson defended herself brilliantly but the judges faced with a perceived threat to public order banished her for behaving in a manner ""not comely for [her] sex." Written by one of Hutchinson's direct descendants American Jezebel brings both balance and perspective to Hutchinson's story. It captures this American heroine's life in all its complexity presenting her not as a religious fanatic a cardboard feminist or a raging crank-as some have portrayed her-but as a flesh-and-blood wife mother theologian and political leader. The book narrates her dramatic expulsion from Massachusetts after which her judges still threatened by her challenges promptly built Harvard College to enforce religious and social orthodoxies-making her the mid-wife to the nation's first college. In exile she settled Rhode Island becoming the only woman ever to co-found an American colony. The seeds of the American struggle for women's and human rights can be found in the story of this one woman's courageous life. "The Art of Ellis Wilson; From the tobacco fields of western Kentucky to the streets of Harlem from the Gullah Islands off the South Carolina and Georgia coasts to the all-black republic of Haiti painter Ellis Wilson (1899-1977) examined the scope and depth of black culture. One of Kentucky's most significant African American artists Wilson graduated from the Art Institute of Chicago in 1923. He spent five more years in the city before moving to New York where he lived for the rest of his life. Aside from his participation in the WPA's Federal Arts Project and a Guggenheim Fellowship he was never able to support himself fully by painting. Yet his work has long been praised for its boldness and individuality. Black workers were a favorite subject: field hands factory workers loggers fishermen and more. Of his 1940s series of black factory employees Wilson stated ""That was the first time I had ever seen my people working in industry so I painted them." Over time his documentary style gave way to one that emphasized shape and color over pure representation. Despite exhibitions in New York and elsewhere Wilson considered a small show at the public library in his hometown of Mayfield in 1947 to be ""one of the high points"" of his life. This catalog accompanies the first major retrospective of Wilson's paintings.; ['Art'], "

"Anticipations of the Reaction of Mechanical and Scientific Progress: Upon Human Life and Thought; Anticipations of the Reaction of Mechanical and Scientific Progress upon Human Life and Thought generally known as Anticipations was written by H.G. "The complete memoirs of George Sherston; The Memoirs of George Sherston brings together in one memorable volume the three widely-hailed "autobiographical novels" of the eminent English poet Siegfried Sassoon. Set against the dark background of World War this extraordinary trilogy follows the author's wartime fortunes and examines his emotional growth under the cruel pressures of hand-to-hand combat in the field. Perhaps the most striking qualities of Sassoon's record are its honesty its simplicity and its lack of pretentiousness and false heroics. It is after all a deeply personal account of a complete phase of a man's life spanning in continuous narrative form the period from the author's childhood to the war's end. The trilogy begins with Memoirs of a Fox-Hunting Man a fond reminiscence of boyhood and adolescence set against the background of the author's rural English home. Full of the scent of leather and the huntsman cries on a frosty autumn morning the scene is set as the world moves slowly towards war. In the second volume The Memoirs of an Infantry Officer the mood deepens. A classic among war books it tells of the author's steady disillusionment with the Army and of his ultimate rebellion against the cruel realities of war. Finally in the last of the three Sherston's Progress set in an asylum for shell-shocked officers the author is able to accept these realities and to resolve his emotional turmoil. Through it all there is always the presence of Sassoon—the fluid sensitive prose the fine perceptions of the poet—yet spoken here in the voice of the average man. With charm and humor and quiet understatement he has managed to articulate the hidden feelings of any sensitive man who in the normal course of his life is suddenly exposed to the nightmare of war.; ['History'], "

"Bound for Canaan (Standing on the Promises Book 2); ""Dear Brother"" Jane Manning James wrote to Joseph F. Smith in 1903 ""I take this opportunity of writing to ask you if I can get my endowments and also finish the work I have begun for my dead.... Your sister in the Gospel Jane E. James.""" A faithful Latter-day Saint since her conversion sixty years earlier James had made this request several times before to no avail and this time she would be just as unsuccessful even though most Latter-day Saints were allowed to participate in the endowment ritual in the temple as a matter of course. James unlike most Mormons was black. For that reason she was barred from performing the temple rituals that

Latter-day Saints believe are necessary to reach the highest degrees of glory after death. A free black woman from Connecticut James positioned herself at the center of LDS history with uncanny precision. After her conversion she traveled with her family and other converts from the region to Nauvoo Illinois where the LDS church was then based. There she took a job as a servant in the home of Joseph Smith the founder and first prophet of the LDS church. When Smith was killed in 1844 Jane found employment as a servant in Brigham Young's home. These positions placed Jane in proximity to Mormonism's most powerful figures but did not protect her from the church's racially discriminatory policies.

Nevertheless she remained a faithful member until her death in 1908. Your Sister in the Gospel is the first scholarly biography of Jane Manning James or for that matter any black Mormon. Quincy D. Newell chronicles the life of this remarkable yet largely unknown figure and reveals why James's story changes our understanding of American history.;

"The American Mayor: The Best & the Worst Big-City Leaders; The American Mayor offers a unique ranking of the nation's big-city mayors by expert scholars. Although the mayoralty is one of the most important political executive offices it has escaped the kind of evaluations by which scholars have ranked American presidents. Now thanks to Melvin Holli we have a comparable survey of the ""best"" and ""worst"" mayors covering some 730 mayors from the big-fifteen cities from the beginning of the modern office in 1820 to the 1990s. The poll of historians biographers and social scientists produced a remarkably strong consensus. Who were our best mayors? The list ranges from Boston's ""Great Mayor"" Josiah Quincy (1823-1828) to New York City's Fiorello La Guardia (1934-1945) who is first on the all-time-best list. La Guardia a stouthearted fireplug of a man built modern New York fought Murder Incorporated read the comics to children over the air during a newspaper strike and was a symbol of ethnic probity and honesty. Sandwiched between Quincy and La Guardia are several other outstanding mayors including Cleveland's Tom Johnson (1901-1909) Pittsburgh's David Lawrence (1946-1959) Detroit's Hazen Pingree (1890-1897) and Los Angeles's Tom Bradley (1973-1993). Taking the first-worst prize among scoundrel mayors is Chicago's William H. ""Big Bill"" Thompson (1915-1923 1927-1931) one of the most colorful mayors in the city's history if not the most corrupt. Big Bill also known as ""Kaiser Bill"" for his pro-German stand during World War I accepted campaign funds from gangsters including Al Capone. Also among the ""worst"" is another Chicago mayor Jane Byrne (1979-1983) the only woman on the list. Jersey City's Frank Hague (1917-1947) and Philadelphia's Frank Rizzo (1972-1980) are among the other notable rascals who have sat in city halls. The American Mayor presents complete findings of Holli's poll in jargon-free fashion. Holli explains the results of the survey gives biographical sketches of the ten best mayors as well as some attention to the worst and then uses the findings of modern leadership studies to explore mayoral success and failure. He concludes with a chapter titled ""Pathways to Power"" in which he reviews the New York City political milieu that produced the nation's ""best"" mayor Fiorello La Guardia and also examines the career of the nation's most successful big-city mayor Buffalo's Grover Cleveland the only mayor to become president of the United States.; ['History'], "

"Endurance: Shackleton's Incredible Voyage; This harrowing tale of British explorer Ernest Shackleton's 1914 attempt to reach the South Pole one of the greatest adventure stories of the modern age. In August 1914 polar explorer Ernest Shackleton boarded the Endurance and set sail for Antarctica where he planned to cross the last uncharted continent on foot. In January 1915 after battling its way through a thousand miles of pack ice and only a day's sail short of its destination the Endurance became locked in an island of ice. Thus began the legendary ordeal of Shackleton and his crew of twenty-seven men. For ten months the ice-moored Endurance drifted northwest before it was finally crushed between two ice floes. With no options left Shackleton and a skeleton crew attempted a near-impossible journey over 850 miles of the South Atlantic's heaviest seas to the closest outpost of civilization. Their survival and the survival of the men they left behind depended on their small lifeboat successfully finding the island of South Georgia--a tiny dot of land in a vast and hostile ocean. In Endurance the definitive account of Ernest Shackleton's fateful trip Alfred Lansing brilliantly narrates the harrowing and miraculous voyage that has defined heroism for the modern age.; ['History'], "

"Reality in Advertising; Rarely has a book about advertising created such a commotion as this brilliant account of the principles of successful advertising. Published in 1961 Reality in Advertising was listed for weeks on the general best-seller lists and is today acknowledged to be advertising's greatest classic. It has been translated into twelve languages-French Japanese Spanish Dutch German Italian Portuguese Danish Swedish Norwegian Finnish Hebrew-and has been published in twenty-one separate editions in fifteen countries. Leading business executives and the advertising cognoscenti hail it as ""the best book for professionals that has ever come out of Madison Avenue.""(For typical comments see back of jacket.) Rosser Reeves says: ""The book attempts to formulate certain theories of advertising many quite new and all based on 30 years of intensive research."" These theories whose value has been proved in the marketplace all revolve around the central concept that success in selling a product is the key criterion of advertising. In the course of explaining his own hard-headed approach Mr. Reeves shows why the ad campaigns for many products are just so much money poured down the drain. He has some devastating things to say about advertising's misguided men: the ""aesthetes"" and the ""puffers"" who put art and technique ahead of the client's sales; and he punctures many of the misguided philosophies which lower the efficiency of advertising rather than raising it. But even more important is the thoroughness and clarity with which he explains many of the mysteries of how to write advertising that produces these sales. Here in short is a concise forcefully written guide that has been called ""a 'Rosetta Stone' for the advertising business""- an essential book for anyone who works in advertising or uses advertising extensively. It is today required reading in hundreds of great corporations and many of the world's leading business schools.; ['Business & Economics'],"

An accompanying narrative describes the career of each field formation and includes the background and experience of many of their most famous commanding officers. "Software Quality: State of the Art in Management Testing and Tools; 1. 1 The Pressure on Information Technology (IT) ""In today's environment the ability to react quickly to change by reducing the development cycle in order to be first to market will give a company an important competitive edge. "" -James Martin The market conditions of the 21 st century put business under continual pressure. The most successful companies are those who are able to reduce their time to market to launch initiatives before their competitors to respond very rapidly to opportunities in the marketplace or to change direction in response to a move by the competition or a change in circumstances. All of these business initiatives rely on support from Information Technology (IT). For a business to launch a new product in three months time the supporting IT processes must be available and working in that three month time frame. In this fast moving environment late IT delivery is not acceptable and may pose a major risk to the business. The marketplace of 21 st century business measures timescales in months whereas in the past timescales of two to three years were more typical. Internet related and e business projects frequently require even tighter timescales measured in days rather than months. This need for speed puts tremendous pressure

on IT departments. Pressure does not just come from the need for speed. There is also an ever-increasing rate of change within business.; ; ['Computers'], "

Lush verdure will be replaced with fire. Tyrannosaurus rex will be toppled from their throne along with every other species of non-avian dinosaur no matter their size diet or disposition. They just don't know it yet. The cause of this disaster was identified decades ago. An asteroid some seven miles across slammed into the Earth leaving a geologic wound over 50 miles in diameter. In the terrible mass extinction that followed more than half of known species vanished seemingly overnight. "Baton Change: Releasing the Next Generation; Mathew Philip has done a fine job of producing a much-needed study of Christian leadership derived from the context of his own ministry experience. It is a healthy balance between Biblical investigation on the subject on one hand and practical everyday concerns and issues on the other. The topics addressed are laid out quite independently from each other and this makes for easy reading. For this reason lecturers in Bible schools will find it especially useful. Graham Houghton Ph.D. Cambridge New Zealand. Recent years saw the publication of scores of books on leadership both in Christian circles and in the secular world of politics and business. But this book fills in some gaps and will be a valuable addition to them. It is written in a style and format that is very reader-friendly. The ideas are communicated well. "Somebody to Love A Rock-and-Roll Memoir.; A candid autobiography of the great rock diva of Jefferson Airplane and Jefferson Starship revealing her wild life at the forefront of the Sixties and Seventies counterculture. She has been called rock and roll's original female outlaw as famous for her bad behavior as for her haunting singing voice. In her 25-year career as a musician Grace Slick charted dozens of hits and sold millions of albums. From ""White Rabbit"" and ""Somebody to Love"" to ""Sarah"" and ""Miracles"" the songs she performed became the anthems of a generation. Whether describing her antics at the White House with Abbie Hoffman or the unforgettable experience that was Woodstock Slick's recollections have the same rich imagery found in her lyrics. In this provocative narrative readers will discover the many sides of Grace Slick: as artistic pioneer; she records songs with Jerry Garcia and David Crosby; as practitioner of freedom and rebellion; she sleeps with Jim Morrison and gets arrested for DUI on three separate occasions (without actually being in a car); and as a loving mother to actress China Kantner she tries to balance casual friendship with parental wisdom. Slick offers a revealing self-portrait of the complex woman behind the rock-outlaw image and delivers a behind-the-scenes no-holds-barred view of the people and spirit that defined a quarter-century of American pop culture. Wildly funny candid and evocative Somebody to Love? tells what it was really like during and after the Summer of Love—and how one remarkable woman survived it all to remain today as vibrant and rebellious as ever.; ['Biography & Autobiography'], "

"America's Struggle with Chemical-Biological Warfare; Fear and ignorance have colored the perception of chemical and biological (CB) warfare both in the public and military spheres. Media coverage following the alleged gassing of sheep at Dugway Proving Ground in 1968 has led most people to believe that CB warfare is an unstoppable doomsday weapon of mass destruction. Yet in 1972 General Creighton Abrams the Army Chief of Staff attempted to disestablish the Chemical Corps because he saw no need for it. Had that decision not been reversed in 1976 there would not have been any chemical defense specialists or equipment available for Operation Desert Storm in 1990. This study tracks events relating to the Department of Defense's CB warfare program between 1968 and 1990 as it evolved up to the Gulf War. It also details how the military develops and procures CB defense equipment to protect today's soldiers. Mauroni draws parallels between the development of binary chemical weapons the chemical demilitarization program and the DOD CB terrorism response efforts as each has very similar issues and solutions. He seeks to educate leading officials and the general public about the facts behind CB warfare and the options for coping with it in the future. With proper training and equipment the challenge of CB warfare can be met and dealt with on the modern battlefield.; ['Political Science'], "

It must also take into account peoples' ability to weigh options carefully and act prudently. The trip lasted 400 days and the father-and-son team were the last Westerners to reach Lhasa before the Chinese invasion and occupation. The trek garnered worldwide attention when Lowell Thomas Jr. succeeded in getting his father safely across the Himalayas to India after a serious accident on a 17000-foot pass. Out of This World which was first published in 1950 and became a bestseller tells the story of this journey that the author describes as "a climax to his father's lifetime of adventure" and "probably the greatest travel adventure I will ever have". "Moments of Reprieve: A Memoir of Auschwitz; In this collection of essays based on his time as a Jewish prisoner in the Nazi camps Primo Levi creates a series of sketches of the people he met who retained their humanity even in the most inhumane circumstances. Having already written two memoirs of his survival at Auschwitz Levi knew there was still more left untold. Collected in this book are stray vignettes of fifteen individuals Levi met during his imprisonment. Whether it was the young Romani man who smuggled a creased photo of his bride past the camp guards or the starving prisoner who still insisted on fasting on Yom Kippur the memory of these individuals stayed with Levi for long after. They represent for him "bizarre marginal moments of reprieve." Neither simple heroes nor victims but people who never lost sight of their humanity in the face of unimaginable suffering. Written with the author's signature humility and intelligence Moments of Reprieve shines with lyricism and insight. Nearly forty years after their publication Levi's words remain as beautiful as they are necessary. Along with Elie Wiesel and Hannah Arendt Primo Levi is remembered as one of the most powerful and perceptive writers on the Holocaust and the Jewish experience during World War II. This is an essential book both for students and literary readers. Reading Primo Levi is a lesson in the resiliency of the human spirit.; ['Biography & Autobiography'], "

**"Mending the Soul: Understanding and Healing Abuse;** This book provides a well-researched biblical and scientific overview of abuse. A broad overview it deals with the various types of abuse the various effects of abuse and the means of healing. Abuse can be sexual physical neglect spiritual and verbal. The chief arguments pursued throughout the book are: (1) abuse is far more rampant than most Christians realize but due to human depravity and satanic influence widespread abuse is predictable. (2) All types of abuse create profound long-term soul damage due to the way abuse perverts various aspects of the image of God. (3) God is the healing redeemer. Human salvation came through horrible physical abuse. (4) Healing must take place in the context of relationships. Humans are deeply impacted by others due to being made in the image of God. Just as surely as abusive relationships have tremendous power to wound the soul so healthy relationships have tremendous power to nurture and heal the soul. Questions answered in the book include: - How can a genuine believer abuse a child? - Why would someone abuse a child? - How can parents and childrens' workers identify abusers? - How can abuse victims heal? - What does genuine healing look like? - Is anger appropriate or hurtful for abuse victims? - Where does forgiveness fit in? Helpful sample child protection policy application screening interview and warning signs of potential abusers equip ministry leaders. **"God With Us: A Theological Introduction to the Old Testament;** This is a print on demand book and is therefore non- returnable. ""God's dynamic initiative"" is the main theme of biblical testimony says Christoph Barth. Here he expounds the message of the Old Testament in a manner that is faithful to the Old Testament itself -- as an account of the mighty acts of God rather than a series of abstract doctrines. A theology of the Old Testament is not simply a study of God however. Old Testament theology also encompasses teaching about the world and humanity about

life and death about origin nature and destiny. And Old Testament theology must also take into account the New Testament which confirms what is announced in Israel's Scripture and thus is part of it. Barth elucidates the importance of the Old Testament for the New Testament and hence for Christians surveys God's redemptive acts as recorded in the confessional summaries of history in the Old and New Testaments and offers contemporary applications of these biblical themes. Working his way through the Old Testament Barth treats nine key topics each of which deals with one of the divine acts that are the essential subject matter of Israel's Scripture: creation election of the patriarchs exodus wilderness wandering Sinai revelation gift of Canaan election of David (kingship) election of Jerusalem and sending of prophets. He has divided each of the nine chapters into sections on one main aspect of the topic considering theological anthropological soteriological and eschatological points as well. Throughout his examination of each theme Barth pays special attention to its scriptural context. *God With Us* is an excellent textbook for introductory or survey courses in the Old Testament: each section begins with a thesis statement summarizing its contents and details are treated in small-print sections. Barth originally wrote his Old Testament theology in Indonesian and later rewrote the entire book in English; Geoffrey Bromiley has condensed the original four volumes in this edition.; ['Religion'], "

In the 1630s visitors to the prosperous trading cities of the Netherlands couldn't help but notice that thousands of normally sober hardworking Dutch citizens were caught up in an extraordinary frenzy of buying and selling. The object of this unprecedented speculation was the tulip a delicate and exotic Eastern import that had bewitched horticulturists noblemen and tavern owners alike. For almost a year rare bulbs changed hands for incredible and ever-increasing sums until single flowers were being sold for more than the cost of a house. Historians

would come to call it tulipomania. It was the first futures market in history and like so many of the ones that would follow it crashed spectacularly plunging speculators and investors into economic ruin and despair. "Principles of Magnetic Resonance 3ED (Springer Series in Solid-State Sciences); The first edition of this book was written in 1961 when I was Morris Loeb Lecturer in Physics at Harvard. In the preface I wrote: ""The problem faced by a beginner today is enormous. If he attempts to read a current article he often finds that the first paragraph refers to an earlier paper on which the whole article is based and with which the author naturally assumes familiarity. That reference in turn is based on another so the hapless student finds himself in a seemingly endless retreat. I have felt that graduate students or others beginning research in magnetic resonance needed a book which really went into the details of calculations yet was aimed at the beginner rather than the expert. "" The original goal was to treat only those topics that are essential to an understanding of the literature. Thus the goal was to be selective rather than comprehensive. With the passage of time important new concepts were becoming so all-pervasive that I felt the need to add them. That led to the second edition which Dr. Lotsch Physics Editor of Springer-Verlag encouraged me to write and which helped launch the Springer Series in Solid-State Sciences. Now ten years later that book (and its 1980 revised printing) is no longer available. Meanwhile workers in magnetic resonance have continued to develop startling new insights.; ['Science'], "

"Expecting : One Man's Uncensored Memoir of Pregnancy; Gordon Churchwell his a problem he's never faced before-- his wife Julie is pregnant. ""What is happening to me? It's 6:30 A.M. My Wife is peeing on what looks like a scale model of the spaceship from 2001: A Space Odyssey. It's an early pregnancy test called something like First Alert or Early Response some name that sounds like a smoke detector or a piece of EMS equipment." From this unavoidable physiological fact follows the greatest psychological crisis of his life a story that eventually illuminates the journey of all men and women as they make the passage to becoming parents. What really goes through a ""pregnant"" man's mind? Combining his personal story with interviews with doctors midwives evolutionary scientists and other fathers-to-be Gordon Churchwell delivers the gritty intimate details as well as important new information in an irreverent style that mixes poignancy wit and laugh-out-loud humor. He covers all the issues without flinching. On relationships: ""There are moments when you are not just individuals trying to solve a personal problem but representatives of your gender acting out some social drama. Over Julie's shoulder I see a chorus of angry women. . . ."" On sex: ""While the party line is that Julie remains 'my beautiful partner to whom I am devoted' to Mr. Weenie she is beginning to look like Danny DeVito in Batman Returns. . . ."" On why men find change difficult: ""Why do I feel like a bystander in the most important 280 days of my life? Where are the stories that make a man feel like he's in it and not out of it? The answer is simple. When it comes to the stories of fatherhood our culture has discarded them." When he starts having morning sickness Churchwell turns science detective and makes some startling discoveries: He finds out that male pregnancy symptoms are extremely common and uncovers evidence of a physiological paternal response-men have hormonal changes too which help prepare them emotionally for fatherhood. Does nature make fathers out of men? Working with a leading evolutionary

psychologist Churchwell argues for a revolutionary new perspective on a man's role in reproduction. Parental investment on both sides is not automatic. Pregnancy behavior is part of a continual process of negotiation about parental commitment. A man's response to pregnancy including sympathetic symptoms may signal his plans about investing in the child. His behavior can directly affect the mother's own response including the quality of her maternal care. By showing that men have a physiological transformation of their own that integrates them into the biology of the family Churchwell restores men to the story of reproduction. Expecting is an important contribution to the new literature of fatherhood that will amuse and inspire men and women as they transform themselves into parents. This personal story ends where it began with him and his wife Julie struggling-this time as a team-through a harrowing thirty-five-hour birth ordeal and welcoming their daughter Olivia into the world.; ['Health & Fitness'], "

Hundreds of Independent Fundamental Baptists stood in their pulpits and denounced the author from the pulpit as being a ""tool of Satan.""" The author received death threats and was denounced from the pulpit of First Baptist Church in Hammond Indiana and other pulpits in the land of Independent Fundamental Baptists. The author an attorney and former member of the First Baptist Church details fact after fact including: The possible homicide of a 17 month old baby. The chief suspect? The son of a famous Baptist Preacher. This child was found to have multiple broken bones in various stages of healing prior to his death while in the home of this man David Hyles (who would take the Fifth in the Coroner's Inquest). Multiple adulterous affairs by this son (who wrote a book entitled ""Purity"" while he was having some of the affairs). Pornographic pictures discovered in a briefcase tossed into a dumpster behind the church by David Hyles. The subjects? The wives of men in the church and other women in the church. The facts showing how a famous Independent Fundamental Baptist preacher sent his son to an unsuspecting church when that preacher knew his son had serious moral failures. A pastor who brags that he has men on his staff that would commit suicide if he asked them. A church membership that displays a loyalty eerily reminiscent of the Jim Jones cult mindset. Staff members who boast that their pastor is so god-like that he does not have a dishonest drop of blood in his body. A daughter who reveals conversations she overheard between her mother a secretary to this Baptist

pastor and the pastor which always ended with a soft whispered ""I love you"" all the while her father a deacon of the church and close friend to the pastor was banished to the basement by her mother. The daughter of this famous Baptist pastor who says her father's church was a cult. These are just a few of the facts in this book. The author Voyle Glover a lawyer and a former church member for nearly 20 years brings all the passion of a lawyer doing closing argument to the case as he relentlessly brings out fact after fact and question after question each of which begs to be answered. At one point Glover examines sworn testimony given by Hyles and his alleged paramour during a deposition taken during her divorce. Testimony there revealed that the Reverend Jack Hyles had given or loaned more than \$100000 to this woman and bought her a new car every two years. Interest in this case has attracted attention from various media sources including the Chicago Tribune The Times the television show Current Affair the Southern Baptist Conference newspapers across the nation radio magazines and a host of religious publications. The book has been out of print for over 2 decades. Now there is a demand for the book by a new generation the children of the parents who refused to read this ""trash"" (as Hyles called it). This generation wants to know what their parents refused to see. They want truth. There is an even greater interest now in light of the recent scandal brought on by the headline news that the successor pastor to the Hyles pulpit the son-in-law Jack Schaap was recently (2012) arrested for transporting a minor across state lines to have sex. He pled guilty and faces a minimum of 10 years prison.; ['Religion'], "

"The Art of Rhetoric (; With the emergence of democracy in the city-state of Athens in the years around 460 BC public speaking became an essential skill for politicians in the Assemblies and Councils - and even for ordinary citizens in the courts of law. In response the technique of rhetoric rapidly developed bringing virtuoso performances and a host of practical manuals for the layman. While many of these were little more than collections of debaters' tricks the Art of Rhetoric held a far deeper purpose. Here Aristotle (384-322 BC) establishes the methods of informal reasoning provides the first aesthetic evaluation of prose style and offers detailed observations on character and the emotions. "The Apocalypse of Being : The Esoteric Gnosis of Martin Heidegger; Heidegger intended to replace metaphysics by a new kind of thought about that which he called Sein but in his works this noun is very far from meaning the act of being such as it has been traditionally conceived by Western philosophy. His explanations as to what he does mean by Sein underline his departure from traditional metaphysics. Sein is no longer to be understood as the act of the things that exist in the eternal world but as something revealed to the human mind in an esoteric way. The association of this esoteric revelation of Sein with Holderlin's theosophy led Heidegger to put forward a new gnosis organized as a substitute of metaphysics and of Christian theology as well.;

"City (Key Ideas in Geography); City provides an accessible yet critical introduction to one of the key concepts in human geography. Always at the heart of discussions in social theory the definition and specification of 'the city' nonetheless remains illusive. In this volume Phil Hubbard locates the concept of 'the city' within current traditions of social thought providing a basis for understanding its varying usages and meanings through a critical discussion of the contribution of key authors and thinkers. Written in a lively and accessible style the individual chapters of City offer a thematic overview of four dominant ways of approaching cities: as lived-in places as imagined spaces as networks of association as technologies of flow. Drawing on a diverse range of literatures and case studies the book spells out the importance of a geographical perspective on the city suggesting that it is only by bringing these different ways of mapping the city together that we can begin to make sense of cities.; [ 'Science' ], "

"Faces of the State: Secularism and Public Life in Turkey; Faces of the State is a penetrating study of the production of a state-revering political culture in the public life of 1990s Turkey. In this new contribution to the anthropology of the state Yael Navaro-Yashin brings recent poststructuralist and psychoanalytic theory to bear on the study of the political. Delving deeper than studies of nationalist discourse that would focus on consciously articulated narratives of political identity the author explores sites of ""fantasy"" in the public-political domain of Istanbul. The book focuses on the conflict over secularism in the aftermath of an Islamist victory in the city's municipalities. In contrast with studies that would problematize and objectify religious movements the author examines the agency of secularists under a state widely known for its ""secularist"" policies. The complexity and dynamism of the context studied moves well beyond scholarly distinctions between ""secularity"" and ""religion"" as well as ""state"" and ""society.""" Here secularism and Islamism emerge as different guises for a culture of statism where people from ""society"" compete to claim ""Turkish culture"" for themselves and their life practices. With this work that stretches the boundaries of regionalism the author situates her anthropological study of Turkey not only in scholarship on the Middle East but also in the broader problem of thinking ""Europe"" anew.; ['Social Science'],"

"Vital Ties; The promise of wellness and satisfaction has never been as ubiquitous in our culture as it is now. Images of happy people stare out

at us from magazine pages and television screens; they are successful and busy hurrying from the office to the opera eating healthfully and acting responsibly. We are a nation of achievers but as Dr. Edward Hallowell makes clear in Connect what sustains us—emotionally psychologically physically—is connectedness the feeling that we are part of something that matters something larger than ourselves that gives life its meaning direction and purpose. Hallowell examines the real life most of us lead—overwhelmed harried pressured—and outlines the steps we can take to connect ourselves to the people and things that matter to us. He elevates the simplest forms of communication understanding and self-knowledge as examples of the human moment: the basis for the bridges we build to one another. He tells stories of personal growth—one woman's plan to bring a neighborhood together another woman's assembling of a makeshift family a real estate developer's institution of company-wide weekly pizza dinners—and identifies in them twelve vital ties to a more connected life. Hallowell concludes that within each of us exists the capacity to connect with the people around us—our parents spouses children friends and colleagues—to become who we want to be and to be happy with who we are.; ['Psychology'], "

"Tested Tried and Faithful; Has the final end-time generation—spoken of by Jesus and the prophets—finally arrived? Could our generation be the one that is witnessing the beginning phases of the second coming of the Lord? If so will you be one of the faithful Jesus finds when He calls His church to heaven? In The Sifted Generation Pastor Michael Henderson takes a unique look at the final generation from which the true church will be sifted just prior to the days of tribulation that are coming on the entire earth. The Bible tells us the times of that generation will be perilous! Blasphemies selfishness rebelliousness gracelessness slanderous hearts hedonistic behavior and a lack of respect for God His church and His commandments will rule the day. As evidenced in the social and cultural wars around the globe it is evident that the world is already choosing its sides. Ironically the Bible declares that a man will arise in the last days. He will be a religious leader who will have great charisma and the uncanny ability to garner support from large sections of unbelieving humanity. Through deceptive words promises and the quasi miraculous this religious leader will then persuade his followers to support one even more sinister than he. This partner in deception will pounce on the opportunity to take the reins of the world under his control. The Sifted Generation explores what life will be like on Earth just before the Lord begins the consummation of all things. The question is: When the Son of Man comes will He really find faith on the Earth? (Luke 18:8). "Against the Tide: An Autobiographical Account of a Professional Outsider; In Against the Tide: An Autobiographical Account of a Professional Outsider Leslie Woods relates the fascinating story of his life from fisherman's son in New Zealand to head of the Mathematical Institute at the University of Oxford. After starting at a trade school he won a scholarship to a university then joined the RNZAF and later became a fighter pilot in the Pacific. Woods then won a Rhodes scholarship to Merton College in Oxford after WWII. Following several years of research in aerodynamics he became a professor of engineering at the University of New South Wales. He also had a fellowship with Oxford's Balliol College and had a consultancy at Culham Laboratory where he researched the theory of magnetically confined hot plasmas. In 1970 Woods became a professor of plasma theory yet became disillusioned with the fusion energy project which he believes survived on exaggerated claims of progress. Besides recounting his history Woods explains why magnetic fusion has failed to succeed and outlines the philosophy of science to which he subscribes. "Que Tal (Spanish Edition); BESTSELLER #1 DEL NEW YORK TIMES Mark R. Levin autor seis veces bestseller #1 del New York Times estrella de Fox News y presentador de radio regresa para explicar cómo aquellos peligros sobre los que nos advirtió hace una década finalmente han ocurrido...y lo que se debe hacer ahora para hacerlos retroceder. Mark R. Levin movilizó a los conservadores en 2009 con Libertad y tiranía el cual brindó un marco filosófico histórico y práctico para detener el ataque liberal contra los valores basados en la Constitución que hizo su aparición durante los años de Obama. Ese libro hablaba de que estábamos parados frente al precipicio del ataque del progresismo a nuestras libertades desde la economía hasta la atención médica y desde el calentamiento global hasta la inmigración. Ahora más de una década después hemos ido más allá de ese precipicio...y estamos pagando el precio. En Marxismo norteamericano Levin explica cómo hoy en día los elementos centrales de la ideología marxista se han generalizado en la sociedad y la cultura estadounidenses—desde nuestras instituciones educativas la prensa y las corporaciones hasta Hollywood el partido Demócrata y la presidencia de Biden—y cómo a menudo se la disfraza con rótulos engañosos como "progresismo" "socialismo democrático" "activismo social" y "activismo comunitario". Con su característico análisis incisivo Levin se sumerge en la psicología y las tácticas de estos movimientos de masas el extendido lavado de cerebro de estudiantes los propósitos antiestadounidenses de la Teoría Crítica de la Raza y del Green New Deal y la escalada de represión y censura para silenciar a voces opositoras e imponer la conformidad. Levin expone a un gran número de instituciones intelectuales académicos y activistas que lideran esta revolución y nos brinda algunas respuestas e ideas sobre cómo confrontarlos. Como escribe Levin: "La contrarrevolución a la Revolución norteamericana está en pleno vigor. Y ya no puede ser desestimada ni ignorada porque está devorando a nuestra sociedad y a nuestra cultura rondando en nuestras vidas cotidianas y omnipresente en nuestra política en nuestras escuelas en los medios y en la industria del entretenimiento". Y tal como hizo antes Levin busca unir al pueblo estadounidense para que defienda su libertad.; ['Political Science'],"

"Liquidated Damages and Extensions of Time: In Construction Contracts; Liquidated damages and extensions of time are complex subjects frequently forming the basis of contract claims made under the standard building and civil engineering contracts. Alongside this the standard forms of contract have also developed over time to reflect prevailing approaches to contractual relationships. Against this background a third edition will be welcomed by construction professionals and lawyers alike. Retaining the overall approach of the previous editions the author clarifies in a highly readable but legally rigorous way the many misunderstandings on time and damages which abound in the construction industry. "Classical Keynesianism Monetary Theory and the Price Level; Since I wrote my small volume on A General Theory of the Price Level etc. I have often been asked for a fuller statement of my views or my attitude on various matters treated only briefly at that time....I hope that the collection of essays that are contained herein fill in many of these gaps and answer the major part of the queries that admit of such elaboration." In my opinion there are two contending theories of the price level: that deriving from the Equation of Exchange in one or another of its forms and that based on cost especially wage phenomena. Thus the debate must be resolved primarily between two major sets of ideas on the subject of inflation. In this light it would be a welcome event if those Keynesians in economics who long ago abandoned the various versions of the Quantity Theory of Money and have little truck with the cost theory of the price level would at least re-examine their views on this subject. It is my deep conviction that most of the literature oriented toward what has been regarded as Keynesian thinking has had very little to contribute toward understanding price level phenomena despite superficial appearances toward the contrary. The importance of this assertion cannot be overstated for in bulk this literature is already voluminous and in teaching importance it represents the dominant modern fashion. Yet in my opinion on the fundamental problems of price level inflation and deflation I believe it to be wholly barren and devoid of substance. Perhaps these essays will reveal the stark nakedness of the concepts in the price dimensions that interest all of us.—Sidney Weintraub;

"The Fate of Meaning: Charles Peirce Structuralism and Literature; This succinct and lucid study examines the thought of the philosopher Charles Peirce as it applies to literary theory and shows that his concept of the sign can give us a fresh understanding of literary art and criticism. John Sheriff analyzes the treatment of determinate meaning and contends that as long as we cling to a notion of language that begins with Saussure's dyadic definition of signs meaning cannot be treated as such any more than can essence or presence. Asserting that Peirce's less familiar position offers a way out of this difficulty Sheriff first discusses the Saussurean-based theory of meaning and then argues for the

advantages of the radically different triadic theory developed by Peirce. Part One of the work reviews and critiques the treatment of meaning in works by Jonathan Culler Tzvetan Todorov Stanley Fish Roland Barthes and Jacques Derrida among others. The focus of this section is on the treatment of meaning in structural and post-structural theories and their common basis in Saussurean linguistics. Part Two provides a readable introduction to Peirce's general theory of signs and develops comprehensively the implications of his semiotic. The substitution of his theory for Saussure's opens our eyes to new and cogent answers to many questions relevant to the meaning of texts. Originally published in 1989. "The death of Jesus; Proclamation of the crucified Messiah is always close at hand when one attempts even the most cursory articulation of the Christian faith. Viewed simultaneously as scandal and eschatological turning-point the cross of Christ is the cornerstone of Christian faith and praxis. This is not to say that the crucifixion of Jesus has at all times and all places been subjected to a single interpretation by Christian believers. Already in the dawning years of the Christian movement Jesus' disciples understood his death in numerous ways utilizing

a variety of images. This study takes as its primary points of departure the prominence of the cross-event for Christians and the variety of its interpretations. Here we seek a partial answer to the question how earliest Christianity understood the death of Jesus. Originally this study took the form of a 1985 University of Aberdeen dissertation.; ['Religion'], "

"Life Story; Each of us has come to our current life stance through a journey of unique experiences--being born at this time growing up in this particular social setting and culture experiencing these specific successes and losses and having these significant relationships. Whether we are in the early middle or latter part of our personal faith story the ending is still ahead of us--and reviewing our own faith story helps us chart our course into the future. Using psychologist Dan McAdams's idea that we make sense of life by composing our own life story author Bradley Hanson explores how our personal identity and spirituality are influenced by the meaning and values embedded in our childhood family life and major story lines promoted by our culture. In our most basic quest to make sense of life he considers sharply contrasting answers to five fundamental questions. With reflection and suggested group discussion questions at the end of each chapter this study explores the idea that spirituality and one's life story are intimately connected. Praise for Spirituality and Your Life Story "Real people tell their stories of success love friendship forgiveness and loss. "The Rhetoric of Empire: Colonial Discourse in Journalism Travel Writing and Imperial Administration (Post-Contemporary Interventions); The white man's burden darkest Africa the seduction of the primitive: such phrases were widespread in the language Western empires used to talk about their colonial enterprises. How this language itself served imperial purposes--and how it survives today in writing about the Third World--are the subject of David Spurr's book a revealing account of the rhetorical strategies that have defined Western thinking about the non-Western world. Despite historical differences among British French and American versions of colonialism their rhetoric had much in common. The Rhetoric of Empire identifies these shared features--images figures of speech and characteristic lines of argument--and explores them in a wide variety of sources. A former correspondent for the United Press International the author is equally at home with journalism or critical theory travel

writing or official documents and his discussion is remarkably comprehensive. Ranging from T. E. Lawrence and Isak Dineson to Hemingway and Naipaul from Time and the New Yorker to the National Geographic and Le Monde from journalists such as Didion and Sontag to colonial administrators such as Frederick Lugard and Albert Sarraut this analysis suggests the degree to which certain rhetorical tactics penetrate the popular as well as official colonial and postcolonial discourse. Finally Spurr considers the question: Can the language itself—and with it Western forms of interpretation—be freed of the exercise of colonial power? This ambitious book is an answer of sorts. By exposing the rhetoric of empire Spurr begins to loosen its hold over discourse about—and between—different cultures.; ['Language Arts & Disciplines'], "

"The First Industrial Woman; Why study women and the industrial revolution? Deborah Valenze's groundbreaking reassessment of this classic problem in European history reminds us that questions of gender and work are at the center of our experience in the modern world. Too often the study of industrialization charts an inevitable and largely technological course. Valenze sets aside this approach in order to examine the underlying assumptions about gender and work that informed the transformation of English society and in turn our ideas about economic progress. How did England change from an agriculturally based nation in which female labor played an active and acknowledged part to an industrial power resting on a notion of male productivity? Through selective treatments of agriculture spinning and cottage industries Valenze shows how the rise of values of productivity and rationality subordinated women of the working class and strengthened an emerging ethos of individualism. She also analyzes the influential ideas of Thomas Malthus Hannah More and other authors whose publications reinforced these same tendencies in the early nineteenth century. In an elegant and compelling account Valenze charts the birth of a new economic order resting on social and sexual hierarchies which remain a part of our contemporary lives.; ['History'], "

continuing cycle of catastrophes and extinctions There are a number of puzzling mysteries in the history of Earth that have yet to be satisfactorily explained by mainstream science: the extinction of the dinosaurs the vanishing of ancient Indian tribes the formation of the mysterious Carolina Bays the disappearance of the mammoths the sudden ending of the last Ice Age and the cause of huge underwater landslides that sent massive tsunamis racing across the oceans millennia ago.

Eyewitness accounts of these events are chronicled in rich oral traditions handed down through generations of native peoples. The authors' recent scientific discoveries link all these events to a single cause. In *The Cycle of Cosmic Catastrophes* Richard Firestone Allen West and Simon Warwick-Smith present new scientific evidence about a series of prehistoric cosmic events that explains why the last Ice Age ended so abruptly. "Airlines and Air Mail: The Post Office and the Birth of the Commercial Aviation Industry; Conventional wisdom credits only entrepreneurs with the vision to create America's commercial airline industry and contends that it was not until Roosevelt's Civil Aeronautics Act of 1938 that federal airline regulation began. In Airlines and Air Mail F. Robert van der Linden persuasively argues that Progressive republican policies of Herbert Hoover actually fostered the growth of American commercial aviation. Air mail contracts provided a critical indirect subsidy and a solid financial foundation for this nascent industry. Postmaster General Walter F. Brown used these contracts as a carrot and a stick to ensure that the industry developed in the public interest while guaranteeing the survival of the pioneering companies. Bureaucrats entrepreneurs and politicians of all stripes are thoughtfully portrayed in this thorough chronicle of one of America's most resounding successes the commercial aviation industry.; ['History'],"

"Indonesia's Secret War: The Guerilla Struggle in Irian Jaya; This book describes the historical development of the Irian Jaya guerrilla struggle for independence from Indonesia. The OPM Organisasi Papua Merdeka has been fighting Indonesian rule in West New Guinea since 1969; the military presence there was established in 1962. The author believes that the great majority of West Papuans support the OPM. The Indonesian Transmigration programme has forcible alienated clan land and sponsored settlers from Java. As a result of this policy 10000 Papuans fled Irian Jaya in mid-1984 to seek safety in Papua New Guinea. The exodus was more than 1 per cent of the indigenous population. The OPM has almost no foreign allies. Both Papua New Guinea and Australia emphasize that Irian Jaya is part of Indonesia and thus an internal matter. The author predicts that greater autonomy for Irian Jaya would be more likely to result from political pressure on Jakarta than from a military victory by OPM.; ['Indonesia'],"

"Skepticism and Humanism: The New Paradigm; As we begin the third millennium there is cause for cautious optimism regarding the human

prospect. Democratic revolutions and the doctrine of universal human rights have captured the imagination of large sectors of humanity while major advances in science and technology continue to conquer disease and extend life contributing to rising standards of living affluence and cultural freedom on a worldwide basis. Paradoxically at the same time ancient authoritarian fundamentalist religions have grown in vitriolic intensity along with bizarre New Age media-driven paranormal belief systems. Also surprising is the resurgence of primitive tribal and ethnic loyalties unleashing wars of intolerance and bitterness. In Skepticism and Humanism Paul Kurtz locates these threatening developments within a long-standing and largely unchallenged theological worldview. He proposes as an alternative to religion a new cultural paradigm rooted in scientific naturalism rationalism and a humanistic outlook. An estimated 60 percent of scientists are atheists or agnostics. However the skeptical world view has been given little currency even in advanced societies because of a cultural prohibition against the criticism of religion. At the same time science has become increasingly narrow and specialized so that few people can draw on its broader intellectual and cultural implications. Skepticism and Humanism attempts to meet this need. It defends skepticism as a method for developing reliable knowledge by using scientific inquiry and reason to test all claims to truth. It also defends scientific naturalism—an evolutionary view of nature life and the human species. Kurtz sees the dominant religious doctrines as drawn from an agricultural/nomadic past and emphasizes the need for a new outlook applicable to the postindustrial information age. At the same time he rejects postmodernism for abandoning science and embracing a form of nihilism. There can be no doubt that as a new global civilization emerges scientific naturalism rationalism and secular humanism have something significant to say about the meaning of life. Skepticism and Humanism shows how they can to foster democratic values and social prosperity. The book will be important for philosophers scientists and all those concerned with contemporary issues. Paul Kurtz taught at Trinity College Vassar College and State University of New York at Buffalo. He is founder of Prometheus Books a major publisher of philosophical works. He is the author of some thirty books including Toward a New Enlightenment (available from Transaction) Humanist Manifesto 2000 and A Secular Humanist Declaration. He is chairman of the Committee for the Scientific Investigation of Claims of the Paranormal and editor-in-chief of Free Inquiry magazine.; ['Philosophy'], "

"Realistic Compiler Generation (Foundations of Computing); In this book Peter Lee provides a complete description and survey of the field of semantics based compiler generation and presents a new method for expressing the formal semantics of programming languages that allows realistic compilers to be generated automatically. The method Lee describes has two main advantages over previous methods. First it allows compilers to be generated automatically. The compilers are realistic in the sense that they compile programs as efficiently as hand crafted compilers do and the object programs they produce run as efficiently as the object programs produced by hand crafted compilers. The second advantage is that it makes it easier to comprehend and write the semantics than other methods. The book demonstrates a working compiler generator called MESS which is used to generate a realistic compiler for a Pascal-like language. The generated compiler is then compared with several hand crafted compilers and shown to have at least comparable and in some cases superior performance. Peter Lee is Assistant Professor of Computer Science at Carnegie Mellon University. "The Cherokees; This powerful narrative traces the social cultural and political history of the Cherokee Nation during the forty-year period after its members were forcibly removed from the southern Appalachians and resettled in what is now Oklahoma. In this master work completed just before his death William McLoughlin not only explains how the Cherokees rebuilt their lives and society but also recounts their fight to govern themselves as a separate nation within the borders of the United States. Long regarded by whites as one of the 'civilized' tribes the Cherokees had their own constitution (modeled after that of the United States) elected officials and legal system. Once re-settled they attempted to reestablish these institutions and continued their long struggle for self-government under their own laws--an idea that met with bitter opposition from frontier politicians settlers ranchers and business leaders. After an extremely divisive fight within their own nation during the Civil War Cherokees faced internal political conflicts as well as the destructive impact of an influx of new settlers and the expansion of the railroad. "The Press; The book as object as content as idea as interface. What is the book in a digital age? Is it a physical object containing pages encased in covers? Is it a portable device that gives us access to entire

libraries? The codex the book as bound paper sheets emerged around 150 CE. It was preceded by clay tablets and papyrus scrolls. Are those books? In this volume in the MIT Press Essential Knowledge series Amaranth Borsuk considers the history of the book the future of the book and the idea of the book. Tracing the interrelationship of form and content in the book's development she bridges book history book arts and electronic literature to expand our definition of an object we thought we knew intimately. Contrary to the many reports of its death (which has been blamed at various times on newspapers television and e-readers) the book is alive. Despite nostalgic paeans to the codex and its printed pages Borsuk reminds us the term "book" commonly refers to both medium and content. And the medium has proved to be malleable. Rather than pinning our notion of the book to a single form Borsuk argues we should remember its long history of transformation. Considering the book as object content idea and interface she shows that the physical form of the book has always been the site of experimentation and play. Rather than creating a false dichotomy between print and digital media we should appreciate their continuities.; ['Literary Criticism'], "

"Snorri Sturluson: Ein biografi (Norwegian Edition);

'Fascinating...sumptuously produced with lots of full-colour images is a kind of potted treasury of cartographical history that gleams with pieces-of-eight-like snippets of information...this is an enthralling book and joins the likes of Simon Garfield's On the Map and Jerry Brotton's A History of the World in Twelve Maps in the field of popular reaffirmations of the ingenuity of geography.' Travis Elborough Spectator 'A fascinating book that I will always treasure.' Sir Ranulph Fiennes 'This wonderful book is a reminder of how much careful thought was given to the shape of the world even in ancient times - the landscape how places are related to one another. I pored over these maps for hours imagining those minds hard at work visualising how it all connected as a whole. Just brilliant.' Neil Oliver 'Visually stunning...it's gone straight to the top of my Christmas present list.' The Bookseller 'I remember how well I liked to turn the pages of my childhood atlas and travel the world to find out where countries and cities were. But there was never anything about why the maps were created - or who drew them. Theatre of the World was my big chance to tell the stories of all those men and women map makers whose amazing work deserves to be celebrated.' Thomas Reinertsen Berg Beautifully illustrated and rich in detail Theatre

of the World reignites our curiosity with the world both ancient and modern. Before you could just put finger to phone to scroll Google Maps in advance of the era of digital mapping and globes maps were being constructed from the ideas and questions of pioneering individuals. From visionary geographers to heroic explorers from the mysterious symbols of the Stone Age to the familiar navigation of Google Earth Thomas Reinertsen Berg examines the fascinating concepts of science and worldview of art and technology power and ambitions practical needs and distant dreams of the unknown.; ['History'], "

"The Blue and the Gray Undercover; Battles were won with bullets and sabers on the battlefields of the War Between the States for sure. But often the outcome of those battles was affected by the heroic acts of spies--both Union and Confederate. Such heroes unsung while they did their vital work included those whose true stories are told in the pages of this book: • Elizabeth Van Lew: Her Richmond Virginia neighbors thought her eccentric--or crazy--but her odd behavior covered her activities as a spy for the Union army. • Belle Boyd: A daring Confederate spy whose charm and beauty were exceeded only by her boldness and resourcefulness in eluding Union's efforts to capture her. • Serena Freneau: A beautiful spy who seduced secrets from Union officers--even marrying one of them! • Timothy Webster: A Union spy who dared to infiltrate the South's infamous ""Knights of Liberty"" as a double agent. Their exploits and the other tales in this extraordinary volume are as thrilling as any spy stories from the past or present--and many of them are true history. The Blue and the Gray Undercover No war is won on the battlefield alone and the Civil War was no exception. Behind the lines behind closed doors in disguise spies for both the Union and the Confederacy did what spies have always done: seek out information that will help their side get some advantage over the enemy. In the pages of this unique volume some of the most gifted storytellers of our generation write about many different spies. Editor Ed Gorman has brought together never-before-published tales of undercover work during the War Between the States by such bestselling authors as Doug Allyn John Lutz Brendan DuBois Loren D. Estleman and by other talented writers including Janet Berliner James H. Cobb Bill Crider Jane Haddam Edward D. Hoch Marie Jakober Jane Lindskold P. G. Nagle Gary Phillips Robert J. Randisi Kristine Kathryn Rusch Aileen Schumacher and Ray Vukcevich. In cities and in the wild north and south of the Mason-Dixon line in the Atlantic Ocean the Caribbean Sea--even in Canada--these stories capture the tension and excitement of the high-stakes risks numberless people took to help their side in the terrible war that sundered a nation. Not all the stories are based on fact but all show people doing the kinds of things that were actually done to win the war with brains instead of bullets. The result is a fascinating look at a little-known part of our Civil War heritage. "Battle of Jutland 1916; Dramatic illustrated account of the biggest naval battle of the First World War. On 31 May 1916 the great battle fleets of Britain and Germany met off Jutland in the North Sea. It was a climactic encounter the culmination of a fantastically expensive naval race between the two countries and expectations on both sides were high.

For the Royal Navy's Grand Fleet there was the chance to win another Trafalgar. For the German High Seas Fleet there was the opportunity to break the British blockade and so change the course of the war. But Jutland was a confused and controversial encounter. Tactically it was a draw; strategically it was a British victory. Naval historians have pored over the minutiae of Jutland ever since. Yet they have largely ignored what the battle was actually like for its thousands of participants. Full of drama and pathos of chaos and courage JUTLAND 1916 describes the sea battle in the dreadnought era from the point of view of those who were there.; ['History'], "

"Sherston's progress (Penguin books); The third volume in Siegfried Sassoon's beloved trilogy The Complete Memoirs of George Sherston with a new introduction by celebrated historian Paul Fussell A highly decorated English soldier and an acclaimed poet and novelist Siegfried Sassoon won fame for his trilogy of fictionalized autobiographies that wonderfully capture the vanishing idylls of Edwardian England and the brutal realities of war. Having been deemed mentally ill for his anti-war sentiments and sent for treatment George Sherston comes under the care of neurologist Dr. W. H. R. Rivers who allows Sherston to sort through his attitudes toward the fighting (events that have also been semi-fictionalized by Pat Barker for her bestselling and critically acclaimed Regeneration Trilogy). After six months in the hospital Sherston leaves to rejoin his regiment. He is soon dispatched to Ireland where he attempts to reclaim some of the idyllic fox-hunting days of his youth then to Palestine. He finally ends up at the Western Front in France where he is shot in the head while on a reconnaissance mission and invalidated back home. As the capstone of Sassoon's masterful Sherston trilogy Sherston's Progress—whose evocation of Bunyan's Pilgrim's Progress is not at all accidental—literally brings home the unforgettable journey of George Sherston from aristocratic childhood through war hero and anti-war martyr all the way to wounded veteran trying to move on from the Great War. "The Guvnor; THIS IS THE CLASSIC BOOK THAT STARTED AN ENTIRE GENRE - THE STORY OF THE MOST ICONIC HARDMAN OF THEM ALL. Lenny McLean was one of the deadliest bareknuckle fighters Britain has ever seen. He had dear powerful friends but he also had terrible enemies. So much so that he had two bullet wounds in his back - each from a different attack. He was also stabbed repeatedly - always from behind. But Lenny was also a warm big-hearted grizzly bear of a man whose main weakness was an overwhelming desire to put the welfare of his mates ahead of his own well-being. In his extraordinary autobiography he tells of how the mafia flew him to New York to take on their greatest bareknuckle boxer in a multi-million pound illicit bout. The Mafia's man lasted less than three minutes. When the IRA fronted up a London gang in a money-laundering scam Lenny was brought in to intimidate the terrorists. The IRA not surprisingly backed off. . . His most serious trial came when he was accused of murder. Fighting to prove his innocence against a minimum sentence of twenty-five years Lenny never gave up - and went on to be found not guilty. This is a tale of one man's triumph against almost insurmountable odds in a battle that Len fought every day for himself and to 'put steam on the table' for his wife and kids.; ['True Crime'], "

Ridd's rivalry with the villainous Carver Doone reaches a dramatic climax that will determine Lorna's future happiness. First published in 1869 Lorna Doone was praised by R. L. Stevenson and Thomas Hardy and has remained constantly in print. The novel has many aspects: it is a romance; a historical novel set at the time of the Monmouth Rebellion in the seventeenth century; and a new development in the pastoral tradition. Underneath an ostensibly idyllic evocation of rural bliss and tale of love and high adventure lies a solid defence of Victorian social values and a hero whose self-doubt prompts him constantly to prove himself.

"The Mask of Sanity: An Attempt to Clarify Some Issues about the So-called Psychopathic Personality; Originally published in 1941 under the title Mask of Sanity: An Attempt to Clarify Some Issues About the So-Called Psychopathic Personality this influential book became a landmark in psychiatric case studies and was repeatedly revised expanded and reprinted in subsequent editions--here we present the 3rd edition published in 1955. The Mask of Sanity is distinguished by its central thesis that the psychopath exhibits normal function according to standard psychiatric criteria yet privately engages in destructive behavior. The book was intended to assist with detection and diagnosis of the elusive psychopath for purposes of palliation and offered no cure for the condition itself. The idea of a master deceiver secretly possessed of no moral or ethical restraints yet behaving in public with excellent function electrified American society and led to heightened interest in both psychological introspection and the detection of hidden psychopaths in society at large leading to a refinement of the word itself into what was perceived to be a less stigmatizing term "sociopath".;

"The Case That Never Dies: The Lindbergh Kidnapping; Essential reading for anyone interested in the most famous American crime of the twentieth century Since its original publication in 2004 The Case That Never Dies has become the standard account of the Lindbergh Kidnapping. Now in a new afterword historian Lloyd C. Gardner presents a surprise conclusion based on recently uncovered pieces of evidence that were missing from the initial investigation as well as an evaluation of Charles Lindbergh's role in the search for the kidnappers. Out of the controversies surrounding the actions of Colonel Lindbergh Norman Schwarzkopf commander of the New Jersey State Police and FBI director J. Edgar Hoover Gardner presents a well-reasoned argument for what happened on the night of March 1 1932. The Case That Never Dies places the Lindbergh kidnapping investigation and trial in the context of the Depression when many feared the country was on the edge of anarchy. Gardner delves deeply into the aspects of the case that remain confusing to this day including Lindbergh's dealings with crime baron Owney Madden Al Capone's New York counterpart as well as the inexplicable exploits of John Condon a retired schoolteacher who became the prosecution's best witness. The initial investigation was hampered by Colonel Lindbergh who insisted that the police not attempt to find the perpetrator because he feared the investigation would endanger his son's life. He relented only when the child was found dead. After two years of fruitless searching Bruno Richard Hauptmann a German immigrant was discovered to have some of the ransom money in his possession. Hauptmann was arrested tried and sentenced to death. Throughout the book Gardner pays special attention to the evidence of the case and how it was used and misused in the trial. Whether Hauptmann was guilty or not Gardner concludes that there was

insufficient evidence to convict him of first-degree murder. Set in historical context the book offers not only a compelling read but a powerful vantage point from which to observe the United States in the 1930s as well as contemporary arguments over capital punishment.; ['History'], "

"Memoirs of an Infantry Officer; The second volume in Siegfried Sassoon's beloved trilogy The Complete Memoirs of George Sherston with a new introduction by celebrated historian Paul Fussell A highly decorated English soldier and an acclaimed poet and novelist Siegfried Sassoon won fame for his trilogy of fictionalized autobiographies that wonderfully capture the vanishing idylls of Edwardian England and the brutal realities of war. The second volume of Siegfried Sassoon's semiautobiographical George Sherston trilogy picks up shortly after Memoirs of a Fox-hunting Man: in 1916 with the young Sherston deep in the trenches of WWI. For his decorated bravery and also his harmful recklessness he is soon sent to the Fourth Army School for officer training then dispatched to Morlancourt a raid and on through the Somme. After being wounded by a bullet through the lung he returns home to convalesce where his questioning of the war and the British Military establishment leads him to write a public anti-war letter (verbatim the letter Sassoon wrote in 1917 entitled ""Finished with the War: A Soldier's Declaration"" which was eventually read in the British House of Commons). Through the help of close friend David Cromlech (based on Sassoon's friend Robert Graves) a medical board decides not to prosecute but instead deem him to be mentally ill suffering from shell-shock and sends him to a hospital for treatment. Sassoon's stunning portrayal of a mind coming to terms with the brutal truths he has encountered in war—as well as his unsentimental though often poetic portrayal of class-defined life in England at wartime—is amongst the greatest books ever written about World War I or war itself. For more than seventy years Penguin has been the leading publisher of classic literature in the English-speaking world. "The Silent War: The Cold War Battle Beneath the Sea; The Cold War was the first major conflict between superpowers in which victory and defeat were unambiguously determined without the firing of a shot. Without the shield of a strong silent deterrent or the intellectual sword of espionage beneath the sea that war could not have been won. John P. Craven was a key figure in the Cold War beneath the sea. As chief scientist of the Navy's Special Projects Office which supervised the Polaris missile system then later as head of the Deep Submergence Systems Project (DSSP) and the Deep Submergence Rescue Vehicle program (DSRV) both of which engaged in a variety of clandestine undersea projects he was intimately involved with planning and executing America's submarine-based nuclear deterrence and submarine-based espionage activities during

the height of the Cold War. Craven was considered so important by the Soviets that they assigned a full-time KGB agent to spy on him. Some of Craven's highly classified activities have been mentioned in such books as *Blind Man's Bluff* but now he gives us his own insights into the deadly cat-and-mouse game that U.S. and Soviet forces played deep in the world's oceans. Craven tells riveting stories about the most treacherous years of the Cold War. In 1956 *Nautilus* the world's first nuclear-powered submarine and the backbone of the Polaris ballistic missile system was only days or even hours from sinking due to structural damage of unknown origin. Craven led a team of experts to diagnose the structural flaw that could have sent the sub to the bottom of the ocean taking the Navy's missile program with it. Craven offers insight into the rivalry between the advocates of deterrence (with whom he sided) and those military men and scientists such as Edward Teller who believed that the United States had to prepare to fight and win a nuclear conflict with the Soviet Union. He describes the argument that raged in the Navy over the reasons for the tragic loss of the submarine *Thresher* and tells the astonishing story of the hunt for the rogue Soviet sub that became the model for *The Hunt for Red October* -- including the amazing discovery the Navy made when it eventually found the sunken sub. Craven takes readers inside the highly secret DSSP and DSRV programs both of which offered crucial cover for sophisticated intelligence operations. Both programs performed important salvage operations in addition to their secret espionage activities notably the recovery of a nuclear bomb off Palomares Spain. He describes how the Navy's success at deep-sea recovery operations led to the takeover of the entire program by the CIA during the Nixon administration. A compelling tale of intrigue both within our own government and between the U.S. and Soviet navies *The Silent War* is an enthralling insider's account of how the submarine service kept the peace during the dangerous days of the Cold War.; ['History'], "

"King Manasseh and Child Sacrifice; The Hebrew Bible portrays King Manasseh and child sacrifice as the most reprehensible person and the most objectionable practice within the story of 'Israel'. This monograph suggests that historically neither were as deviant as the Hebrew Bible appears to insist. Through careful historical reconstruction it is argued that Manasseh was one of Judah's most successful monarchs and child sacrifice played a central role in ancient Judahite religious practice. The biblical writers motivated by ideological concerns have thus deliberately distorted the truth about Manasseh and child sacrifice.; ['Religion'], "

"The Engaged Spiritual Life: A Buddhist Approach to Transforming Ourselves and the World; A Buddhist meditation teacher offers a new path to transformation-within ourselves and within the wider world—that

integrates spiritual wisdom and social action. By the time Donald Rothberg was in his early twenties he knew he had two vocations. He wanted to dedicate himself to justice and social change and he wanted to commit himself to exploring the depths of human consciousness—to an awakening of our deeper spiritual nature. It has been his life's work as an activist organizer writer and teacher to bring these two paths together and to reveal how deeply they require one another. The Engaged Spiritual Life is the fruit of this work. Skillfully weaving together basic spiritual teachings real-life examples social context and exercises Rothberg provides a clear thorough and compelling guide for those interested in connecting inner and outer transformation. "Gift of Life; ""Organ transplants are a very controversial and unique area of medicine. Those of us who work as Transplant Coordinators were frequently referred to by hospital staff as 'organ vultures' behind our backs but also many times within earshot. I felt this reference to extremely ugly birds was unfair and short sighted. I did say once in a while to a difficult staff person 'if your kid needed a transplant wouldn't you hope that someone was out there being as ethically aggressive about finding an organ as they can?' That usually shut them up quickly."" -- from the Foreword One of the miracles of modern medicine is the ability of surgeons to transplant organs. Often it's the only way to save the life of a person whose own kidneys lungs liver or heart are failing. But with barely 2 percent of critically ill patients suitable for organ donation the demand far exceeds the number of organs that become available. The Gift of Life is about the remarkable world of organ transplant coordinators profiles of the men and women who locate and arrange for the donation of organs from those who are dying and wish to live on in others' bodies through this selfless gift. Traci Graf tells the riveting story of this unique and demanding branch of medicine. Transplant coordinators review the medical files and charts on all patients whose condition is so severe that they are not expected to live. Their task is to convince the patient (or the patient's family) to allow organs to be donated immediately upon death. The transplant coordinator works to saves lives by finding and obtaining consent for as many organ donations as possible. In The Gift of Life transplant coordinator Traci Graf recounts the stress drama and joy of working long hours dealing with emotionally distraught family members and overworked medical staff and the emotional toll of a job that means the difference between life and death for the recipients. Packed with riveting first person narrative The Gift of Life will appeal to anyone interested in modern medical practice and the lives and challenges faced by nurses and doctors who work to

"An Introduction to the French Poets: Villon to the Present Day.; The French poetry of some five centuries is here surveyed in a series of studies of the work and personality of individual poets from Villon to the present day. Each chapter is primarily concerned with establishing the 'literary identity' of the poet or poets with whom it deals: the work of each is outlined and related to the historical and biographical circumstances in which it was written; and its characteristics are then examined critically in terms relevant to the modern reader. Comparisons are made between different poets and more general topics - such as the concepts of 'classic' and 'baroque' - are discussed. This book first published in 1956 had become a standard introductory work for students of French poetry and general readers alike. For this revised edition originally published in 1973 new chapters have been added on 'irregular' seventeenth-century poets and on various modern poets whose work now enables the Surrealist movement to be seen in clearer perspective. The bibliography has been revised extensively.; ['Literary Criticism'], "

"A Brief History of Imbecility: Poetry and Prose of Takamura Kotaro; Takamura Kotaro (1883-1956) drew on his studies in New York London and Paris to lay the foundations in Japan for Western-style Japanese sculpture through his intricate wood carvings and powerful bronzes. But Takamura also composed poems infused with startling energy directness and narrative clarity. Among the first to use the vernacular masterfully in verse he has long been recognized as one of Japan's premier modern poets. The poetry included here is divided into three parts: ""The Journey"" represents a chronology of the poet's life; ""Chieko"" is a selection of poems about Takamura's wife which describes his devotion to her for more than thirty years through courtship and marriage during her illness and insanity and continuing after her death; and ""A Brief History of Imbecility"" is a sequence of twenty autobiographical poems composed in 1947. The essays appearing in English for the first time offer a more complete understanding of Takamura's relationship to art his complex experience of Paris and his views on beauty and creativity. Included here are ""The Latter Half of Chieko's Life"" a moving prose complement to the

Chieko poems and ""A Last Glance at the Third Ministry of Education Art Exhibition"" a scathing review of the modern art world the first of its kind in Japan.; ['Poetry'], "

"The outbreak of rebellion (Campaigns of the civil war); John G. Nicolay (1832-1901) was an undeniably apt and brilliant choice to inaugurate the landmark Campaigns of the Civil War series. Private secretary to President Lincoln and coauthor (with John Hay) of the monumental ten-volume Lincoln biography Nicolay experienced the Civil War from a unique vantage point: living in the White House witnessing the many momentous events and minor wranglings sharing the nation's trauma with Lincoln and winning his open confidence. It is Nicolay's firsthand knowledge and personal observations of the key figures that imbue The Outbreak of Rebellion (1881) with immediacy and thrust. Here is the secession fever that swept the South; Lincoln's shrewd and desperate maneuverings to hold the border states; the behind-the-scenes debates about how to respond to the crisis; the attack on Fort Sumter and the call to arms; and the hard-fought battle along Bull Run creek that resulted in a chaotic Federal defeat and the first appalling casualties of the war. Nicolay's insider view of the opening act of the Civil War has produced a succinct compelling account of considerable value and fascinating insights.;

"Gesture and Speech (October Books); Combines in one volume Technics and Language and Memory and Rhythms the cornerstones of Leroi-Gourhan's comprehensive theory of human behavior and cultural development AndrÃ© Leroi-Gourhan (1911-1986) was an anthropologist and paleontologist whose theoretical endeavors extended well beyond those realms to encompass the culture of the twentieth century and its most advanced developments. His bold and coherent revision of both analytic and archaeological methods revolutionized the study of prehistoric culture. His adoption of the structuralist method for the analysis of prehistoric art enabled a radical rethinking and clearer understanding of its nature with resulting implications for the understanding of the art of our own times and for a broad range of contemporary issues. Leroi-Gourhan was for example concerned with questions of communication particularly the ways in which new techniques of communication reshape our understanding of language and writing. His work in this field has proved catalytic for the thinking of other major theorists among them Jacques Derrida. Gesture and Speech combines in one volume Technics and Language and Memory and Rhythms which are the cornerstones of Leroi-Gourhan's comprehensive theory of human behavior and cultural development. In Technics and Language Leroi-Gourhan looks at prehistoric technology in relation to the development of cognitive and linguistic faculties expanding on the cultural ramifications of erect posture a short face a free hand during locomotion and possession of movable implements. Memory and Rhythms approaches its subject from the standpoints of sociology and aesthetics. Here Leroi-Gourhan addresses the problems of instinct and intelligence. He defines the relationship between aesthetic behavior on the one hand and species attitudes and the personalization of ethnic groups on the other and undertakes a sweeping aesthetic analysis from visceral perception to figurative art including a discussion of the ""language of forms"" that makes figurative art an abstract expression of language.; ['Social Science'], "

"The Triumph of the Moon: A History of Modern Pagan Witchcraft; 'a brilliant history' The Sunday Times 'makes for riveting reading' The Independent Modern pagan witchcraft is arguably the only fully-formed religion England has given the world and has now spread across four continents. This second edition of The Triumph of the Moon extensively revises the first full-scale scholarly study of modern pagan witchcraft. Ronald Hutton examines the nature and development of this religion and offers a history of attitudes to witchcraft paganism and magic in British society since 1800. Its pages reveal village cunning folk Victorian ritual magicians classicists and archaeologists leaders of woodcraft and scouting movements Freemasons and members of rural secret societies. We also find some of the leading figures of English literature from the Romantic poets to W. B. Yeats D. H. Lawrence and Robert Graves as well as the main personalities who have represented pagan witchcraft to the public world since 1950. Thriller writers like Dennis Wheatley and films and television programmes get similar coverage as does tabloid journalism. The material is by its nature often sensational and care is taken throughout to distinguish fact from fantasy in a manner not previously applied to most of the stories involved. Meticulously researched The Triumph of the Moon presents an authoritative insight into an aspect of modern cultural history which has attracted sensational publicity but has hitherto been little understood. Revealing details of their daily life veterans' families have contributed to this book in an effort to enumerate the lives of those tasked with the prisons operation. Tasked with ensuring the convict's National Socialist spirit remained undamaged by their punishment these guards provided the malfeasance elements of Himmler's Army with a suitable SS environment. Eventually these institutions become portals through which inmates returned to the Front and this process is examined alongside a history of the various field probation units. Here Himmler commanded the parolees face death or serious wounding as the means to earn their full rehabilitation. "Visual Basic .NET Text Manipulation Handbook: String Handling and Regular Expressions; This title is for VB .NET programmers who want to write secure code - which should be all of them. .NET provides a powerful framework in which to write secure code but unless you understand how attackers think and how the .NET security systems works your code will still be vulnerable. .NET helps reduce the likely hood of common vulnerabilities such as buffer overruns and provides an extremely powerful code access security system - when it is used properly. Writing secure .NET code requires three things: an understanding of the .NET code security system attention to detail and the ability to think from the point of view of an attacker. Many security vulnerabilities in fact have little to do with the security system but rather are a result of treating hostile input as non-hostile. This book is a practical reference of the .NET security framework and demonstrates best practices that will go a long way towards making your code secure in the face of attacks. It also

provides plenty of examples of common mistakes enabling you to spot them in your own (and others) code.; ['Computers'], "

"The French Physician's Boy: A Story of Philadelphia's 1793 Yellow Fever Epidemic; Sixteen-year-old Matthew is not at all happy to start the long ship voyage to North America from his native Dutch-ruled colony of Surinam but he is not free to control his fate. Either he leaves for Philadelphia with his master or he will be sold at slave auction. Matts owner Dr. David de Cohen Nassy a Jewish planter and unofficial physician bankrupt and depressed seeks a new start in North America. When he travels there in 1792 he also takes his Negro slave who was born on the now-lost Nassy coffee plantation and knows no family but that of his master. Gradually Matt comes to believe that life in the new world could hold great promise for him too. Once in Philadelphia Matts master rises to social and professional success and becomes a naturalized American citizen. Matt too adapts rapidly to his new life in the city. He meets and befriends Jed another young slave who inspires Matt to hope for freedom. Best of all Matt persuades his master to allow him to learn how to read and write. When the first American hot-air balloon flight is launched from Philadelphia Matt is a proud spectator as he watches his master participate in the event. When Matt overhears his master speaking to a friend about the prevailing anti-slavery movement greatly favored in Philadelphia he believes Dr. Nassy is thinking of liberating him. He is terribly disappointed when this does not happen. Within a year a major yellow fever epidemic breaks out in Philadelphia. The city is in panic and distress. Five thousand people die one out of every four citizens. Matt becomes a great help his master and his steady companion. He carries the doctors black bag on his medical visits observes how his master

medicates the sick and secretly dreams he too might become a healer one day. Dr. Nassy's West Indian experience with tropical diseases saves the lives of his patients. But the same skill that aids the survival of the sick incurs the enmity of Philadelphia's medical establishment whose patients die in droves. In his way Matt tries to support his master and protects him from verbal attacks by the servants of some leading city physicians. Matt visits Bush Hill the local pest house with Dr. Nassy. There a fellow West Indian colleague is the chief physician. In the presence of Dr. Nassy he performs several autopsies that confirm to Matt's master his medical treatment methods are justified. After the epidemic Matt again hopes that he will finally be emancipated but his owners financial problems prevent it. The doctor opens an apothecary shop in Philadelphia and needs Matt to help him run it. His master's health is not compatible with the Philadelphia climate. As soon as the French Revolution establishes cherished civil rights in Europe and European colonies Dr. Nassy decides to return to Surinam and his home in the Jooden Savanna the Jewish settlement. Before he leaves Philadelphia he takes Matt to the Abolition Society and in a formal ceremony signs the document which will eventually free Matt. En route home Matt is a proud witness as the Danish government honors Dr. Nassy with an official doctorate for his successful Yellow Fever work in Philadelphia. Although social conditions in eighteen-century Surinam are not sufficiently advanced to allow either a Jew or a black man to attend medical school Matt manages to practice healing among his own people once he becomes a free man. "CliffsNotes on The Importance of Being Earnest (Cliffsnotes Literature); The Importance of Being Earnest is a play by Oscar Wilde. It is a farcical comedy in which the protagonists maintain fictitious personae in order to escape burdensome social obligations. Working within the social conventions of late Victorian London the play's major themes are the triviality with which it treats institutions as serious as marriage and the resulting satire of Victorian ways. Contemporary reviews all praised the play's humor though some were cautious about its explicit lack of social messages while others foresaw the modern consensus that it was the culmination of Wilde's artistic career so far. Its high farce and witty dialogue have helped make The Importance of Being Earnest Wilde's most enduringly popular play. The successful opening night marked the climax of Wilde's career but also heralded his downfall. The Marquess of Queensberry whose son Lord Alfred Douglas was Wilde's lover planned to present the writer with a bouquet of rotten vegetables and disrupt the show. Wilde was tipped off and Queensberry was refused admission. Soon afterwards their feud came to a climax in court where Wilde's homosexual double life was revealed to the Victorian public and he was eventually sentenced to imprisonment. His notoriety caused the play despite its early success to be closed after 86 performances. After his release he published the play from exile in Paris but he wrote no further comic or dramatic work.; ['Drama'], "

"An Outline of Orthodox Patristic Dogmatics; The late Professor John Romanides a graduate and subsequently a Professor of Holy Cross Greek Orthodox School of Theology in Brookline Massachusetts (1958-1965) and a Professor of the Aristotle University of Thessalonica Greece (1968-1984) was one of the most original theologians of Eastern Orthodox Christianity worldwide in the second half of the 20th century. Raised in America and having become familiar with Western Christians Roman Catholics and Protestants as well as Western theological scholarship both through his upbringing and his involvement in the modern Ecumenical Dialogues he developed a critical and highly original Eastern Orthodox approach to Christian theology. He identified his approach with the Christian Roman ecumene that was centered in Constantinople New Rome. His views on Christian Romancy and Roman Orthodoxy have earned him the title of Prophet of Roman Orthodoxy and have given rise to a school of committed followers and to much discussion. This book is Romanides' first Outline of Orthodox Patristic Dogmatics which is published for the first time in the original Greek and in English translation. It represents a concise introduction into his understanding of the basic tenets of the Eastern Orthodox Faith and its fundamental differences from those of Western (Augustinian or Franco-Latin) Christian theology. It covers such doctrines as God's relation to the world the doctrine of the Holy Trinity the doctrine of Christ the doctrine of the Church the Church's Holy Tradition and the restoration and perfection of humanity in and through this Tradition. It will serve as an introduction into this theologian's original vision of Patristic Orthodoxy which is the basis of his reappraisal of Christian theology and history. Sí venganza ;Cuando se descubre la verdad! ;Los grandes ejecutivos querían que su misión fracasara! ;Nuestro valeroso (y ahora bastante hirsuto) astronauta suelta a los aliens ante una humanidad horrorizada! Mutant Aliens es un curioso experimento de Bill Plympton un prestigioso animador independiente (ha sido premiado en Cannes y nominado a los Oscars) que acostumbra a dirigir escribir e incluso animar en solitario sus cortos y largometrajes. Visto el éxito que tuvo en Francia la recopilación de tiras cómicas The Sleazy cartoons of Bill Plympton su editor francés le hizo una oferta para realizar decidió una historia directamente para un cómic y Plympton decidió aprovechar la ocasión y en vez de realizar un storyboard convencional de su próxima película plasmarla en forma de cómic con unos dibujos más trabajados de lo que es habitual intentando que la narración fuera muy visual (es frecuente encontrar páginas que sólo muestran acción sin diálogos). De esta forma el adelanto del cómic le sirvió a Plympton no solo para ayudar a financiar la película sino que también para promocionarla incluso antes de que estuviera finalizada y le ayudaría a madurar la historia y personajes de cara a la reacondicionamiento del largometraje (de hecho hay algunas diferencias entre el cómic y la película definitiva). Mutant Aliens un tebeo de carácter gamberro e irreverente en el que el sexo y la violencia aparecen recurrentemente como un elemento humorístico más es una buena forma de acercarse a la original obra de Bill Plympton. Además el cómic cuenta con la curiosidad añadida de estar dibujada enteramente a lápiz por decisión del autor lo que contribuye a darle un aire todavía más particular.; ['Juvenile Fiction'], "

"Expository Sermons on 2 Peter; When Dr. Lloyd-Jones preached these twenty-five sermons on 2 Peter comparatively few saw their far-reaching significance. The minister of Westminster Chapel London was proposing to rebuild a congregation on lines strangely unfamiliar in post-war Britain. The sermons' form- authoritative expository preaching - and still more their content were against all the prevailing trends. J. I. Packer one of his younger hearers in the late 1940s has written: 'I had never heard such preaching and was electrified. All that I know about preaching I can honestly say I learned from ""the Doctor." I have never heard another preacher with so much of God about him'. The content of this volume is its chief warrant for publication. But as a record of Dr. Lloyd-Jones' first extensive series of sermons on any one book of Scripture it also has some special interest. With treatment which is broader and less detailed than normal his hearers were introduced to expository preaching. Now in this format his 2 Peter sermons will provide an introduction for other to a type of reading which is able under God to strengthen Christians and churches around the world.; ['Religion'], "

"Blue-Eyed Child of Fortune the Civil War Letters of Colonel Robert Gould Shaw; On the Boston Common stands one of the great Civil War memorials a magnificent bronze sculpture by Augustus Saint-Gaudens. It depicts the black soldiers of the Fifty-fourth Massachusetts Infantry marching alongside their young white commander Colonel Robert Gould Shaw. When the philosopher William James dedicated the memorial in May 1897 he stirred the assembled crowd with these words: ""There they march warm-blooded champions of a better day for man. There on horseback among them in the very habit as he lived sits the blue-eyed child of fortune." In this book Shaw speaks for himself with equal eloquence through nearly two hundred letters he wrote to his family and friends during the Civil War. The portrait that emerges is of a man more divided and complex--though no less heroic--than the Shaw depicted in the celebrated film Glory. The pampered son of wealthy Boston abolitionists Shaw was no abolitionist himself but he was among the first patriots to respond to Lincoln's call for troops after the attack on Fort Sumter. After Cedar Mountain and Antietam Shaw knew the carnage of war firsthand. Describing nightfall on

the Antietam battlefield he wrote ""the crickets chirped and the frogs croaked just as if nothing unusual had happened all day long and presently the stars came out bright and we lay down among the dead and slept soundly until daylight. There were twenty dead bodies within a rod of me."" When Federal war aims shifted from an emphasis on restoring the Union to the higher goal of emancipation for four million slaves Shaw's mother pressured her son into accepting the command of the North's vanguard black regiment the Fifty-fourth Massachusetts. A paternalist who never fully reconciled his own prejudices about black inferiority Shaw assumed the command with great reluctance. Yet as he trained his recruits in Readville Massachusetts during the early months of 1863 he came to respect their pluck and dedication. ""There is not the least doubt"" he wrote his mother ""that we shall leave the state with as good a regiment as any that has marched."" Despite such expressions of confidence Shaw in fact continued to worry about how well his troops would perform under fire. The ultimate test came in South Carolina in July 1863 when the Fifty-fourth led a brave but ill-fated charge on Fort Wagner at the approach to Charleston Harbor. As Shaw waved his sword and urged his men forward an enemy bullet felled him on the fort's parapet. A few hours later the Confederates dumped his body into a mass grave with the bodies of twenty of his men. Although the assault was a failure from a military standpoint it proved the proposition to which Shaw had reluctantly dedicated himself when he took command of the Fifty-fourth: that black soldiers could indeed be fighting men. By year's end sixty new black regiments were being organized. A previous selection of Shaw's correspondence was privately published by his family in 1864. For this volume Russell Duncan has restored many passages omitted from the earlier edition and has provided detailed explanatory notes to the letters. In addition he has written a lengthy biographical essay that places the young colonel and his regiment in historical context.; ['History'], "Christian Perfection; John Wesley (1703-1791) is the chief architect and source of inspiration to the teaching commonly referred to as Christian perfection. "Escort;: The battle of the Atlantic; The pursuit of German U-boats in the Battle of the Atlantic has long been considered one of the most exciting stories of World War II. This definitive study takes readers into the cockpits and onto the flight decks of the versatile and hardy U.S. escort carriers (CVEs) to tell of their vital yet little-known contribution to the anti-U-boat campaign. Sailing apart from the Allied convoys the CVE captains had complete freedom of action and frequently took their ships on ""hunt and kill"" missions against the enemy. The German submarines were allowed no respite and no place to relax without the fear of discovery. World War II historian William Y'Blood explains that in the eighteen months between the spring of 1943 when the escort carriers began to prowl the Atlantic to November 1944 the average number of U-boats in daily operation was reduced from 108 to a mere 31. Though land-based aircraft various support groups and the convoy system itself helped win the Battle of the Atlantic the escort carrier groups' influence was profound. In addition to documenting the escort carriers' exciting operational history the author also traces the CVE's development and construction and examines its tactical and strategic uses.; ['History'],"

"An Introduction to Data Structures and Algorithms (Progress in Theoretical Computer Science); Data structures and algorithms are presented at the college level in a highly accessible format that presents material with one-page displays in a way that will appeal to both teachers and students. The thirteen chapters cover: Models of Computation Lists Induction and Recursion Trees Algorithm Design Hashing

Heaps Balanced Trees Sets Over a Small Universe Graphs Strings Discrete Fourier Transform Parallel Computation. Key features: Complicated concepts are expressed clearly in a single page with minimal notation and without the ""clutter"" of the syntax of a particular programming language; algorithms are presented with self-explanatory ""pseudo-code.""  
\* Chapters 1-4 focus on elementary concepts the exposition unfolding at a slower pace. Sample exercises with solutions are provided. Sections that may be skipped for an introductory course are starred. Requires only some basic mathematics background and some computer programming experience.  
\* Chapters 5-13 progress at a faster pace. The material is suitable for undergraduates or first-year graduates who need only review Chapters 1 - 4.  
\* This book may be used for a one-semester introductory course (based on Chapters 1-4 and portions of the chapters on algorithm design hashing and graph algorithms) and for a one-semester advanced course that starts at Chapter 5. A year-long course may be based on the entire book.  
Sorting often perceived as rather technical is not treated as a separate chapter but is used in many examples (including bubble sort merge sort tree sort heap sort quick sort and several parallel algorithms). Also lower bounds on sorting by comparisons are included with the presentation of heaps in the context of lower bounds for comparison-based structures.  
\* Chapter 13 on parallel models of computation is something of a mini-book itself and a good way to end a course. Although it is not clear what parallel; ['Computers'], "

He learned Chinese the better to discuss with them the problems in science and technology as also questions of religion and the hereafter. "Introduction to Continuum Damage Mechanics (Mechanics of Elastic Stability); Modern engineering materials subjected to unfavorable mechanical and environmental conditions decrease in strength due to the accumulation of microstructural changes. For example considering damage in metals we can mention creep damage ductile plastic damage embrittlement of steels and fatigue damage. To properly estimate the value of damage when designing reliable structures it is necessary to formulate the damage phenomenon in terms of mechanics. Then it is possible to analyse various engineering problems using analytical and computational techniques. During the last two decades the basic principles of continuum damage mechanics were formulated and some special problems were solved. Many scientific papers were published and several conferences on damage mechanics took place. Now continuum damage mechanics is rapidly developing branch of fracture mechanics. This book is probably the first one on the subject; it contains a systematic description of the basic aspects of damage mechanics and some of its applications. In general a theoretical description of damage can be rather complicated. The experiments in this field are difficult (especially under multiaxial stress and non-proportional loading). Therefore experimental data as a rule are scarce. Determination of functions and constants which play a role in the complex variants of the theory from available experimental data is often practically impossible. ix L.M. Kachanov The problems of damage mechanics are mainly engineering ones. Therefore the author tries to avoid superfluous mathematical formalism. "Zen-Brain Reflections; A sequel to the popular Zen and the Brain further explores pivotal points of intersection in Zen Buddhism neuroscience and consciousness arriving at a new synthesis of information from both neuroscience research and Zen studies. This sequel to the widely read Zen and the Brain continues James Austin's explorations into the key interrelationships between Zen Buddhism and brain research. In Zen-Brain Reflections Austin a clinical neurologist researcher and Zen practitioner examines the evolving psychological processes and brain changes associated with the path of long-range meditative training. Austin draws not only on the latest neuroscience research and new neuroimaging studies but also on Zen literature and his personal experience with alternate states of consciousness. Zen-Brain Reflections takes up where the earlier book left off. It addresses such questions as: how do placebos and acupuncture change the brain? Can neuroimaging studies localize the sites where our notions of self arise? How can the latest brain imaging methods monitor meditators more effectively? How do long years of meditative training plus brief enlightened states produce pivotal transformations in the physiology of the brain? In many chapters testable hypotheses suggest ways to correlate normal brain functions and meditative training with the phenomena of extraordinary states of consciousness. After briefly introducing the topic of Zen and describing recent research into meditation Austin reviews the latest studies on the amygdala frontotemporal interactions and paralimbic extensions of the limbic system. He then explores different states of consciousness both the early superficial absorptions and the later major ""peak experiences." This discussion begins with the states called kensho and satori and includes a fresh analysis of their several different expressions of ""oneness." He points beyond the still more advanced states toward that rare ongoing stage of enlightenment that is manifest as ""sage wisdom." Finally with reference to a delayed ""moonlight"" phase of kensho Austin envisions novel links between migraines and metaphors moonlight and mysticism. The Zen perspective on the self and consciousness is an ancient one. Readers will discover how relevant Zen is to the neurosciences and how each field can illuminate the other.; ['Medical'], "

"On Reflection; an Autobiography; In addressing her grandchildren in the foreword to this autobiography Helen Hayes writes: 'It is no longer fashionable to have faith; but your grandmother has never been famous for her chic.' It is in fact because of her tenacious faith in the world that Helen Hayes decided to write this book as a legacy for her grandchildren; to be read one day when they are grown. In setting down all the family stories the backstage anecdotes and her recollections of spiritual struggle she has produced a legacy for all of us. After years of unwillingness to discuss her private world—which even her bestselling book A Gift of Joy did not do—she has looked beyond her legend and directly at life's lessons as she was forced to learn them. Deeply moving and affectionately witty her autobiography is an affirmation of the faith that first gave it impetus. All the Helens are here: the 'unrehearsed' child and her shy but ambitious mother; the young actress who so appealed to such luminaries as John Drew and William Gillette; the young woman who forged a marriage with a brilliant renegade named Charles MacArthur; the mother of Mary and Jim; the keeper of an endless procession of hilariously tyrannical poodles; the friend of Fitzgerald Harpo Marx and Dietrich; the lady who became out 'First Lady of the Theater'; the mature woman looking forward; and still and always the actress. On Reflection is in every sense an unforgettable book.; ['Biography & Autobiography'], "

"Memory Amnesia and the Hippocampal System (Bradford Books); In this sweeping synthesis Neal J. Cohen and Howard Eichenbaum bring together converging findings from neuropsychology neuroscience and cognitive science that provide the critical clues and constraints for developing a more comprehensive understanding of memory. Specifically they offer a cognitive neuroscience theory of memory that accounts for the nature of memory impairment exhibited in human amnesia and animal models of amnesia that specifies the functional role played by the hippocampal system in memory and that provides further understanding of the componential structure of memory. The authors' central thesis is that the hippocampal system mediates a capacity for declarative memory the kind of memory that in humans supports conscious recollection and the explicit and flexible expression of memories. They argue that this capacity emerges from a representation of critical relations among items in memory and that such a relational representation supports the ability to make inferences and generalizations from memory and to manipulate and flexibly express memory in countless ways. In articulating such a description of the fundamental nature of declarative representation and of the mnemonic capabilities to which it gives rise the authors' theory constitutes a major extension and elaboration of the earlier procedural-declarative account of memory. Support for this view is taken from a variety of experimental studies of amnesia in humans nonhuman primates and rodents. Additional support is drawn from observations concerning the neuroanatomy and neurophysiology of the hippocampal system. The data taken from divergent literatures are shown to converge on the central theme of hippocampal involvement in declarative memory across species and across behavioral paradigms. Neal J. Cohen is Assistant Professor in the Amnesia

Research Laboratory at Beckman Institute for Advanced Science and Technology and in the Department of Psychology at the University of Illinois. Howard Eichenbaum is Professor of Psychology and Neurobiology at the University of North Carolina Chapel Hill.; ['Medical'], "

The state tournament was so popular—regularly drawing fifteen thousand fans more than the boys' tourney—that officials declined a lucrative broadcasting offer from ABC's Wide World of Sports rather than forfeit the Iowa Girls' High School Athletic Union's control of the game. The Only Dance in Iowa chronicles the one-hundred-year history of this Iowa tradition long a symbol of the state's independence and the people's rural pride. Max McElwain shows how well before the passage of Title IX in 1972 Iowa six-player girls' basketball was as Sports Illustrated gushed ""a utopia for girls' athletics." He also demonstrates how ironically enough the fallout from Title IX in many ways led to six-girl basketball's demise. Through interviews careful ethnography and detailed historical analysis McElwain exposes the intricate political sociological and historical dynamics of this cultural phenomenon. His book reveals how six-girl basketball flourishing with the passionate support of Iowa's small towns school districts and media came to represent the state's strong traditional beliefs and the public school system's determination to maintain its identity in the face of national educational trends. The Only Dance in Iowa is as much a study of this disappearing culture as of the game it claimed as its own. This author has gone far beyond that spending the time and research necessary trying to establish whether or not the treasure did in fact exist whether the people places and events actually existed. It was a complicated process given the number of years that had passed. Authenticating them however did not detract from the stories. "Rhetoric in Ancient China Fifth to Third Century B.C.E.: A Comparison with Classical Greek Rhetoric (Studies in Rhetoric/Communication); Xing Lu examines language art persuasion and argumentation in ancient China and offers a detailed and authentic account of ancient Chinese rhetorical theories and practices within the society's philosophical political cultural and linguistic contexts. She focuses on the works of five

schools of thought and ten well-known Chinese thinkers from Confucius to Han Feizi to the the Later Mohists. Lu identifies seven key Chinese terms pertaining to speech language persuasion and argumentation as they appeared in these original texts selecting ming bian as the linchpin for the Chinese conceptual term of rhetorical studies. Lu compares Chinese rhetorical perspectives with those of the ancient Greeks illustrating that the Greeks and the Chinese shared a view of rhetoric as an ethical enterprise and of speech as a rational and psychological activity. The two traditions differed however in their rhetorical education sense of rationality perceptions of the role of language approach to the treatment and study of rhetoric and expression of emotions. "Directed by Allen Smithee; Allen Smithee specializes in the mediocre. He is versatile. He is prolific. And he doesn't exist. From 1969 until 1999 Allen Smithee was the pseudonym adopted by Hollywood directors when they wished not to be associated with films ostensibly of their making . Encompassing over fifty films of various stripes -- B movies sequels music videos made-for-TV movies -- Smithee's three decades of work affords the authors of this volume a unique opportunity to reassess the claims of auteurism both in its traditional guise and in the more commodified form it currently assumes. Sometimes treating Smithee as an auteur in much the same way critics and scholars have treated directors as diverse as Douglas Sirk Abbas Kiarostami and Quentin Tarantino the contributors reclaim new possibilities for auteurist filmmaking and film studies even as they show what an empty display it has recently become. In accounting for this change the essays in this volume employ innovative theories of authorship to recapture the subversive effect that auteurism once enjoyed. Thus the Smithee name becomes part of a larger discussion of the economics and history of pseudonyms in filmmaking -- notably in the blacklist of the 1950s -- as well as an opportunity to employ Jacques Derrida's theory of the signature to recover obscured economic and historic contexts within Smithee's films. Unique in its focus innovative in its approach Directed by Allen Smithee argues that it is precisely through throwaway films such as Smithee's that recent Hollywood cinema can best be studied.; ['Performing Arts'],"

"Inclusion in Urban Educational Environments: Addressing Issues of Diversity Equity and Social Justice; This book is motivated by our experiences in working with students and their families in urban communities. We are particularly concerned about the urgent imperative to address the endemic educational and societal challenges that pervade the lives of urban students particularly those who live in poverty are of minority and immigrant backgrounds and are otherwise marginalized within the current educational discourses and practices. In spite of the fact that over the last 3 decades policy makers educators and communities across the globe have called for in depth structural changes this is rarely evidenced in the discourses practices and structures within academic and practitioner spheres. This reluctance despite articulations to the contrary can be directly linked to normative theoretical and practical perspectives that are defined by assumptions that constrain urban students within restrictive boundaries. These narrow outsider worldviews based on notions of what ought to be combined with ignorance of the realities of students' lives focus on deviance and deficits. They blind prospective change agents to the strengths and richness that students bring and they delimit the transformative potential of social justice praxis within urban environments. The resulting discourse in the form of deficit beliefs thoughts actions and dialogues shapes urban research theory and practice. We contend that in order to counteract the debilitating impacts of these harmful constructions of urban and social justice it is important to clarify this terminology.; ['Education'],"

"The House on the Lagoon; Finalist for the National Book Award: "A family saga in the manner of Gabriel García Márquez" set in Puerto Rico from an extraordinary storyteller (The New York Times Book Review). This riveting multigenerational epic tells the story of two families and the history of Puerto Rico through the eyes of Isabel Monfort and her husband Quintín Mendizabal. Isabel attempts to immortalize their now-united families—and by extension their homeland—in a book. The tale that unfolds in her writing has layers upon layers exploring the nature of love marriage family and Puerto Rico itself. Weaving the intimate with the expansive on a teeming stage Ferré crafts a revealing self-portrait of a man and a woman two fiercely independent people searching for meaning and identity. As Isabel declares: "Nothing is true nothing is false everything is the color of the glass you're looking through." A book about freeing oneself from societal and cultural constraints The House on the Lagoon also grapples with bigger issues of life death poverty and racism.

Mythological in its breadth and scope this is a masterwork from an extraordinary storyteller.; ['Fiction'], "

"Secret Life of Cows; ""Within a day of receiving this book I had consumed it... Absorbing moving and compulsively readable.""-Lydia Davis In this affectionate heart-warming chronicle Rosamund Young distills a lifetime of organic farming wisdom describing the surprising personalities of her cows and other animals At her famous Kite's Nest

Farm in Worcestershire England the cows (as well as sheep hens and pigs) all roam free. They make their own choices about rearing grazing and housing. Left to be themselves the cows exhibit temperaments and interests as diverse as our own. ""Fat Hat"" prefers men to women; ""Chippy Minton"" refuses to sleep with muddy legs and always reports to the barn for grooming before bed; ""Jake"" has a thing for sniffing the carbon monoxide fumes of the Land Rover exhaust pipe; and ""Gemima"" greets all humans with an angry shake of the head and is fiercely independent. An organic farmer for decades Young has an unaffected and homely voice. Her prose brims with genuine devotion to the wellbeing of animals. Most of us never apprehend the various inner lives animals possess least of all those that we might eat. But Young has spent countless hours observing how these creatures love play games and form life-long friendships. She imparts hard-won wisdom about the both moral and real-world benefits of organic farming. (If preserving the dignity of animals isn't a good enough reason for you consider how badly factory farming stunts the growth of animals producing unhealthy and tasteless food.) "A Dictionary of Jewish Palestinian Aramaic of the Byzantine Period (Publications of The Comprehensive Aramaic Lexicon Project); Since the Middle Ages lexographies of Talmudic and other rabbinic literature have combined in one entry Babylonian Palestinian and Targumic words from various periods. Because morphologically identical words in even closely related dialects can frequently differ in both meaning and nuance their consolidation into one dictionary entry is often misleading. Scholars now realize the need to treat each dialect separately and in A Dictionary of Jewish Palestinian Aramaic Michael Sokoloff provides a complete lexicon of the dialect spoken and written by Jews in Palestine during the Byzantine period from the third century C.E. to the tenth century.

Sokoloff draws on a wide range of sources from inscriptions discovered in the remains of synagogues and on amulets fragments of letters and other documents poems and marginal notations to local Targumim the Palestinian Midrashim and Talmud texts addressing religious law (halacha) and Palestinian marriage documents (ketubbot) from the Arabic period. Many of these sources were unavailable to previous lexographers who based their dictionaries on corrupt nineteenth-century editions of the rabbinic literature. The discovery of new manuscripts in both European libraries and the Cairo Geniza over the course of the twentieth century has revolutionized the textual basis of Jewish Palestinian Aramaic. Each entry in A Dictionary of Jewish Palestinian Aramaic is divided into six parts: lemma or root part of speech English gloss etymology semantic features and bibliographic references. Sokoloff also includes an index of all cited passages. This major reference work updated to reflect the publication of new texts over the last decade will both provide students and scholars with a tool for an accurate understanding of the Aramaic dialect of Jewish Palestinian literature of the Byzantine period and help Aramaist and Semitic linguists to see the relationship between this dialect and others especially the contemporary dialects of Palestine.; ['History'], "

"Fugu Plan: The Untold Story of the Japanese and the Jews During World War Two; If someone who is rich and powerful comes to you for a favor you don't persecute him -- you help him. Having such a person indebted to you is a great insurance policy. There was one nation that did treat the Jews as if they were powerful and rich. The Japanese never had much exposure to Jews and knew very little about them. In 1919 Japan fought alongside the anti-Semitic White Russians against the Communists. At that time the White Russians introduced the Japanese to the book ""The Protocols of the Elders of Zion"". The Japanese studied the book and according to all

accounts naively believed its propaganda. Their reaction was immediate and forceful -- they formulated a plan to encourage Jewish settlement and investment into Manchuria. People with such wealth and power as the Jews possess the Japanese determined are exactly the type of people with whom we want to do business! The Japanese called their plan for Jewish settlement ""The Fugu Plan"". The fugu is a highly poisonous blowfish. After the toxin-containing organs are painstakingly removed it is used as a food in Japan and is considered an exquisite delicacy. If it is not prepared carefully however its poison can kill a person. The Japanese saw the Jews as a nation with highly valuable potential but as with the fugu in order to take advantage of that potential they had to be extremely careful. Otherwise the Japanese thought the plan would backfire and the Jews would annihilate Japan with their awesome power. The Japanese were allies of the Nazis yet they allowed thousands of European refugees -- including the entire Mirrer Yeshivah -- to enter Shanghai and Kobe during World War II. They welcomed these Jews into their country not because they bore any great love for the Jews but because they believed that Jews had access to enormous resources and amazingly influential power which could greatly benefit Japan. If anti-Semites truly believe that Jews rule the world why don't they all relate to Jews like the Japanese did? The fact that Jews are generally treated as outcasts proves that people do not really believe that Jews are anywhere near as wealthy or powerful as they claim. It proves that anti-Semites do not take their own propaganda seriously.; ['History'], "

"The Black Regulars 1866-1898; Black soldiers first entered the regular army of the United States in the summer of 1866. While their segregated regiments served in the American West for the following three decades the promise of Reconstruction gave way to the repressiveness of Jim Crow. But black men found a degree of equality in the service: the army treated them no worse than it did their white counterparts. The Black Regulars uses army correspondence court-martial transcripts and pension applications to tell who these men were often in their own words: how they were recruited and how their officers were selected; how the black regiments survived hostile congressional hearings and stringent budget cuts; how enlisted men spent their time both on and off duty; and how regimental chaplains tried to promote literacy through the army's schools. The authors shed new light on the military justice system relations between black troops and their mostly white civilian neighbors their professional reputations and what veterans faced when they left the army for civilian life.; ['History'], "

"Aristotle's Metaphysics; Martin Heidegger's reading of Aristotle was one of the pivotal influences in the development of his philosophy. First published in German in 1981 as volume 33 of Heidegger's Collected Works this book translates a lecture course he presented at the University of Freiburg in 1931. Heidegger's careful translation and his probing commentary on the first three chapters of Book IX of Metaphysics show the close correlation between his phenomenological interpretation of the Greeks (especially of Aristotle) and his critique of metaphysics.

Additionally Heidegger's confrontation with Aristotle's Greek text makes a significant contribution to contemporary scholarship on Aristotle

particularly the understanding of potentiality in Aristotle's thought. Finally the book exemplifies Heidegger's gift for teaching students how to read a philosophical text and how to question that text in a philosophical way.; ['Philosophy'], "

"Ultims tardes con Teresa; Uno de los hitos de la narrativa española del siglo XX Premio Biblioteca Breve que supuso la consolidación de su autor como uno de los escritores más representativos de las modernas literaturas europeas. A lo largo de estas páginas asistimos al alumbramiento de una de las geografías literarias más poderosas y perdurables de nuestro tiempo esa Barcelona de posguerra escrita en el quieto contraluz del recuerdo. Y nos encontramos también con dos personajes cuya larga y feliz convivencia con varias generaciones de lectores les ha convertido en mitos en ideales encarnaciones de su tiempo: Teresa una universitaria rebelde e izquierdista hija de la burguesía catalana y un inmigrante murciano un atractivo chava conocido como el «Pijoaparte» viven una historia de amor que refleja todas las contradicciones de una época el esplendor y la miseria de las clases sociales la ingenuidad del compromiso fácil y la amargura y el resentimiento de los perdedores habitantes de un exilio interior en el que forjados en tantas derrotas sueñan todavía como niños. El autor ha dicho: «Mis relaciones actuales con Teresa después de estos años de convivencia no sólo son buenas sino incluso más estimulantes de lo que yo había supuesto. La novela ha pasado a ocupar el rincón menos sobresaltado de mi conciencia y allí fulgura suavemente igual que un paisaje entrañable de la infancia. [...] He pensado en la novela para evocar tal o cual imagen predilecta: Teresa en su jardín de San Gervasio avanzando hacia Manolo con el pañuelo rojo asomando por el bolsillo de su gabardina blanca [...] El despertar de Manolo ante las cofias y los delantales de criada en el cuarto de Maruja...» Juan Marsé Informe sobre la novela del Ministerio de Información y Turismo (1965) «Todo el fondo y la forma de la novela puede considerarse inmoral por lo que su publicación fue justificadamente denegada por el lectorado del Servicio de Orientación Bibliográfica. [...] Si en atención al premio otorgado a esta novela [el Biblioteca Breve] o a otras circunstancias especiales se considera oportuno proceder a su publicación deberá someterse el texto a una revisión detenida que le libere al menos de los aspectos más hirientes de inmoralidad y clasismo.» La crítica ha dicho: «Últimas tardes con Teresa es una obra maestra. Y lo es porque sobrevive a su tiempo y en cierto modo al autor mismo. [...] La historia de la niña de buena familia catalana y el joven charnego no quedó atada a su contexto temporal; y eso es lo que ha hecho posible que envejezca si tal es la palabra con la solera y la autoridad de las grandes obras.» Arturo Pérez Reverte «Con el tiempo se ha ido adueñando del mundo de Marsé y de su estilo narrativo una sabiduría que solo está al alcance de los mejores.» Enrique Vila-Matas «Últimas tardes con Teresa es una de esas novelas que se vuelven cada año más contemporáneas.» Antonio Muñoz Molina «No solo es un libro bueno sino tal vez el más vigoroso y convincente de los escritos estos últimos años en España.» Mario Vargas Llosa «Últimas tardes con Teresa fue el resplandor. [...] Para cruzar esa línea que divide la sombra y la luz y hacerla literatura hacen falta vida y experiencia mucho camino urbano un don de la observación que sólo se da entre los que se fijan más de la cuenta y por eso acaban siendo grandes novelistas como el maestro Juan Marsé.» Juan Cruz; ['Fiction'], "

"Amish Crib Quilts from the Midwest: The Sara Millier Collection; A rare collection of 90 antique Amish quilts for children is show-cased in this brilliantly colorful volume. Few antique Amish crib quilts remain because they were put to hard use in large families which typically averaged seven children. But Sara Miller of Kalona Iowa herself a member of the Old Order Amish began building a collection of lovely antique crib quilts which she learned about as the proprietor of a fabric and quilt shop. Thus began an unusual odyssey -- Sara who once disparaged the quilting tradition of her heritage thinking it dull and drab began to see its graphic beauty when outsiders became intent on owning Amish quilts. The richly colorful quilts featured here come from Amish communities through the Midwestern United States. In addition to 90 full-color plates of the exquisite quilts is interpretive commentary and documentation plus three essays elaborating on the significance of the collection. Author Janneken Smucker descends from a line of quilters in the Amish-Mennonite community of Goshen IN; Dr. Patricia Cox Crews is Director of the International Quilt Study Center in Lincoln NE; Dr. Linda Welters is Professor of Textiles at the University of Rhode Island. "GODLESS COMMUNISTS: ATHEISM AND SOCIETY IN SOVIET RUSSIA 1917-1932; ""Godless Communists"" offers a fresh interpretation of early Soviet efforts to create an atheistic scientific society. The Bolsheviks' efforts to abolish the Church failed because they underestimated how tightly religious beliefs were woven into the fabric of the Russians' daily lives. Exploring the confrontation between secularism and the lower classes' traditional beliefs ""Godless Communists"" illustrates how developments between 1917 and 1932 shaped the attitudes toward religion and atheism that endure in Russia today.; ['Religion'], "

"The Essential Psychedelic Guide/No 85198; The classical mechanistic idea of nature that prevailed in science during the eighteenth and nineteenth centuries was an essentially mindless conception: the physically described aspects of nature were asserted to be completely determined by prior physically described aspects alone with our conscious experiences entering only passively. In the new theory quantum mechanics our conscious experiences enter into the dynamics in specified ways not fixed by the physically described aspects alone. "The Body Hispanic: Gender and Sexuality in Spanish and Spanish American Literature; This is the first book to analyze Spanish and Spanish American literature in light of several theories of sexuality advanced since Freud. Discussing such writers as Fuentes Neruda Garcia Lorca Galdos and St. Teresa of Avila Smith draws on critical approaches derived from Marx Lacan Foucault Barthes and French theoretical feminism (Kristeva and Irigaray). He argues that in spite of the variety of texts and theories treated there are three broad areas of coherence or coincidence: the status of women in a male culture the possibility of resistance to authority and the role of the body as protagonist in that resistance; ['Science'], "

The modus operandi of todays protests continues to evolve from that of the 1960s and 1970s. As smartphones and the Internet replace tie-dyed shirts and flower power contemporary students and scholars alike will find this edition of The Rhetoric of Agitation and Control to be a helpful tool in studying the progression of social and protest movements.; ['Language Arts & Disciplines'], "

"The Devil's Gate; The Mormon handcart tragedy of 1856 is the worst disaster in the history of the Western migrations and yet it remains virtually unknown today outside Mormon circles. Following the death of Joseph Smith founder of the Mormon church its second Prophet and new leader Brigham Young determined to move the faithful out of the Midwest where they had been constantly persecuted by their neighbors to found a new Zion in the wilderness. In 1846-47 the Mormons made their way west generally following the Oregon Trail arriving in July 1847 in what is today Utah where they established Salt Lake City. Nine years later fearing a federal invasion Young and other Mormon leaders wrestled with the question of how to bring thousands of impoverished European converts mostly British and Scandinavian from the Old World to Zion. Young conceived of a plan in which the European Mormons would travel by ship to New York City and by train to Iowa City. From there instead of crossing the plains by covered wagon they would push and pull wooden handcarts all the way to Salt Lake. But the handcart plan was badly flawed. The carts made of green wood constantly broke down; the baggage allowance of seventeen pounds per adult was far too small; and the food provisions were woefully inadequate especially considering the demanding physical labor of pushing and pulling the handcarts 1300 miles across plains and mountains. Five companies of handcart pioneers left Iowa for Zion that spring and summer but the last two of them left late. As a consequence some 900 Mormons in these two companies were caught in early snowstorms in Wyoming. When the church leadership in Salt Lake became aware of the dire circumstances of these pioneers Young launched a heroic rescue effort. But for more than 200 of the immigrants the rescue came too late. The story of the Mormon handcart tragedy has never before been told in

full despite its stunning human drama: At least five times as many people died in the Mormon tragedy as died in the more famous Donner Party disaster. David Roberts has researched this story in Mormon archives and elsewhere and has traveled along the route where the handcart pioneers came to grief. Based on his research he concludes that the tragedy was entirely preventable. Brigham Young and others in the Mormon leadership failed to heed the abundant signs of impending catastrophe including warnings from other Mormon elders in the East and Midwest where the journey began. Devil's Gate is a powerful indictment of the Mormon leadership and a gripping story of survival and suffering that is superbly told by one of our finest writers of Western history.;

"The Reader over your Shoulder: A Handbook for Writers of English Prose; In late October 1939 Robert Graves wrote to Alan Hodge: "I have begun a new book about English." Graves and Hodge had recently completed a social history of the between-wars period called The Long Week-End. Now they embarked on this new project "a handbook for writers of English Prose" to be called The Reader Over Your Shoulder. The world was in total upheaval. Graves had already fled Majorca three years earlier at the start of the Spanish Civil War. As they labored over their new writing project Graves and Hodge witnessed the fall of France and the evacuation of Allied forces at Dunkirk. In early September 1940 began the bombing of London by the German Luftwaffe a concentrated effort to destroy the resolve of the English people. Graves's and Hodge's idea was simple enough: at a time when their whole world was falling apart the survival of English prose sentences of writing that was clear concise intelligible had become paramount if hope were going to survive the onslaught. They came up with forty-one principles for writing the majority devoted to clarity the remainder to grace of expression. They studied the prose of a wide range of noted authors and leaders finding much room for improvement. Quoting grammarian and bestselling author Patricia T. O'Conner from her new introduction "With a new war to be won the kingdom couldn't afford careless sloppy English. Good communication was critical." The book they would write would turn out to be one of the most erudite and at the same time one of the most spontaneous and inspired ever to take on the challenge of writing well. O'Conner in her introduction describes The Reader Over Your Shoulder as nothing less than "the best book on writing ever published." The present edition restores for the first time in three-quarters of a century the original 1943 text which in subsequent printings and editions had been shortened by over 150 pages including much of the heart of the book.; ['Language Arts & Disciplines'], "

"Literacy and Script Reform in Occupation Japan: Reading between the Lines; This book challenges the widespread belief that overzealous Americans forced unnecessary script reforms on an unprepared unenthusiastic but helpless Japan during the Occupation. Unger presents neglected historical evidence showing that the reforms implemented from 1946 to 1959 were both necessary and moderate. Although the United States

Education Mission of 1946 recommended that the Japanese give serious consideration to the introduction of alphabetic writing key American officials in the Civil Information and Education Section of GHQ/SCAP delayed and effectively killed action on this recommendation. Japanese advocates of romanization nevertheless managed to obtain CI&E approval for an experiment in elementary schools to test the hypothesis that schoolchildren could make faster progress if spared the necessity of studying Chinese characters as part of non-language courses such as arithmetic. Though not conclusive the experiment's results supported the hypothesis and suggested the need for more and better testing. Yet work was brought to a halt a year ahead of schedule; the Ministry of Education was ordered to prepare a report that misrepresented the goal of the experiment and claimed it proved nothing. The whole episode dropped from official and scholarly view--until the publication of this book.;

"Commandant of Auschwitz: The autobiography of Rudolf Hoess; An extraordinary and unique document: Hoess was in charge of the huge extermination camp in Poland where the Nazis murdered some three million Jews from the time of its creation (he was responsible for building it) in 1940 until late in 1943 by which time the mass exterminations were half completed. Before this he had worked in other concentration camps and afterwards he was at the Inspectorate in Berlin. He thus knew more both at first-hand and as an administrator about Nazi Germany's greatest crime than did any save two or three other men. Taken prisoner by the British he was handed over to the Poles tried sentenced to death and taken back to Auschwitz and there hanged. During the period between his trial and his execution he was ordered to write his autobiography. This is it. Hoess repeatedly says he was glad to write the book. He enjoyed the work. And finally the most careful checking has shown that he took great pains to tell the truth. Here we have painted by his own hand a vivid and unforgettable self-portrait of one of the great monsters of all time. To this are added portraits of some of his more spectacular fellow-criminals. "Belle Starr and Her Times: The Literature the Facts and the Legends; Who was Belle Starr? What was she that so many myths surround her? Born in Carthage Missouri in 1848 the daughter of a well-to-do hotel owner she died forty-one years later gunned down near her cabin in the Cherokee Nation in Oklahoma. After her death she was called "a bandit queen" "a female Jesse James" "the Petticoat Terror of the Plains." Fantastic legends proliferated about her. In this book Glenn Shirley sifts through those myths and unearths the facts. In a highly readable and informative style Shirley presents a complex and intriguing portrait. Belle Starr loved horses music the outdoors-and outlaws. Familiar with some of the worst bad men of her day she was however convicted of no crime worse than horse thievery. Shirley also describes the historical context in which Belles Starr lived. After knowing the violence of the Civil War as a child in the Ozarks She moves to Dallas in the 1860s and married a former Confederate guerilla who specialized in armed robbery. After he was killed she found a home among renegade Cherokees in the Indian Territory on her second husband's allotment. She traveled as far west as Los Angeles to escape the law and as far north as Detroit to go to jail. She married three times and had two children whom she idolized and tormented. Ironically she was shot when she had decided to go straight probably murdered by a neighbor who feared that she would turn him in to the police. "Italian Country; Italy is an historical country where the past is always present. This is well illustrated in the rural interior style which borrows and adapts from other eras and places editing and refining as it goes but culminating in a look that is chic original and always easy to live with. In Italian Country Living Caroline Clifton-Mogg explores the essential ingredients of the style taking in color and texture—the distinctively clear but subtle palette – before looking at the mixture of simplicity and comfort evident in furniture and fabrics and going on to admire the innate gift of the Italians for living outside with the same panache as they do indoors. Caroline then looks in more detail at individual country houses. Whether Rustic Contemporary Eclectic or Traditional in character these homes offer myriad ideas for interior decoration that are easily translatable into other lives and cultures. • Stunning photography by Chris Tubbs.; ['House & Home'], "

"Vox/Devney Spanish English Language Dictionary and Practice Set One Two-Book Bundle; The Rise of Victimhood Culture offers a framework for understanding recent moral conflicts at U.S. universities which have bled into society at large. These are not the familiar clashes between liberals and conservatives or the religious and the secular: instead they are clashes between a new moral culture—victimhood culture—and a more traditional culture of dignity. Even as students increasingly demand trigger warnings and "safe spaces" many young people are quick to police the words and deeds of others who in turn claim that political correctness has run amok. Interestingly members of both camps often consider themselves victims of the other. In tracking the rise of victimhood culture Bradley Campbell and Jason Manning help to decode an often dizzying cultural milieu from campus riots over conservative speakers and debates around free speech to the election of Donald Trump.; ['Social Science'], "

"The Genesis of Doctrine: A Study in the Foundations of Doctrinal Criticism (Bampton Lectures); Alister E. McGrath begins his book by critically engaging the views of George Lindbeck on doctrine before

moving on to present a fresh understanding of the nature and function of Christian doctrine within the church. Particular attention is paid to the way in which doctrine acts as a demarcator between communities of faith providing important insights into contemporary ecumenical debates.

McGrath also explores the crucial issue of the authority of the past in Christian theology focusing especially on how doctrine serves to maintain continuity within the Christian tradition. The Genesis of Doctrine represents an exploration of a ""middle way"" in relation to the significance of Christian doctrine rejecting both those approaches that insist on the uncritical repetition of the doctrinal heritage of the past and those that disallow the authority of past doctrinal formulations. The book concludes by considering whether doctrine has a future within the church answering this question in the affirmative on the basis of a number of important theological and cultural considerations. "Jesus Freak; You may think of martyrs as those who gave their lives for the faith in the early church. But today Christians around the world continue to stand boldly for Christ despite ongoing persecution. These are their stories. · Pastor Han--Stabbed to death by North Korean agents for sharing the gospel with North Koreans in China · Jean-Pierre Werner and Rodé Groenewald--Killed in a Taliban attack on their home in Afghanistan · Fatima Al-Mutairi--Killed by her brother after becoming a Christian in Saudi Arabia · Habila--Survived being shot in the face by Boko Haram militants after refusing to renounce Christ Persecution has always accompanied followers of Jesus who invited His followers to come and die. Some were jeered at and their backs were cut open with whips. Others were chained in prisons. Some died by stoning some were sawed in half and others were killed with the sword. Some went about wearing skins of sheep and goats destitute and oppressed and mistreated. They were too good for this world wandering over deserts and mountains hiding in caves and holes in the ground. --Hebrews 11:36-38 Faithful Christians around the world are still suffering and dying for the name of Christ. "The Book of Deeds of Arms and of Chivalry; It is unexpected in any era to find a woman writing a book on the art of warfare but in the fifteenth century it was unbelievable. Not surprisingly therefore Christine de Pizan's The Book of Deeds of Arms and of Chivalry written around 1410 has often been regarded with disdain. Many have assumed that Christine was simply copying or pilfering earlier military manuals. But as Sumner Willard and Charity Cannon Willard show in this faithful English translation The Book of Deeds of Arms and of Chivalry contains much that is original to Christine. As a military manual it tells us a great deal about the strategy tactics and technology of medieval warfare and is one of our most important sources for early gunpowder weapon technology. It also includes a fascinating discussion of Just War. Since the end of the fifteenth century The Book of Deeds of Arms and of Chivalry has been available primarily through Antoine Vérard's imprint of 1488 or William Caxton's 1489 translation The Book of the Order of Chivalry. Vérard even suggested that the work was his own translation of the Roman writer Vegetius making no mention of Christine 's name. Caxton attributed the work to Christine but it is impossible to identify the manuscript he used for his translation. Moreoever both translations are inaccurate. The Willards correct these inaccuracies in a clear and easy-to-read translation which they supplement with notes and an introduction that will greatly benefit students scholars and enthusiasts alike. Publication of this work should change our perception both of medieval warfare and of Christine de Pizan.; ['History'], "

"Desert Memories: Journeys Through the Chilean North (Directions); The Norte Grande of Chile the world's driest desert had 'engendered contemporary Chile everything that was good about it everything that was

dreadful'' writes Ariel Dorfman in his brilliant exploration of one of the least known and most exotic corners of the globe. For 10000 years the desert had been mined for silver iron and copper but it was the 19th-century discovery of nitrate that transformed the country into a modern state and forced the desert's colonization. The mines' riches generated mansions and oligarchs in Chile's more temperate region—and terrible inequalities throughout the country. The Norte Grande also gave birth to the first Chilean democratic and socialist movements nurturing every major political figure of modern Chile from Salvador Allende to Augusto Pinochet. In this richly layered personal memoir illustrated with the author's own photographs Dorfman sets out to explore the origins of contemporary Chile—and along the way seek out his wife's European ancestors who came years ago to Chile as part of the nitrate rush. And most poignantly he looks for traces of his friend and fellow 1960s activist Freddy Taberna executed by a firing squad in a remote Pinochet death camp.; ['Travel'], "

"The Message of the Stars; It is a matter of common knowledge among mystics that the evolutionary career of mankind is indissolubly bound up with the divine hierarchies who rule the planets and the signs of the Zodiac and that the passage of the Sun and the planets through the twelve signs of the Zodiac marks man's progress in time and in space. Therefore it is not to be wondered at that in the course of their investigations into the spiritual development of mankind the writers have also encountered much that deals with the Zodiac which is the boundary of our evolutionary sphere at the present time. So much has been perceived in the memory of nature that sheds light upon obscure passages of the Bible that notes have been made from time to time of different points but how to collect and collate these dissociated writings into a united whole has been a great problem for a long time. Even now the writers know and feel that what they are bringing forth is only a very very weak attempt to set before the students that great body of facts which have come to them through the memory of nature. They feel however that this will give a 3 4 THE MESSAGE OF THE STARS new and more profound meaning to the old symbols and that by passing on what has been found they put themselves in line to receive more light. Concerning the future evolution of planets The Rosicrucian Cosmo-Conception teaches on page 256 that ""when the beings upon the planet have evolved to a sufficient degree the planet becomes a Sun the fixed center of the Solar System. When the beings there have evolved to a still greater degree and consequently it has reached its maximum of brilliancy it breaks up into a Zodiac and becomes so to speak the womb of a new Solar System. Thus the Great hosts of Divine beings who until then were confined upon that Sun gain freedom of action upon a great number of stars whence they can affect in different ways the system which grows up within their sphere of influence. The planets or man-bearing worlds within the Zodiac are constantly being worked upon by these forces but in various ways according to the stage they have reached in evolution. Our Sun could not have become a sun until it set out from itself all the beings who were not sufficiently evolved to endure the high rate of vibration and the great luminosity of the beings who were qualified for that evolution. All the beings upon the different planets would have been consumed had they remained in the Sun. This visible Sun however though it is a place of evolution for beings vastly above man is not by any means the Father of the other planets as EVOLUTION AS SHOWN IN THE ZODIAC 5 material science supposes. On the contrary it is itself an

emanation from the central Sun which is the invisible source of all that IS in our solar system.""; ['Body Mind & Spirit'],,"

"Contract as Promise; Contract as Promise is a study of the philosophical foundations of contract law in which Professor Fried effectively answers some of the most common assumptions about contract law and strongly proposes a moral basis for it while defending the classical theory of contract. This book provides two purposes regarding the complex legal institution of the contract. The first is the theoretical purpose to demonstrate how contract law can be traced to and is determined by a small number of basic moral principles. At the theory level the author shows that contract law does have an underlying and unifying structure. The second is a pedagogic purpose to provide for students the underlying structure of contract law. At this level of doctrinal exposition the author shows that structure can be referred to moral principles. Together the two purposes support each other in an effective and comprehensive study of contract law. This second edition retains the original text and includes a new Preface. It also includes a substantial new essay entitled Contract as Promise in the Light of Subsequent Scholarship--Especially Law and Economics which serves as a retrospective of the work accomplished in the last thirty years while responding to present and future work in the field.; ['Contracts'], "

"Bitter Sweet; #1 NEW YORK TIMES BESTSELLER • Sadness is your superpower. In her new masterpiece the author of the bestselling phenomenon Quiet explores the power of the bittersweet personality revealing a misunderstood side of mental health and creativity while offering a roadmap to facing grief in order to live life to the fullest.

"Bittersweet grabs you by the heart and doesn't let go."—BRENÉ BROWN author of Atlas of the Heart "Susan Cain has described and validated my existence once again!"—GLENNON DOYLE author of Untamed "The perfect cure for toxic positivity."—ADAM GRANT author of Think Again ONE OF THE MOST ANTICIPATED BOOKS OF 2022—Oprah Daily BookPage Bittersweetness is a tendency to states of long-ing poignancy and sorrow; an acute aware-ness of passing time; and a curiously piercing joy at the beauty of the world. It recognizes that light and dark birth and death—bitter and sweet—are forever paired. If you've ever wondered why you like sad music . . . If you find comfort or inspiration in a rainy day . . . If you react intensely to music art nature and beauty . . . Then you probably identify with the bitter-sweet state of mind. With Quiet Susan Cain urged our society to cultivate space for the undervalued indispensable introverts among us thereby revealing an un-tapped power hidden in plain sight. Now she em-ploys the same mix of research storytelling and memoir to explore why we experience sorrow and longing and how embracing the bittersweetness at the heart of life is the true path to creativity con-nection and transcendence. Cain shows how a bittersweet state of mind is the quiet force that helps us transcend our personal and collective pain whether from a death or breakup addiction or illness. If we don't acknowledge our own heartache she says we can end up inflicting it on others via abuse domination or neglect. But if we realize that all humans

know—or will know—loss and suffering we can turn toward one another. At a time of profound discord and personal anxiety Bittersweet brings us together in deep and unexpected ways.; ['Psychology'], "

"Image Processing: Analysis and Machine Vision; Image Processing Analysis and Machine Vision represent an exciting part of modern cognitive and computer science. Following an explosion of inter est during the Seventies the Eighties were characterized by the maturing of the field and the significant growth of active applications; Remote Sensing Technical Diagnostics Autonomous Vehicle Guidance and Medical Imaging are the most rapidly developing areas. This progress can be seen in an in creasing number of software and hardware products on the market as well as in a number of digital image processing and machine vision courses offered at universities world-wide. There are many texts available in the areas we cover - most (indeed all of which we know) are referenced somewhere in this book. The subject suffers however from a shortage of texts at the 'elementary' level - that appropriate for undergraduates beginning or completing their studies of the topic or for Master's students - and the very rapid developments that have taken and are still taking place which quickly age some of the very good text books produced over the last decade or so. This book reflects the authors' experience in teaching one and two semester undergraduate and graduate courses in Digital Image Processing Digital Image Analysis Machine Vision Pattern Recognition and Intelligent Robotics at their respective institutions.; ['Computers'], "

"Curse of Rocky Colavito: A Loving Look at a Thirty-Year Slump; "The year's funniest and most insightful baseball book." - Chicago Tribune A classic look at those years of baseball futility and frustration that make the rare taste of success so much sweeter. Any team can have an off-decade. But three in a row? Only in Cleveland. No sports fans suffered more miserable teams for more seasons than Indians fans of the 1960s '70s and '80s. Terry Pluto takes a fond and often humorous look at "the bad old days" of the Tribe and finds plenty of great stories for fans to commiserate with. Other teams lose players to injuries; the Indians lost them to alcoholism (Sam McDowell) a nervous breakdown (Tony Horton) and the pro golf tour (Ken Harrelson). They even had to trade young Dennis Eckersley (a future Hall-of-Famer) because his wife fell in love with his best friend and teammate. Pluto profiles the men who made the Indians what they were for better or worse including Gabe Paul the underfunded and overmatched general manager; Herb Score the much-loved master of malaprops in the broadcast booth; Andre Thornton who weathered personal tragedies and stood as one of the few hitting stalwarts on some terrible teams; and Super Joe Charboneau who blazed across the American League as a rookie but flamed out the following season. Long-suffering Indians fans finally got an exciting star-studded winning team in the second half of

the 1990s. But this book still stands as the definitive story of that generation of Tribe fans—and a great piece of sports history writing.; ['Sports & Recreation'], "

"Shakespeare New Evid Pap; The New Oxford Shakespeare is a landmark print and online project which for the first time provides fully edited and annotated texts of all extant versions of all Shakespeare's works including collaborations revisions and adaptations. Based on a fresh examination of the surviving original documents it draws upon the latest interdisciplinary scholarship supplemented by new research undertaken by a diverse international team. Although closely connected and systematically cross-referenced each part can be used independently of the others. The New Oxford Shakespeare: The Complete Works: Critical Reference Edition collects the same versions of the same works found in

the Modern Critical Edition keyed to the same line-numbering. But the Critical Reference Edition emphasizes book history and the documentary origins of each text. It preserves the spelling punctuation capitalization abbreviations typographical contrasts ambiguities and inconsistencies of the early documents. Introductions focus on early modern manuscript and print culture setting each text within the material circumstances of its production transmission and early reception. The works are arranged in the chronological order of the surviving texts: the first volume covers documents manufactured in Shakespeare's lifetime and the second covers documents made between 1622 and 1728. The illustrated general introduction presents an overview of the texts available to editors and describes how they define Shakespeare. An essay on error surveys kinds of error characteristic of these early text technologies. It is followed by a general introduction to the music of Shakespeare's plays. Introductions to individual works and an extensive foot-of-the-page textual apparatus record and discuss editorial corrections of scribal and printing errors in the early documents; marginal notes record press variants and key variants in different documents. Original music notation is provided for the songs (where available). Because the plays were written and copied within the framework of theatrical requirements casting charts identify the length and type of each role discuss potential doubling possibilities and note essential props. The New Oxford Shakespeare consists of four interconnected publications: the Modern Critical Edition (with modern spelling) the Critical Reference Edition (with original spelling) a companion volume on Authorship and an online version integrating all of this material on OUP's high-powered scholarly editions platform. Together they provide the perfect resource for the future of Shakespeare studies.; ['Literary Collections'], "

"Healing Foods For Dummies (For Dummies (Computer/Tech)); Table of Contents Introduction Why You Should Never ""Diet!"" One Food Foods Which

"Oppose" Each Other Foods That Complement Each Other The Necessity of Fat in Your Diet The Myth of Calories Conclusion Author Bio Publisher Introduction I decided to write this book when I saw a number of my friends following fatty diets with no proteins low calories no carbohydrates or anything else being promoted by any sort of person who called himself a dietitian and had good PR behind him. And I began to think. If these people were put in situations when they could not get food to eat and had to survive with their body starving they would not treat food with such casual contempt. However they were starving their bodies of essential nutrients out of sheer ignorance. They wanted to get thin. Many of them were genetically programmed towards obesity. Others began gaining weight due to the body reaching a stage when it was in such a desperate condition that malnutrition had set in. And that is why it was putting on weight as a last resort in order to protect the body from any sort of future starvation. This book is going to tell you all about ancient food eating practices followed by the wise men of yore. If you say I cannot do without my potato chips or my sugar fix well you are not ready to live a lifestyle which were followed by our ancestors all over the world millenniums ago. They ate nourishing food. And they were thankful for what they got. They did not bother much about silly newfangled ideas about calories and in the amounts of calories required to keep you healthy and strong. This of course is a fallacy and is a silly myth which I am going to explain to you later on but at the moment I am going to tell you more about how foods were used to heal a number of diseases down the ages and naturally.; ['Health & Fitness'], "

"Revolution from Within: A Book of Self-Esteem; Newly updated: The bestseller "that could bring the human race a little closer to rescuing itself" from the subject of the film The Two Glorias (Naomi Wolf).

Without self-esteem the only change is an exchange of masters; with it there is no need for masters. When trying to find books to give to "the countless brave and smart women I met who didn't think of themselves as either brave or smart" Steinem realized that books either supposed that external political change would cure everything or that internal change would. None linked internal and external change together in a seamless circle of cause and effect effect and cause. She undertook to write such a book and ended up transforming her life as well as the lives of others. The result of her reflections is this truly transformative book: part personal collection of stories from her own life and the lives of many others part revolutionary guide to finding community and inspiration.

Steinem finds role models in a very young and uncertain Gandhi as well as unlikely heroes from the streets to history. Revolution from Within addresses the core issues of self-authority and unjust external authority and argues that the first is necessary to transform the second. This ebook features an illustrated biography of Gloria Steinem including rare images from the author's personal collection as well as a new preface and list of book recommendations from Steinem.; ['Self-Help'], "

Montgomery's Heroines and the Pursuit of Romance; When it originally appeared Elizabeth Rollins Epperly's The Fragrance of Sweet-Grass was one of the first challenges to the idea that L.M. Montgomery's books were unworthy of serious study. Examining all of Montgomery's fiction Epperly argues that Montgomery was much more than a master of the romance genre and that through her use of literary allusions repetitions irony and comic inversions she deftly manipulated the normal conventions of romance novels. Focusing on Montgomery's memorable heroines from Anne Shirley to Emily Byrd Starr Valancy Stirling and Pat Gardiner Epperly demonstrates that Montgomery deserves a place in the literary canon not just as the creator of Anne of Green Gables but as an artist in her chosen profession. Since its publication more than twenty years ago The Fragrance of Sweet-Grass has become a favourite of scholars writers and Montgomery fans. This new edition adds a preface in which Epperly discusses the book's contribution to the ongoing research on the life and writing of L.M. "Abraham; Could our sense of who we are really turn on a sliver of DNA? In our multiethnic world questions of individual identity are becoming increasingly unclear. Now in ABRAHAM'S CHILDREN bestselling author Jon Entine vividly brings to life the profound human implications of the Age of Genetics while illuminating one of today's most controversial topics: the connection between genetics and who we are and specifically the question ""Who is a Jew?"" Entine also reveals the shared ancestry of Israelites and Christians. As people from across the world discover their Israelite roots their riveting stories unveil exciting new approaches to defining one's identity. "Blood and Oil: The Dangers and Consequences of America's Growing Dependency on Imported Petroleum (The American Empire Project); From the author of Resource Wars a landmark assessment of the critical role of petroleum in America's actions abroad In his pathbreaking Resource Wars world security expert Michael T. Klare alerted us to the role of resources in conflicts in the post-Cold War world. Now in Blood and Oil he concentrates on a single precious commodity petroleum while issuing a warning to the United States-its most powerful and most dependent global consumer. Since September 11th and the commencement of the ""war on terror"" the world's attention has been focused on the relationship between U.S. foreign policy in the Middle East and the oceans of crude oil that lie beneath the region's soil. Klare traces oil's impact on international affairs since World War II revealing its influence on the Truman Eisenhower Nixon and Carter doctrines. He shows how America's own wells are drying up as our demand increases; by 2010 the United States will need to import 60 percent of its oil. And since most of this supply will have to come from chronically unstable often violently anti-American zones-the Persian Gulf the Caspian Sea Latin America and Africa-our dependency is bound to lead to recurrent military involvement. With clarity and urgency Blood and Oil delineates the United States' predicament and cautions that it is time to change our energy policies

before we spend the next decades paying for oil with blood.; ['Political Science'],"

"Francois Villon Complete Poems: Edited with English Translation and Commentary; Francois Villon was the last of the great medieval poets as important in his own more limited sphere as Chaucer or Dante. His fame surpasses that of any other medieval French lyricist in spite of the modest quantity uneven quality and often repellent subject-matter of his work. His poems are largely autobiographical and are rich in their descriptions of thefts fights nocturnal prowling imprisonment and exile. However as Barbara Sargent-Baur points out when Villon's work is good it is very good indeed unforgettable. His two major works are the Lais a series of bequests in anticipation of his prudent departure from Paris and Testament which is about his primary topic himself. This is the first edition of the whole of the corpus of Villon translations that utilizes a re-reading of all the manuscript sources and presenting for each poem a single-source text with all emendations accounted for. It is also the first annotated English version based on the best-text principle and respecting both Villon's meaning and his metrics. "Apostolic Tradition Hermeneia (Hermeneia: A Critical & Historical Commentary on the Bible); The anonymous early church order that became known as the Apostolic Tradition and conventionally attributed to Hippolytus of Rome has generated enormous scholarly discussion since its discovery in the nineteenth century. Surprisingly however there has never before been a comprehensive commentary on it such as there is for other patristic works. We have here attempted to remedy this defect and at the same time we have offered the first full synoptic presentation in English of the various witnesses to its text. We have also taken the opportunity to develop our argument that it is neither the work of Hippolytus nor of any other individual. Instead we believe that it is a composite document made up of a number of layers and strands of diverse provenance and compiled over a period of time and therefore not representing the practice of any one Christian community. - from the Preface This Hermeneia volume provides an important contribution to New Testament research as well as the study of the patristic era.; ['Religion'], "

"The Doctrine of Wisdom: Sacred Choral Music of William Mathias; The best music of the 20th century ""developed our capacity for feeling deepened our compassion and furthered our quest for and understanding of what Aristotle called 'the perfect end of life' "" . - from the Foreword by NPR music critic Ted Libbey The single greatest crisis of the 20th century was the loss of faith. Noise--and its acceptance as music--was the product of the resulting spiritual confusion and in its turn became the further cause of its spread. Likewise the recovery of modern music the theme to which this book is dedicated stems from a spiritual recovery. This is made explicitly clear by the composers whose interviews with the author are collected in this book. Robert Reilly spells out the nature of the crisis and its solution in sections that serve as bookends to the chapters on individual composers. He does not contend that all of these composers underwent and recovered from the central crisis he describes but they all lived and worked within its broader context and soldiered on writing beautiful music. For this they suffered ridicule and neglect and he believes their rehabilitation will change the reputation of modern music. It is the spirit of music that this book is most about and in his efforts to discern it Reilly has discovered many treasures. The purpose of this book is to share them to entice you to listen--because beauty is contagious. English conductor John Eliot Gardiner writes that experiencing Bach's masterpieces ""is a way of fully realizing the scale and scope of what it is to be human"" . The reader may be surprised by how many works of the 20th and 21st centuries of which this is also true. ""Exuding the same passion and purpose as the author herself Joani Gammill's The Interventionist is a heartfelt game changer and long overdue. interventionist Joani Gammill. Joani Gammill an average suburban mom on the outside was secretly addicted to multiple forms of opiates and amphetamine for years and almost died as a result. Through the life-changing intervention staged by Dr. Phil on his show Gammill not only committed to getting help for her addiction but she also went on to become a professional interventionist helping thousands of others in distress. In The Interventionist she intertwines her experiences with depictions of her often harrowing and always inspiring interventions of the addicts and families she's worked with over the years. In each chapter she recounts details of a client's unique battle with addiction and the devastation that led to a loved one's request for her help. Gammill's intriguing story--and the equally captivating stories of the brave people who come to her for help--demonstrates how it is possible to emerge from the seemingly hopeless world of out-of-control drug use and not only regain one's sanity but actually discover that life clean and sober can be more meaningful than it ever was before. About the author Joani Gammill RN BRI I appears regularly on the Dr. Phil show where she leads interventions that have inspired millions of his viewers. Age of Wonder is a fascinating tour of the origins history and culture of the science fiction world written with insight and genuine affection for this wonder-filled literature and addressed to newcomers and longtime SF readers alike. Age of Wonder remains ""the landmark work"" Roger Zelazny called the first edition. The book contains sections that offer advice on teaching courses in science fiction disquisitions on the controversial subgenre of hard SF and practical explanations of the economics of publishing science fiction and fantasy. Age of Wonder still lives up to Hugo and Nebula Award winner Vonda McIntyre's description: ""An entertaining and provocative book that will inspire discussion and

argument for years to come." At the Publisher's request this title is being sold without Digital Rights Management Software (DRM) applied.; ['Literary Criticism'], "

"Noun-Modifying Constructions in Japanese: A frame semantic approach (Studies in Language Companion Series); This study examines the clausal noun-modifying construction (NMC) in Japanese a much-discussed construction that embraces what have usually been called relative clause and noun complement constructions. Drawing upon a broad range of naturally-occurring NMCs including types that fall outside the domains of relative clause and noun complement constructions Yoshiko Matsumoto argues for an analysis of NMCs that gives an important role to semantics and pragmatics. The framework in which this approach is presented draws from and further refines concepts of frame semantics. By using a frame semantic definition of semantic integration the author reveals the commonality of diverse types of NMCs in Japanese and posits a tripartite classification of NMCs which is both more comprehensive and more revealing than the traditional dichotomy between relative clause and noun complement constructions. As the first comprehensive and systematic study in English of Japanese NMCs with diverse lexical heads this work is further notable for its detailed discussion of the dependence of NMCs on both linguistic and extra-linguistic context.; ['Language Arts & Disciplines'], "
